

# Florida Surgeon General, Unmoved By Critics, Says U.S. Government Needs To Come Clean On Covid-19 Vaccine's Harm and Ineffectiveness

by **Charlene Muhammad**  
National Correspondent  
[@sischarlene](#)

**“See, this thing has reached the point of explosion. Black people that are here—even those in high places—are saying, ‘We can’t take this much longer.’ There’s like a volcanic eruption that’s coming now.”**

*The Honorable Minister Louis Farrakhan, October 10, 2015*

*“Justice Or Else!” 20th Anniversary of the Million Man March*

Dr. Joseph Ladapo, Florida’s controversial Black surgeon general, is awaiting confirmation when the state legislature convenes in January. He has refused to say whether he is vaccinated, citing his right to privacy. The governor’s choice to lead the state’s health department has been making moves deflating the hot air blown by agents implementing the U.S. Government’s Depopulation Agenda with the Covid-19 “vaccines.”

Dr. Ladapo is an advocate for clean, healthy living, protection of individual liberties and use of such strategies as monoclonal antibody treatments instead of the deadly experimental vaccines the government is trying to force on the American people. He has come under vociferous attack by those maintaining the current status quo. He opposes all mandates: vaccines, lockdowns and masks; his impact has been striking. On September 22, the day after his appointment, he signed Emergency Rule 64DER21-15 ending mask mandates and quarantines for school children.

As of November 4, Florida tied with Louisiana for the lowest Covid-19 daily average case rates in the last 7 days per 100,000 residents in the continental United States. Florida’s schools had a 76% decrease in cases since the rule became effective and a 90% decrease since August.

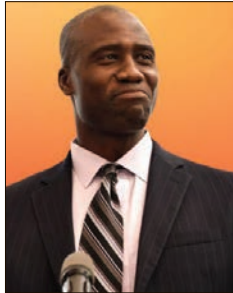

In addition to reduced cases since August, Florida’s hospitalizations have plummeted. The data stems from state and local health agencies (cases, deaths) U.S. Department of Health and Human Services (hospitalizations); Centers for Disease Control and state governments (vaccinations and case rates); the Census Bureau (population and demographic data) and the New York Times online Map and Case Count (daily case rates). The daily average is calculated with data that was reported in the last seven days; vaccination data is not available for some states; and all-time charts show data from Jan. 21, 2020, to present.

**Part of Florida’s success is attributed to the state providing widespread and easy access to monoclonal antibody treatment. This is a normally expensive therapy the state is giving residents for free. Anyone over the age of 12 who has contracted or been exposed to the virus is eligible.** Clinical trials backing the monoclonal antibodies yielded excellent results (70% reduction in hospitalization and death). Dr. Ladapo reports the state has treated over 130,000 people and prevented thousands of hospitalizations.

Public health officials in the United States have completely politicized the pandemic, so people who rejected the vaccine either as a personal choice or medical concerns were just ignored, instead of provided access to treatment, he observed.

The monoclonal antibody treatments are very effective at reducing the risk of hospitalization and exposure, said Dr. Ladapo. When a high risk person is in a situation where they’re exposed to Covid-19, these monoclonal antibodies are approved for preventive treatment in those patients, he explained, during an October 14 press conference at the Florida Department of Health in Lee County.

*“It’s critical. It works. It’s effective. It saves lives. It’s the example the governor has set. It’s an example that other states should follow. And you can do it. You don’t need the passports. You don’t need the mandates. You can get through this pandemic without those things,”* stated Dr. Ladapo. He has repeatedly said he is not against the “vaccine,” but he believes people have the right choose and should not be forced into getting it.

Dr. Joseph Ladapo  
Photo: Twitter

*“You hear these stories, people telling you what’s been happening in their lives, nurses, pregnant women who are being forced to put something in their bodies that we don’t know all there is to know about yet, no matter what people on TV tell you. It’s not true. We’re going to learn more about the safety of these vaccines,”* Dr. Ladapo remarked during an October 21 press conference with Florida governor DeSantis.

He noted that ten months after it was announced the experimental “vaccines” would stop transmission and provide rates of protection greater than 90%, data shows that the protection from infections for some of them is less than 40%, and even less than that for others. *So this idea that we are foolish for not believing people who are telling us things that we don’t have data for right now is ridiculous, and people need to continue and stick with their intuition and their sensibilities.”*

He further advanced the position that the science says something completely opposite of the false claims that vaccine mandates and their punitive enforcement measures are needed to create safe workplaces.

*“We know it’s bad for health. When you take away these people’s jobs, it’s bad for health. It increases mental distress. It’s bad for physical health. People often lose health insurance, so it disrupts their care ... It’s bad for health on every level for these people. And that matters, and that’s another reason why the Governor and I will never support those types of policies.”*

He pointed out that many Americans sense the total dishonesty about the safety of the vaccines. There’s been a concerted effort to hide the growing number of severe adverse reactions to the shots that otherwise healthy people have experienced.

*“It doesn’t matter how often some of our public health leaders that sit on TV (and say) people have to take these vaccines and they’re safe. Some of these reactions are uncommon? Fine. Let’s talk about them. Let’s talk about how common they are ... Let’s talk about the myocarditis in children. Let’s talk about some of these other reactions that patients are receiving care at the NIH (National Institutes of Health) for, but are not being publicized. Let’s have an open discussion about risks to benefits, and let’s*

*be honest. And until that kind of environment is here, people are going to continue to be resistant to the mandates.”*

Some of his critics, including his own colleagues, are working to prevent this outspoken Black man from receiving confirmation as Florida’s Surgeon General, but they cannot erase his accomplishments.

Recently granted a professorship at the University of Florida College of Medicine, Dr. Ladapo also served as an associate professor at the David Geffen School of Medicine at the University of California, caring for hospitalized patients. As I noted in a previous story, he has a wide array of credentials: a graduate of Wake Forest University, he holds both an M.D. from Harvard Medical School and a Ph.D. in Health Policy from Harvard Graduate School of Arts and Sciences. In addition to the above, he has served as a faculty member in the Department of Population Health at New York University School of Medicine and Staff Fellow at the U.S. Food and Drug Administration (FDA).

Dr. Ladapo has been transparent and his record speaks for itself. One underlying reason for all of the controversy surrounding him, in addition to racism, is that he is part of the nationally-recognized America’s Frontline Doctors. This group of physicians has been instrumental in exposing suppression of Covid-19 treatments by the corporate-controlled U.S. government and media outlets that comprise its so-called health care system.

*“One remarkable aspect of the Covid-19 pandemic has been how often unpopular scientific ideas, from the lab-leak theory to the efficacy of masks, were initially dismissed, even ridiculed, only to resurface later in mainstream thinking. Differences of opinion have sometimes been rooted in disagreement over the underlying science. But the more common motivation has been political,”* he wrote in his *Wall Street Journal* article, **“Are Covid Vaccines Riskier Than Advertised?”** *“There are concerning trends on blood clots and low platelets, not that the authorities will tell you.”*

Dr. Ladapo is among the infectious disease epidemiologists, and medical and public health scientists and medical practitioners who signed the **Great Barrington Declaration** over grave concerns about the damaging physical and mental health impacts of the prevailing Covid-19 policies.

In an attempt to block his confirmation by the Florida state Senate, some have slandered him, calling him unfit to be Surgeon General and Secretary of the Florida Department of Health.

What is their justification, when this accomplished, young Black physician/scientist, in just a short time as head of its health department, has helped turn the Covid-19 crisis around in the state?

Could it be that his opponents hate his interference with their fear-mongering designed to send people running for a vaccination; that he vigorously defends individual’s rights to reject being vaccinated; that he openly rejects mandates imposed on human beings without due process of law?

**“We cannot live without justice. Justice is a prerequisite to life ... Any decent human being who has a responsibility of government must see to it that the people and their right of freedom is protected. They must see that the people get justice and equal protection under the law.”**

*The Honorable Minister Louis Farrakhan  
October 24, 1987, Police Slaying of Michael Taylor*

# IMPORTANT INFORMATION ON IVERMECTIN

—There was an overwhelming response to the July 20th article on Ivermectin, a safe, inexpensive medicine which has proven extremely effective in treating Covid-19. It can only be given by prescription. In response to numerous requests for information on how to obtain Ivermectin, we are providing the website which gives a nationwide list of physicians who will prescribe it. Go to: [covid19criticalcare.com](https://covid19criticalcare.com)

## Dr. Anthony Fauci: a long history of gruesome experimentation on children and the use of aborted fetal tissue

by Dr. Ridgely Abdul Mu'min Muhammad

After 18 months of being lied to and led astray in this COVID-19 so-called pandemic by Dr. Anthony Fauci, it might take the pulling of the “dog card” by Robert F. Kennedy, Jr in his 10/25/21 article, “*Beyond #Beagle-Gate: Fauci’s Long History of Atrocities, Including Torturing Children*” to bring down his house of fake cards. Few people had even heard of this *de facto* COVID-19 czar standing next to then President Trump, issuing flipfopping directives to the American people on how to handle Sars-CoV-2. This flipfopping on the efficacy of masks in protecting the American people against the airborne respiratory virus, along with bombarding them daily with highly inflated numbers of deaths caused by the virus while withholding available, effective treatments, softened up the people’s will to resist taking the experimental set of gene therapy shots called “vaccines” that have now killed thousands and left many more people suffering from severe adverse effects of these death shots.

Fauci first touted the efficacy of the shots to stop the spread of this virus at 100%. Less than a year after the rollout of these Emergency Use Authorization drugs, he is now telling the people they need to take “booster”

shots. However, if we had taken the time to investigate this charlatan and the government research agencies that he represents, we may not have been so gullible. Robert F. Kennedy, Jr. is coming out with a new book on November 16, 2021 called “*The Real Anthony Fauci*.” Kennedy will provide an expose of Dr. Fauci’s more gruesome human experimentation on helpless children and aborted fetal tissues. The public and even members of Congress are appalled to learn that dogs (beagles) were used in NIH-funded research, where they were exposed to flies infected with a disease-carrying parasite. Their vocal cords were cut, so that the “scientists” conducting such experiments would not have to hear the barking and screaming of their victims. But where was public and Congressional outrage over what the U.S. government has done to the children of Black people for decades?

The same year that Dr. Fauci’s government agency (NIAID) paid for these dogs to be tortured and later killed, it gave \$400,000 to University of Pittsburgh scientists to graft the scalps of aborted fetuses onto living mice and rats. NIAID sought to develop rat and mouse “models” using “full-thickness fetal skin” to “provide a platform for studying human skin infections.” Are they studying “human skin infections” or are they studying how to infect humans with a pathogen using “humanized” mice to develop and test their new

**‘The American black women are ignorant of the real motive behind the so-called birth control schemes proposed and demanded by white officials ... The motive behind these schemes is not designed to promote the welfare of black families, but to eliminate these families in the future.’**

—The Honorable Elijah Muhammad, Message To The Black Man

bioweapons? If this reminds you of “Dr. Frankenstein” and other mad scientists in movies, you might be getting the picture of what these real life mad scientists are up to, using your tax money.

Planned Parenthood takes the aborted fetuses harvested in their many clinics and sells them to research laboratories. According to <https://www.all.org/learn/abortion/abortion-statistics/>, the total number of abortions in the U.S. between 1973 and 2018 was 61.8 million, which averages out to represent 1,373,333 per year, many of which fell into the hands of these modern mad scientists with genocidal intent. Their experimentation on fetal tissues harvested from elective abortions included the development of vaccines like M-M-R-II (Merck 2016a) for rubella, VARIVAX (Merck 2016b) for varicella, and HAVRIX (Glaxo Smith Kline 2016) for hepatitis A. (<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6027112/>) Dr. Judy Mikovits has warned us in three of her books about the contamination of the U.S. blood supply with pathogens transmitted from these human and animal tissues used in the production of vaccines. Since we are commanded by God not to consume human flesh, does the injection of products from human flesh into our bodies fit into a plan by Satan to make us all deviate from God’s commandments? But the horrors don’t stop there. Between 1985 and 2005, at least 532 infants and children in New York City were conscripted as human subjects of clinical trials testing experimental AIDS drugs and vaccines. In an October 27, 2021 article entitled “*Did Dr. Fauci Use African Orphans for AIDS Experiments?*” the authors cite the following:

**“The Fauci-led NIH approved funding for experiments on hundreds of New York City orphans. Government agencies and pharmaceutical companies reportedly used the orphans in deadly AIDS drug trials ... In 2005, the city of New York hired the VERA Institute to form a final report on the drug trials. VERA was given no access to medical records for any of the children used in**

**trials. Their report was published in 2008 ... They reported that twenty-five children died during the drug studies, that an additional fifty-five children died following the studies (in foster care), and, according to Tim Ross, Director of the Child Welfare program at VERA (as of 2009), 29% of the remaining 417 children who were used in drug studies had died (out of a total 532 children that are admitted to have been used) ... A worker who took care of some of the children said many of them immediately became ill and vomited after taking the drugs. She said children who refused to take the drugs were operated on and gastric tubes were inserted into their stomachs to force feed them AZT ... The children, some as young as one[1], were wards at the Incarnation Children’s Center (ICC) in New York City. Their parents died of AIDS.”**

The pharmaceutical giants who used these human subjects included Merck, BristolMyers Squibb, MicroGeneSys, Biocine, Glaxo Wellcome and Pfizer. These are some of the same companies that offer you protection from COVID-19, so beware. In 1987 the FDA approved AZT developed by Burroughs-Wellcome as the major treatment for HIV/AIDS. Burroughs-Wellcome merged with Glaxo to become Glaxo Wellcome in 1995. Dr. Fauci became head of NIAID in 1984 and directed most of their research money to develop drugs and vaccines to fight HIV, which he postulated was the sole cause of AIDS. Millions of taxpayer dollars were directed to these companies by Fauci, yet they never found a vaccine for HIV/AIDS. But Fauci promoted the use of AZT for fighting AIDS. AZT was a failed cancer drug produced by Burroughs-Wellcome. In 1987, this drug cost \$8,000 for yearly treatments, which would be somewhere around \$20,000 in today’s currency. *And Kennedy’s book further charges: “Fauci sabotaged safe and effective off-patent therapeutic treatments for AIDS while promoting deadly chemotherapy drugs”... such as the grossly expensive AZT.*

If this tactic of sabotaging safe and effective off-patent therapeutic treatments for AIDS sounds familiar, just remember how Ivermectin and Hydroxychloroquine have been villainized and ridiculed by the FDA, CDC, WHO and mass media in order to open the floodgates for death shots disguised as “vaccines” to supposedly fight COVID-19. The mad scientists have used human aborted fetuses, orphaned children, prison inmates and military personnel to perfect their refined bioweapons to be injections at this time—the end of their 6,000-year rule over the Indigent People of our Earth.

### VAERS COVID Adverse Event Reports

Reports from the Vaccine Adverse Events Reporting System.

## Ice Cube Says ‘Oh, Hell No!': Refuses COVID Kill Shot and \$9M movie deal

## 45 Million Americans Have Stronger Resistance to COVID Than “Vaccinated”

Writing in *Newsweek*, two major scientists harshly criticized **Anthony Fauci**: “By pushing vaccine mandates, Dr. Fauci ignores naturally acquired immunity among the COVID-recovered, of which there are more than 45 million in the United States.”

Dr. Martin Kulldorff, a Harvard epidemiologist, and Stanford’s Dr. Jay Bhattacharya, cited an Israeli study that concluded **the vaccinated were 27 times more likely to get symptomatic COVID than the unvaccinated** who had recovered from a prior infection.

**“First, we’ve got population. The world today has 6.8 billion people. That’s headed up to about nine billion. Now, if we do a really great job on new vaccines, health care, reproductive health services, we could lower that by, perhaps 10 or 15 percent [9 million to 1.35 billion].”**

—Bill Gates, 2010

Actor and rapper Ice Cube has departed Sony’s upcoming comedy, *Oh Hell No*, after refusing a request from producers to get vaccinated, according to the *Hollywood Reporter*.

Vaccination among cast and crew in Hollywood has become an issue on multiple projects. An agreement between guilds and studios, unveiled in July, states producers will have the option “to implement mandatory vaccination policies for casts and crew...on a production-by-production basis.”

## PFIZER: The Criminals You Trust With Your Life

In 1996, an outbreak of measles, cholera, and bacterial meningitis occurred in Nigeria. Pfizer representatives traveled to Kano to administer an experimental antibiotic, trovafloxacin, to approximately 200 children. Local Kano officials reported that more than fifty children died in the experiment, while many others developed mental and physical deformities.

Lawsuits followed and in December 2010 a United States diplomatic cable leak was released by WikiLeaks indicating that Pfizer hired investigators to find evidence of corruption against Nigerian attorney general Aondoakaa to persuade him to drop legal action.

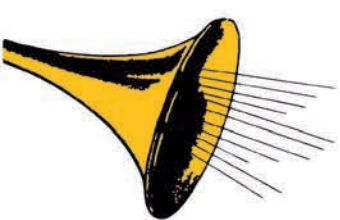

The lawsuits were eventually settled out of court. Pfizer committed to paying \$35 million “to compensate the families of children in the study,” another \$30 million to “support healthcare initiatives in Kano,” (read *birth control*) and \$10 million to cover legal costs.

## COVID-19 ‘Vaccine’ Q&A

Facts to help you make a decision

	YES	NO
1. Are the mRNA vaccines experimental?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Have they been safety tested on animals?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3. Have they been subject to medium or long term safety testing on humans?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4. Are the effects of the vaccines reversible?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Will the vaccines stop me getting COVID?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
6. Will the vaccines stop me spreading COVID?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
7. Will the vaccines allow me to stop wearing a mask?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8. Do the vaccines contain genetically modified organisms (GMOs)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Do the Astra-Zeneca and Johnson & Johnson vaccines contain aborted human or monkey cells?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
10. Do doctors have concerns about the mRNA vaccine’s long term effect on fertility?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
11. Is there a risk of auto immune disease, strokes, seizures, blood clots, convulsions or other side effects?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
12. Have the vaccines caused any deaths or injuries?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
13. Are the vaccine manufacturers liable for injuries or deaths caused by the vaccines?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
14. Are there doctors and scientists recommending people NOT to take the COVID “vaccine”?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Rejection of the Covid-19 vaccine growing inside of America

*“This has never been a country of the people, by the people or for the people. This is a country that never was made with a woman in mind. Therefore, they had to suffer years before they could even earn the right to vote. This country was not made for the slave because they only fashioned us as three-fifths of a human being. This country was not made for poor people. It was made for White people of privilege, White people of scholarship, White people who felt that they are the masters of God’s earth and that they deserve privilege but no lesser being deserves that privilege.”*

**The Honorable Minister Louis Farrakhan, The Criterion, July 4, 2020**

The president’s vaccine mandate at the federal level and declaration that companies with over 100 people vaccinate workers isn’t going over well.

Rebellion over the policy is creating anger and fueling a fierce backlash. When trinkets and tricks weren’t enough, the president and those with him decided to bludgeon people into submission by threatening their livelihoods, their ability to move and mingle in the society and trying to shame and bully people into submission.

It hasn’t had the intended affect with pushback coming from states, hospital workers, police officers, firefighters, and even from within the government itself.

America is in deep trouble, as the Hon. Elijah Muhammad, eternal leader of the Nation of Islam warned and as the Honorable Minister Louis Farrakhan has repeated that warning.

The rebellion against the experimental vaccines, which are “death itself,” are another sign of the unraveling of a great nation as it pulls and pulls itself apart in the face of blind and corrupt leaders. Despite using public money and supposedly working for the public good, the Big Pharma corporations peddling the government-sanctioned poison are raking in big bucks that will in turn be used to lobby lawmakers and reward them with hefty campaign contributions and perks.

This is not rule by, for and of the people, it is a corrupt system that is unconcerned with human life and true national interests.

The rebellion isn’t just among Joe Public, it’s rising inside of U.S. institutions that matter: “Thousands of intelligence officers could soon face dismissal for failing to comply with the U.S. government’s vaccine mandate, leading some Republican lawmakers to raise concerns about removing employees from agencies critical to national security,” said the Associated Press.

“Several intelligence agencies had at least 20 percent of their workforce unvaccinated as of late October, said U.S. Rep. Chris Stewart, a Utah Republican who is a member of the House Intelligence Committee,” the Associated Press reported Nov. 5.

While the CIA director has insisted that the majority of agency officers have taken the jab, Rep. Stewart contended “some agencies in the 18-member intelligence community had as much as 40 percent of their workforce unvaccinated.”

The intelligence agencies include the CIA, the National Reconnaissance Office, “which operates U.S. spy satellites,” and other secret government operations that collect information, fight covert wars, engage in dirty tricks and are the secret hand of the U.S. and its ugliest operations. They are the universal snoopers

Protesters gather at the Iowa Capitol in Des Moines, Iowa, on Oct. 28, to push the Iowa Legislature to pass a bill that would prohibit vaccine mandates from being imposed on employees in Iowa. Informed Choice Iowa, a group opposing vaccine and mask mandates, held the rally as lawmakers convened a special session of the legislature and unveiled a bill that provides for vaccine mandate exemptions and required unemployment benefits for workers forced out of a job for refusing a vaccine. Photo: AP Photo/David Pitt

Justin Paetow, center, a tin shop worker at Bath Iron Works, takes part in a demonstration against COVID-19 vaccine mandate outside the shipyard on Oct. 22, in Bath, Maine. Some American workers are making the painful decision to quit their jobs and abandon cherished careers in defiance of what they consider intrusive vaccine mandates requiring all businesses with 100 or more workers be fully vaccinated against COVID-19. Photo: AP Photo/Josh Reynolds

and the creators of, or active informants that disrupt organizations inside and outside of America. Is the U.S. going to fire her stool pigeons and their masters? What will she do about spies who are refusing to obey her vaccine orders? “While many people will likely still get vaccinated before the administration’s Nov. 22 deadline for civilian workers, resistance to the mandate could leave major agencies responsible for national security without some personnel. Intelligence officers are particularly hard to replace due to the highly specialized work they do and the difficulties of completing security clearance checks,” the Associated Press noted.

“You’re potentially firing thousands of people on the same day. And it’s not like you put an ad on Craigslist and have people apply by Thursday,” said the worried GOP congressman.

And, if the government approves more exemptions for these special people, how will that ring with ordinary people suffering under a heavy-handed, vax-driven government?

In addition, as the Associated Press added, “Mandates to get vaccinated have faced significant resistance, particularly given an already-tight market for businesses looking to hire workers. Some first responders have resisted vaccine mandates as have employee unions, arguing that mandates impinge on personal freedom.”

The Biden mandate is also facing a court challenge with a federal appeals court Nov. 6 putting a temporary halt to “the Biden administration’s vaccine requirement for businesses with 100 or more workers. The 5th U.S. Circuit Court of Appeals granted an emergency stay of the requirement by the federal Occupational Safety and Health Administration that those workers be vaccinated by Jan. 4 or face mask requirements and weekly tests.

“Louisiana Attorney General Jeff Landry said the action stops President Joe Biden ‘from moving forward with his unlawful overreach,’ ” said the Associated Press. Louisiana isn’t the only state fighting the mandate as states try to assert their rights against the federal government. In this political climate, the divisions and demands for states’ rights is only growing. Where will it end?

“Such circuit decisions normally apply to states within a dis-

trict—Mississippi, Louisiana and Texas, in this case—but Landry said the language employed by the judges gave the decision a national scope,” said the Associated Press. Even if the feds eventually triumph, it will be another angry moment for Whites already angry and fed up with government and who believe the Biden administration is illegitimate. “At least 27 states filed lawsuits challenging the rule in several circuits, some of which were made more conservative by the judicial appointments of President Donald Trump,” said the Associated Press.

America is in trouble.

Surely loyal Americans in the armed forces are lining up for the jab? Nope. As the Washington Post reported Oct. 28, “Up to 12,000 Air Force personnel have rejected orders to get fully vaccinated against the coronavirus despite a Pentagon mandate and officials say it is too late for them to do so by (a Nov. 2) deadline, posing a first major test for military leaders whose August directive has been met with defiance among a segment of the force.” That’s just the Air Force. Will we see mutiny in the ranks of the U.S. armed services? “The challenge now confronting Air Force leaders—how to address potential large-scale dissent in the face of a top health priority that has been deeply politicized—is a bellwether for the dilemma that’s in store across the military’s other services, which have staggered compliance deadlines ranging from the end of November to the middle of next summer and in some cases have experienced far greater resistance to President Joe Biden’s mandate,” said the Post.

As the Hon. Elijah Muhammad taught, this is the day of America’s downfall and a time of widespread dissatisfaction. She cannot chart her own way out of a storm of divine chastisement and she certainly cannot deliver answers for Black people. We can’t afford to reject divine guidance offered by Min. Farrakhan and wait until the final manifestation of the fall of America. Nation of Islam mosques and study groups will physically reopen fully across the country on Nov. 14, fly to Allah (God) and a place of refuge in a time of trouble. Don’t be among the rejectors or the doubters or the blind who love not good advisors. It could cost you your life.
