

The Covid-19 PCR Test: Companion Weapon to the Vaccine in the Era of Biological Warfare Against the Original People

by Ava Muhammad—Student National Spokesperson for the Honorable Minister Louis Farrakhan

“What has been known as America is threatened today with total destruction. America is destroying herself in her effort to destroy her Black slave. The water and air of America are being polluted by chemico-bacteriologists. America’s scientists of war conduct dreadful experiments on how to kill human beings by the millions and wipe out the life of whole continents. These are the days of fulfillment of prophecy of not one, but of many calamities. But in all of these preparations of destruction of human life by the devil...Allah (God) too has plans to save His people.”

—The Honorable Elijah Muhammad, *The Fall of America*

In the midst of a “pandemic,” Americans are projected to spend \$8 billion celebrating Halloween. This is a morbid, spooky holiday which promotes violent acts of murder and deception in the form of masks and costumes. What better time than now to take a deeper look into how far the enemy will go to remove the indigenous people (and many white people) from this planet. If you think that the vaccine is the lone instrument of death, you do not fully comprehend the Honorable Minister Louis Farrakhan’s relentless warning: The United States’ Policy of Depopulation, which is global in its reach.

Are we to believe that the enemy is killing us with the vaccine yet simultaneously trying to save our lives with the policies and illegal mandates that accompany the vaccine?

In a September 19th letter written to Alabama’s Governor Ivey, a coalition of physicians, health organizations and elected officials asked that he take action leading to the prohibition of vaccine mandates. One of the issues raised in the letter concerned the very dangerous lie being propagated by the NIH and the CDC that “natural immunity is insufficient to prevent Covid recovered patients from getting the infection again.” The doctors wrote:

“The basis for this claim is that there are cases of people who have previously been ‘diagnosed’ with Covid who have gotten sick again with Covid. The truth is they did not have Covid the first time. When the previous diagnoses were made, 40 cycle PCR tests were used to make the diagnosis. However, the data shows that any PCR test that uses more than 35 cycles only grows a virus 3% of the time. That means that the previous diagnosis of Covid was wrong 97% of the time. These individuals did not have Covid-19 the first time and therefore they are not reinfections. They simply had another virus, such as influenza.”

In August of this year, the infamous U.S. Food and Drug Administration (FDA) openly states that the PCR test, previously touted as the gold standard for identifying the presence of Covid-19, was not developed with actual samples of the virus. Instead, genetic material from a common cold virus was used. Neither Covid-19 nor any of its ‘variant’ forms has been isolated. The FDA used regular cold/flu viruses to produce PCR tests—meaning, everyone who tests “positive” for Covid-19 is actually testing positive for the cold or flu. This explains why the flu nearly disappeared in 2020, as everyone who got infected was assigned a “covid” diagnosis. **The bottom line is that there is no legitimate test that accurately identifies the presence of Covid-19.**

‘Beyond the manufactured case numbers, the test itself is deadly. The cotton-tipped swabs are all sterilized with ethylene oxide, a cancer-causing substance. Go to cancer.gov.’

In the FDA document, the U.S. Government, which has a policy of depopulation, clearly states that ordinary seasonal flu genetic material was used as the testing marker in the PCR kits because the government knew that many people would test positive, giving the statistics needed to create the fear and panic that would drive the majority to the vaccine. Here is an excerpt:

“Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted, assays designed for the detection of 2019-nCoV RNA were tested...”

In its *Instructions for Use* the CDC Division of Viral Diseases states: **“Results are for the identification of SARS-CoV-2 RNA. Positive results are indicative of active infection but do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease. Laboratories within the United States and its territories are required to report all results to the appropriate public health authorities. Negative results do not preclude SARS-CoV-2 infection. Negative results must be combined with clinical observations, patient history and epidemiological information.”**

Another revelation is that test results are ‘pooled’ together to produce numbers. This is why the tests became commonly referred to as PIC (Pneumonia, Influenza, CoVid), because they picked up all three. Thus, the test is inherently fraudulent. Now that millions of cases have been manufactured through testing, the FDA is withdrawing Emergency Use Authorization for the PCR Diagnostic Panel and it terminates December 31, 2021.

Why, then, are millions of people, vaccinated and unvaccinated, required to be tested over and over and over again? Beyond the manufactured case numbers, **the test itself is deadly.** The cotton-tipped swabs are all sterilized with **ethylene oxide**, a cancer-causing substance. Go to cancer.gov. According to the same U.S. government that is forcing the vaccine on everyone, including children (who have virtually zero chance of getting Covid-19), ethylene oxide is a colorless gas used to produce other chemicals, such as antifreeze. It is also used as a pesticide and a sterilizing agent. It has a strong ability

Patient getting tested for COVID-19. Photo: MGN Online

to damage DNA which makes it a great sterilizer and a great source for cancer.

The best, primary route to get this substance into your body is through inhalation. The site specifically states: *“The general population may also be exposed through tobacco smoke and the use of products that have been sterilized with ethylene oxide..”* Yes. The cotton swab fraudulently testing you for covid is leaving its calling card: Cancer. Are the tests and the vaccines the reason cancer cases are surging? Is this why there are so many commercials now blaming the public for the surge because people obeyed the government and stayed home and didn’t get their cancer screenings?

Finally, Biotech analyst, former Pfizer employee and whistleblower, Karen Kingston is publicly accusing the U.S. Government with using the PCR tests to steal our genome data and use it to replace the current human population with more subservient beings.

Those from among us who were educated in white institutions and who have advanced the vaccines have repeatedly said we should rely on “the science.” What is the science they are referring to? When white physicians first traveled from Europe to China in the late 16th century, the Chinese could see right away that these people knew next to nothing about the source of good health and wellness or the methods to prevent illness. They were taken aback by the Europeans’ reliance on studying corpses to understand the human body. The Chinese philosopher-physicians had training in ancient and sophisticated methods that relied upon nature. They concluded that this practice of just observing the static anatomy of dead people contradicted their practice of focusing on the living. They regarded western medicine as the *Science of Death*.

IMPORTANT INFORMATION ON IVERMECTIN

—There was an overwhelming response to the July 20th article on Ivermectin, a safe, inexpensive medicine which has proven extremely effective in treating Covid-19. It can only be given by prescription. In response to numerous requests for information on how to obtain Ivermectin, we are providing the website which gives a nationwide list of physicians who will prescribe it. Go to: covid19criticalcare.com

Covid Testing: Further Interference with our Freedom

by Dr. Ridgely Abdul Mu'min Muhammad

We Need Our Own Schools, Hospitals and Laboratories

“America will not agree to see the Negro separated from her until she has suffered divine punishment, as Pharaoh suffered. The same thing that other evil nations suffered before them is now coming upon the people. She seeks to keep her slaves robbed of opportunity and wealth. She envies success coming to American Negro free slaves. She charges high prices to keep them down. She deceives them through a few of what we call ‘Uncle Toms’ in the political circle, clergy class and all professional classes. She offers them little favoritism to help her work against their own people—the Black people. But they, too, will suffer along with the enemy of justice of the poor so-called Negro.” —The Honorable Elijah Muhammad, *The Fall of America*

More than a half-century ago, Black house servants chose integration over separation, and we have been the losers ever since. Black-owned schools and hospitals are virtually non-existent and most of our HBCU's have been infiltrated by white banks, donors, etc. Some of them actually served as sites for clinical trials of the COVID-19 vaccine. Most are enforcing vaccine mandates and their presidents are going around promoting the vaccine. The current unrest at Howard University, Atlanta's Morehouse College, Spelman College, Morris-Brown and Clark University over a number of issues is due to a new generation of Black youth who were born for the time of our separation from the children of our slavemasters. They will not tolerate the collusion of their administrations with corporate-controlled white America at the expense of their college experience. A quiet, sinister example of this type of wickedness can be found at Winston-Salem State University, an HBCU founded in 1892. At the top of its list of accomplished students is the Honorable Minister Louis Farrakhan, who attended for three years. Beginning as the Slater Industrial Academy, a one-room structure where 25 students attended classes taught by a single instructor, it advanced to a level of recognition that resulted in being renamed Winston-Salem Teachers College

in 1925 by the Assembly of North Carolina, with power to confer degrees. Thus, it became the first Black institution in the United States to grant Teaching degrees for elementary grades. The School of Nursing was established in 1953. In 1969, the state legislature approved the designation of Winston-Salem State University. In 2021, after months of virtual learning during the “pandemic,” the university opened up classroom doors and restored on-campus living for students this fall. As a part of their COVID-19 protocol, each “non-vaccinated” student is required to take a weekly COVID-19 PCR test. Third-year Nursing student, Sister Fatimah Muhammad, is one of the “non-vaccinated.” She is the daughter of Nation of Islam Student Minister Amon Muhammad, who is over Muhammad Mosque No. 34 in Durham, North Carolina. On October 5, 2021, Sister Fatimah tested positive for Sars-CoV-2 but had no symptoms. She was notified via email that she had one hour to report to the quarantine dorm for a 10 day stay. Over the course of the “pandemic,” the PCR test, initially considered the gold standard for testing, turned out to be incapable of isolating COVID-19. Thus, it regularly produces false positive and false negative results. In fact, the CDC announced on its own website that PCR test results will no longer be accepted after the end of this year:

“After December 31, 2021, CDC will withdraw the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization (EUA) of the CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel... CDC encourages laboratories to consider adoption of a multiplexed method that can facilitate detection and differentiation of SARS-CoV-2 and influenza viruses. Such assays can facilitate continued testing for both influenza and SARS-CoV-2 and can save both time and resources as we head into influenza season.”

The CDC's official acknowledgement of the uselessness of the PCR test, due to both false positive and false negative outcomes is a startling revelation. It means the reported number of COVID-19 cases in this country is totally unreliable. A false positive outcome is when the PCR test states that a person has the virus when in fact they do not. A false negative occurs when the PCR test states that a person does not have the virus when in fact they do. Therefore, it would seem prudent to get another test to verify the diagnosis before taking draconian actions like putting people in isolation. However, when Sister Fatimah tested positive using the PCR method, she was not allowed to take that test again nor was she allowed to get another test using a different technology. In fact, she had a friend get her a self-testing antigen kit from CVS. The result of the test was negative; however, the college would not accept that test. So, she had to sit out the remainder of her 10-day quarantine.

Now here is where it really gets crazy. The PCR test is not administered by the college but is administered by an outside entity—in this case Radeas Labs. When Sister Fatimah asked about getting another test, she was told that it was not recommended that she be tested again for 90 days. Official university policy was sent to students via a 10/2/21 email with the heading “[External] Required Covid 19 Testing”: “You do not need to test if you have tested positive for COVID-19 in the past 90 days (upload proof).” That's strange. So, if you tested positive you don't have to be retested for 90 days, but if you test negative, you have to be tested every week. Now mind you, Sister Fatimah was held in isolation for 10 days and could not go out of her room for the weekly testing. The reward for her compliance was a notice from the Dean of Students on 10/18/21: “Please note that this email serves as your WARNING for not participating in weekly testing.” In other words, she was placed in a type of “Twilight Zone” where obedience to illogical rules is subject to punishment.

When Sister Fatimah was released to go home, she was not tested by the college, but she went to a CVS pharmacy store and took their test for SARS-CoV-2 antibodies. According to their test, she never had the COVID-19 virus at all. The nurse practitioner that did her test even told her, “I'm not taking the vaccine and the PCR test is not accurate.” So, when Sister Fatimah goes back on campus, she will have to resume her weekly test for

COVID-19 in spite of never actually having the virus and in spite of written documents stating that because she tested positive at the college, she is not advised to take another COVID-19 test for 90 days.

Since she is over the age of 18, her parents were not allowed to intervene with the college's mistreatment of their child. When you drop your “adult” child off at college, you relinquish authority over them to that college along with a check. You can get approval from your child to go through a procedure that permits more involvement with your child. In other words, without strong intervention, once you drop your child off in the “lion's den,” your child is on her/his own to fend for themselves and try to make the best decisions based on conflicting—and in this case harmful—official university policies. This is not a good situation.

Sister Fatimah, in order to fulfill her degree requirements, must do clinical work in a local hospital. However, the hospitals require a person to take an MMR vaccine, along with the Varicella, Hepatitis B, and Tdap shots, before working in the hospital, even if only for a temporary training basis. She has not had any of these vaccines and does not want to take them. However, if she does not take them, she may not be able to get her nursing degree. To participate in this system, Satan will track you down and force you to allow him to inject his poisons in your body.

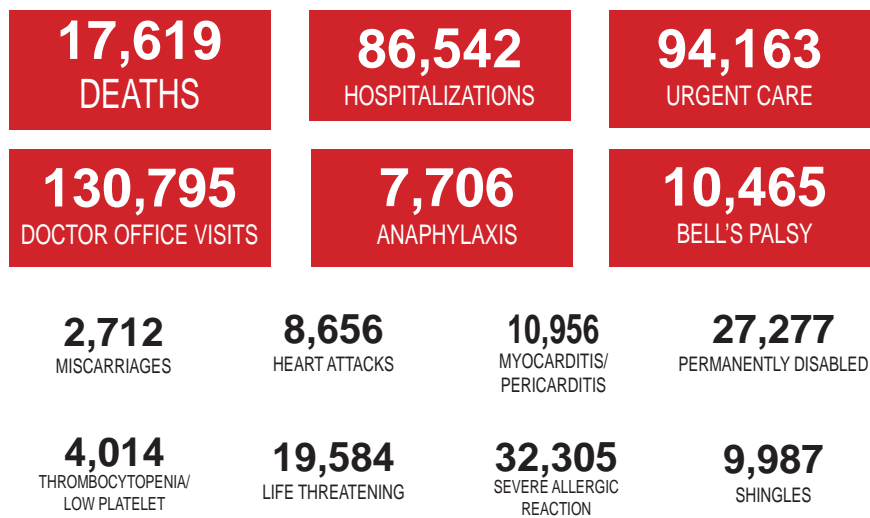

Why are the colleges using the officially ineffective PCR test for COVID-19 instead of quicker, less expensive, reliable tests? PCR (molecular), antigen (rapid) and antibody (blood) tests are used to diagnose whether someone is currently infected with COVID-19. A PCR test looks for the virus's genetic material, while an antigen test looks for specific proteins on the surface of the virus. PCR tests are processed in a laboratory, which can take a few days at a cost of \$150 per test; antigen tests are often processed at the point of care, in about 15 minutes for a cost of \$15 per test. The antibody detects the antibodies in your blood, produced by your immune system in response to the virus. The results are ready in 15 minutes at a cost of \$40. All three tests are approved by the FDA under Emergency Use Authorization (EUA).

Follow the money trail. There are about 5,800 students enrolled at WSSU. Let's say that 50% (2,900) are unvaccinated and thereby required to take a weekly PCR test at \$150 per test. For 32 weeks that bill runs up to \$13,920,000. With that type of money WSSU could set up their own testing laboratory and hire some Black folk to run it. Instead, some outside contractor, like Radeas Labs, is getting paid. If we look at the 106 HBCUs with an enrollment of 288,000 at a 50% unvaccinated rate, we are talking about \$2.76 billion. That's very close to the \$2 billion the Biden administration has promised the HBCUs as a part of the “Infrastructure Investment and Jobs Act.” Let go of false promises. We need to set up our own schools, hospitals and laboratories in this era of biological warfare.

VAERS COVID Adverse Event Reports

Reports from the Vaccine Adverse Events Reporting System. Our data reflects all VAERS data including the “nondomestic” reports.

837,593 Reports Through October 22, 2021

“We have no right to trust white people on this vaccine.”
—The Honorable Minister Louis Farrakhan

Documents Expose Fauci's Evil Experiments

Freedom of Information documents obtained by the White Coat Waste project show that Dr. Anthony Fauci approved a \$424,000 grant in 2020 for experiments in which dogs were bitten to death by disease-ridden flies.

First, Fauci's researchers cut the dogs' vocal cords, allegedly so the scientists would not have to listen to “incessant barking.” They then strapped capsules containing infected flies to the bare skin of the healthy beagle puppies (photo) and kept them in agonizing suffering for 196 days before killing them. The researchers acknowledged it subjected other animals to similar experiments, including mice, gerbils, and monkeys.

That same year, Dr. Fauci's agency gave \$400,000 to University of Pittsburgh scientists to graft the scalps of aborted fetuses onto living mice and rats. Fauci's researchers sought to develop rat and mouse “models” using “full-thickness fetal skin” to “provide a platform for studying human skin infections.” (Source: NaturalNews.com)

Vaccine Proven INEFFECTIVE at Stopping Alleged “Variants”

A recent study concluded that those who are fully “vaccinated” against COVID-19 are in fact more susceptible to COVID variant infections than unvaccinated people.

A scientist explained that “Among vaccinated individuals, a COVID variant virus is not recognized by the specialized antibodies provided by the vaccine, and the natural antibodies have been

programmed to stand down.” And this allows the “variant” to thrive. The fully vaccinated were more likely than unvaccinated persons to be infected by variants carrying mutations.

Floyd Mayweather Backs Kyrie Irving's Refusal to be Exterminated

Mayweather Tweeted his support for Irving, who is being persecuted by the NBA for choosing not to be injected with the unknown “vaccine” serum. The great athletes Marvin Hagler and Hank Aaron both died after taking the COVID “vaccine”:

“Kyrie, what's up? I know you're going through a lot.... You only want to be treated fair.... [Y]ou're a great person, great father, great athlete. And you believe what you believe.

“America is the land of the free: freedom of speech, freedom of religion and, supposedly, freedom to choose. Never be controlled by money. I respect you for having some integrity and being your own man. A free mind makes his own choices, and a slave mind follows the crowd. Stand for something or fall for anything. One man can lead a revolution to stand up and fight for what's right. One choice, one word, one action, can change the world. It's crazy how people hate you for being a leader. I hope your actions encourage many others to stand up and say enough is enough.

“Respect to you, Kyrie, and power to the people.”

Floyd Mayweather
@FloydMayweather

Choice is defined as an act of selecting or making a decision when faced with two or more possibilities. America gave us the choice to take the vaccine or not take the vaccine. As time moves on, that choice is gradually being stripped from us.

The REAL Pandemic: Diabetes Accelerated During “Pandemic”

Diabetes deaths surged during the COVID-19 pandemic, rising 17% in 2020, according to a report on Mercola.com. “Even diabetics who didn't get COVID-19 suffered, often falling victim to isolation, social distancing, lack of medical care and fear.”

Diabetes disproportionately affects Blacks, who are twice as likely as whites to die from the diet-induced disease and 2.3 times more likely to be hospitalized for limb amputations. “Inactivity and poor diet are fueling the diabetes crisis, causing people to develop the condition at younger ages. Diets focused on ultraprocessed foods and fast foods are the root of the problem,” reports Dr. Joseph Mercola.

During the plague of fear and forced vaccinations many diabetics were forced to delay medical care. Among 8- to 20-year-olds, diabetes diagnoses tripled in 2020 at Children's National Hospital in Washington, D.C.; school closures and reduced physical activity triggered by the pandemic were likely factors in the sudden rise.

While COVID-19 was a problem—40% of COVID-19 deaths occurred among people with diabetes—even diabetics who didn't get COVID-19 suffered: Younger people have been disproportionately affected, with diabetes deaths among 25- to 44-year-olds, jumping 29% in 2020.

Diabetes treatment costs top \$230 billion a year in the U.S., yet the diabetes mortality rate is 42% higher than it is in 10 other industrialized countries.

“The enemies of Allah (God) are working to reduce the population of the Planet Earth by means of poisoning the human beings and by setting up birth control laws under very wicked devices in order to rid the earth of people according to their idea of controlling the increase of the races and nations of the earth. This is a wicked thing.”

—The Most Honorable Elijah Muhammad
