

# Former Pfizer Chief Scientist: Mass Depopulation A Logical Outcome of Global Vaccination Campaign

by Ava Muhammad | Student National Spokesperson for the Honorable Minister Louis Farrakhan | @dravamuhammad

*“And now I am speaking for Black America, for Hispanic America, for the Native Americans and for those who are desirous of life. They are making money now, plotting to give 7.5 billion people a vaccination: Dr. Anthony Fauci, Bill and Melinda Gates, you want to depopulate the Earth?”*

*“What the hell gives you that right? Who are you to sit down with your billions and talk about who can live and who should die? That is why your world is coming to an end quickly—because you have sentenced billions to death. But God is now sentencing you to the death that you are sentencing to others. ...”*

—**The Honorable Minister Louis Farrakhan**

*“The Criterion,” July 4, 2020*

When Minister Farrakhan spoke those words, it was a Mercy to humanity: the Pfizer and Moderna mRNA gene therapy had not been deployed to the mass population. Sadly, millions of people failed, refused or were prevented from hearing

Dr. Michael Yeadon is a biochemist and former vice-president and chief scientist. Photo Youtube screenshot

and accepting this Truth and have been receiving injections since December, 2020.

The good news is that millions of people have thus far resisted the aggressive efforts by the U.S. government and media giants to push these dangerous, experimental, so-called vaccines. To those who resist, we offer continuing support with testimony from a former high-ranking executive of Pfizer, bearing witness to what Minister Farrakhan gave us directly from Allah (God) nearly a year ago.

Dr. Michael Yeadon is a biochemist and former vice-president and chief scientist for Allergy and Respiratory at the phar-

maceutical giant. He spent 32 years in the industry, leading research in new medicines. On April 7, he gave an interview to *LifeSite News* (now banned on YouTube). He described himself as someone, prior to the pandemic, who worked for a big drug company, listened to the big media broadcasts and read the main newspapers. He left Pfizer ten years ago, started his own biotech company and sold it in 2017. He told the reporter:

*“But in the last year I have realized that my government and its advisers are lying in the face of the British people about everything to do with this coronavirus. Absolutely everything. It’s a fallacy; this idea of asymptomatic transmission—you don’t have symptoms but you are a source of the virus ... that variants are scary things and we need to close international borders in case some of these nasty foreign variants get in.*

*“It’s become absolutely clear to me, even when I talk to intelligent people, friends, acquaintances... when I say ‘your government is lying to you in a way that could lead to your death and that of your children’...*

*they can’t begin to engage with it. I think maybe 10 percent of them understand and 90 percent blank their understanding of it because it is too difficult. My concern is that we are going to lose this because people will not deal with the possibility that anyone is so evil.”*

Dr. Yeadon expressed his deep concern over “unknown and unnecessary gene sequences injected into the arms of potentially billions of people for no reason. I’m very worried that pathway will be used for **mass depopulation**, because I cannot think of any benign explanation.”

He charges governments around the world with spreading false propaganda in response to COVID-19, including so-called dangerous “variants” we see all over the news. He advances the position that “variants” are no different from the virus in terms of immunity. He said, of the “booster” shots being touted, “Don’t go near any of them.” The pharma-

## Will you let your children be guinea pigs?

NEWS ANALYSIS

America cannot get enough adults to take the experimental Covid-19 vaccine, so now she’s planning to vaccinate children.

That would mean slaughter, because the vaccine is death itself, warned the Honorable Minister Louis Farrakhan of the Nation of Islam.

“When I look at these documentaries about animal life, the beauty of every creature trying to protect its young, and I look at every mam-

mal, every mother, protecting her offspring from the natural enemy that will take advantage of it in its growing up, its weakest. Satan is like that too,” said Minister Farrakhan, during his remarks concluding the “Covid-19: The Virus and the Vaccine” plenary session held during the Nation of Islam’s annual Saviours’ Day convention in February.

“He wants to put needles in our babies. Tell him: Not today,” stated Min. Farrakhan.

“You say, ‘but there are certain vaccines that are necessary.’ Yes. There are. But we don’t trust you. I think we should pool our resources and get what is necessary for our people, and for others, because we cannot

let you use your smile and your smooth words as you’re sticking our children with needles that contain death for them,” Min. Farrakhan continued.

The Food and Drug Administration’s (FDA) emergency use approval of Pfizer’s vaccine for children 12-15 was expected to be announced at Final Call press time. Requests for approval will be made in September for 2- to 5-year-olds and those ages 5-11, according to Pfizer Chairman and CEO Albert Bourla in remarks to shareholders on May 4.

Will parents allow their babies to be guinea pigs?

Nearly a quarter of parents say they definitely will not get their child vaccinated,

and one quarter of the parents say they will wait a while to see how the vaccine is working, according to the KFF Covid-19 Vaccine Monitor, which surveyed 2,097 adults over 18 between April 15-29.

“People are starting to wake up. The massive awakening is taking place, and they never intended for

ceutical companies are manufacturing billions of vials of product that will be available at the end of this year. They will breeze right through the FDA in the United States and the EMA in Europe. Why? It is because they are so much like the current product that no clinical safety studies will be required.

Like Minister Farrakhan, Dr. Yeadon emphasizes the power of a healthy immune system to successfully fight the virus, negating the need for a dangerous vaccine. He explains, “The human immune system is a thing of wonder ... when it faces a new pathogen like this you have professional antigen-presenting cells. They

grab foreign things in the environment and tear them limb from limb inside the cell. They cut them up into hundreds of pieces. They present these pieces on the surfaces of their cells to other bits of your immune system. Amazingly, because of the variability that God and nature gave you, your body uses 15-20 motifs that it spots about this virus. Epitopes ... photographs of the details

about this virus ... if you are reinfected by a variant, your professional cells tear into that virus, cut it to pieces and present them again. Most of what you have already seen are still there in the variants.

“There is absolutely no chance that all of them will fail to be recognized, and that is required for the virus to escape your immunity. It is 99.7 percent similar. I have chatted

this over with several professors of immunology and they agreed with me.”

In reference to the global reach of the vaccination campaign, he said, “The eugenicists have got hold of the levers of power and this

is a really artful way of getting you to line up and receive some unspecified thing that will damage you ... it won't be a vaccine because you don't need one. And it won't kill you on the end of the needle because you would spot that. It could be something that will produce normal pathology. It will be at various times between vaccination and the event (death); it will be plausibly deniable because there will be something else going on in the world at that time, in the context of which your demise or that of your children will look normal. That is what I would do if I wanted to get rid of 90-95 percent of the world's population. And I think that is what they are doing ... now they are using molecular biology.”

Dr. Yeadon, like anyone who exposes the danger of the COVID-19 vaccines, has

been censored by the media giants. He bears witness to what the Honorable Minister Louis Farrakhan has relentlessly warned us about the unthinkable plans of the Enemy. It is this final observation from the biochemist that is most significant:

“I am a scientist and I can tell you, talking to non-scientists, using science as a tool, will not work. It will fail ... we need philosophers, people who understand logic, religion... they have got to wrestle with this and start talking in a language people will understand. I have latest taken to signing off with ‘May God save us’, because I think we need God now more than at any time since WWII.”

there to be a certain level of immunity and then they would cease the vaccine program,” stated Rizza Islam, independent researcher and activist.

“That was never the agenda. The agenda was to create and manipulate a virus, then create the panic, then push the virus onto the people to get rid of the people by making the people believe that it was for their betterment rather than their detriment,” Mr. Islam told The Final Call.

It is critical for parents who do not want their children to be vaccinated to unite with parents of like minds and promote their position, the same way the experimental vaccines are being promoted, he said.

“It has to be made popular; the same way celebrities are making the taking of this experimental shot popular. The opposition has to be just as strong if not stronger than the assault. It has to be broadly known that we do not consent. We do not agree,” said Mr. Islam.

If calculated and if enough parents simply stand up and step up, those who feel the same way will pour out across the country to form a movement, he predicted.

It worked historically throughout Europe regarding earlier vaccine mandates, he noted.

“When (Europeans) disagreed with the laws, they simply took to the streets in a united fashion. And they literally stood against the law because it was an unjust law. And the government literally overturned it because the people, with God backing them, stood against it. It has to happen the same way here in America. If we want there to be an America,” stated Mr. Islam.

BBC News reported, “In the late 19th Century, tens of thousands of people took to the streets in opposition to compulsory smallpox vaccinations. There were arrests, fines and people were even sent to jail.”

The Leicester Anti-Vaccination League was founded in 1869 and a mass protest was held in 1885. The Vaccination Act introduced a “conscientious objection” clause in 1898, meaning those opposed to vaccinations could decline the shot because of moral, religious or ethical concerns.

Unlike today in Washington, D.C., where the City Council overwhelmingly passed a law last November allowing children to be vaccinated without parental consent.

The Orange County Board of Education in Irvine, Calif., voted four to one May 4 against mandatory vaccinations for children, according to a CBS LA news report.

The school board adopted a statement

denouncing any effort to curtail parents’ authority after hundreds of parents spoke out at the two recent board meetings, CBS reported.

Irvine is a more White, affluent city. D.C.’s public school system is overwhelmingly Black and Latino and Blacks suffer disproportionately from poverty in the nation’s capital.

“If you want to coerce (people), now you fall under the description of a terrorist under the United States Code of Title 18, subsection five, where you’re using force to get someone to do what it is that you want them to do, and that is illegal,” argued Mr. Islam.

“It is a violation of the Nuremberg Code, when it comes to medicine. It is a violation of the Universal Declaration of Human Rights. It is a violation of students’ rights. It’s a violation of civil liberties, so they are treading on very thin waters,” he said.

He said critical next steps for every parent are to study the Vaccine Adverse Events Reporting System, which allows self-reporting of injuries and side effects, study the Nuremberg Code mandating people be given informed consent, and require it of any medical, educational, legal, or other professional telling them to take the shot.

“Say it just like that: ‘Give me the informed consent,’ which means that they must give you all the benefits from taking the shots, all of the detriments from

taking this shot. They have to give you the naturopathic option. They have to give you the herbalist option. They have to give you the nutritionist option, and they have to literally give you all of the ingredients ... give you all the information so that you can make a fully informed decision. That is what informed consent is,” he explained.

The mRNA technology used in the Operation Warp Speed vaccines is an operating system that may be recoded or updated like computer software, according to Moderna, Inc.

“During this time, the level of propaganda is being pushed, and those who were injected, it is now incubating in the body, it is evolving and mutating in the body, and the ability for it to infect other people, through those who have taken the shot is becoming very high,” said Mr. Islam.

“We have to stand up and understand that it does exist and we have to step out on faith. This is the final stand. So there is no other option after this, we have to either step up and make the declaration now that we are not going to stand for this, or we will simply fall into the abyss of hell with all of those who have agreed with Satan,” he said.
