## Vicious Media Attack on Overwhelmingly Successful COVID-19 Treatment Is Pure Desperation

Nation of Islam Research Group

*“They want to kill an entire people because we are the next inheritors of rulership over the planet. He, the enemy, already knows this. He knows our future but he doesn’t intend for us to see that future. He’s upset because we are rising.”*

*—The Honorable Minister Louis Farrakhan, December 12, 2020*

The Honorable Minister  
Louis Farrakhan

The genocidal plot to rid the world of 3 billion humans via vaccines has been dealt a near-fatal blow. The safe and effective drug Ivermectin has been in common use *in human beings* for decades. It is so valuable to humanity that its discoverers won a Nobel Prize in Medicine. Here in the United States, a group of brilliant doctors seeking a remedy for COVID-19 found that Ivermectin had a near miraculous effect on COVID-19 patients.

Just as doctors withheld Penicillin, the cure for syphilis, from those poor, Black Tuskegee victims, the corporate-controlled media, Dr. Fauci, Bill Gates and other genocidal demons depend on the people’s ignorance of treatments and cures for COVID-19 in order to hoax them into voluntarily taking a Pfizer/Moderna/J&J “vaccine,” now known to us as the ‘KMS’ shot—Kill, Maim, & Sterilize. So, they attempted to suppress knowledge of Ivermectin. Instead, the news of Ivermectin’s dramatic impact on hospitalization and death rates in countries like India and Mexico; its history of safety and effectiveness; the mountain of scientific studies that back it; has spread worldwide and demand for the prescription has skyrocketed.

The now desperate Food & Drug Administration (FDA) led by Dr. **Janet Woodcock** even resorted to a form of blackface minstrelsy—the kind of racist insult that used to draw a rebuke from the NAACP—to try to slow the growing popularity of the drug and mass rejection of the killer KMS “vaccine.” In a strange and condescending Tweet, obviously intended to scold the plantation slaves, the FDA’s top doctor wrote: *“You are not a horse. You are not a cow. Seriously, y’all. Stop it.”*

She was referring to Ivermectin’s use in veterinary medicine to stem parasitic infections in animals. It was a desperate ploy to make people think that using Ivermectin for COVID-19 is akin to humans eating Alpo or Purina Dog Chow. But this has backfired. Well-known drugs like penicillin, tetracycline, aspirin, and even opioids are also used to treat animals.

Further, the FDA, Fauci, Media, et al., have tried to conceal a near miraculous decline in cases and deaths in India earlier this year, following a sharp spike attributed to the Delta variant, which originated there. The decline was immediately after that nation of 1 billion people introduced Ivermectin and Hydroxychloroquine to protect and treat its citizens for COVID-19. On July 30, 2021, the New York Times reported that the sharp plunge in COVID-19 cases was a “mystery with no clear explanation.” Wrong. The explanation is quite clear! The “sudden” drop took place within weeks of a new protocol which included Ivermectin for early treatment of the virus.

Woodcock’s vicious and ignorant attack on Ivermectin only highlights her own history of bad—very bad—medical advice.

### Dr. Janet Woodcock: Opioid Queen

The opioid scourge is said to have killed 500,000 from 1999 to 2017. In 2020, deaths from opioids alone amounted to 69,710, that is 191 a day, just in the USA.

This same Dr. Janet Woodcock appeared to be protecting the opioid manufacturers, and many in the field of public health opposed her appointment to the FDA in 2021. According to a Guardian article:

Groups fighting the US opioid epidemic have called on Joe Biden to appoint a new head of the Food and Drug Administration (FDA) after describing the acting

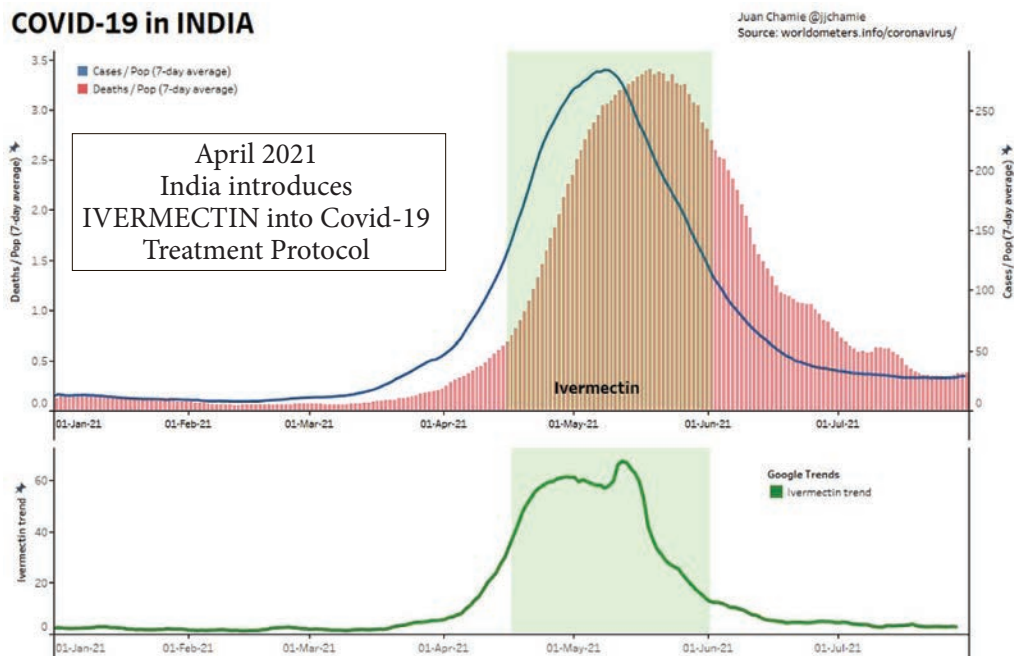

Janet Woodcock Photo: FDA.gov

commissioner as unfit for the post because of her part in the mass prescribing of painkillers that have caused hundreds of thousands of deaths.

28 groups accused Woodcock of presiding over “one of the worst regulatory agency failures in US history” as head of the FDA department responsible for approving new prescription opioids. They charged Woodcock with “dereliction of duty” and “willful blindness” in putting the interests of opioid manufacturers ahead of public health, often overruling the FDA’s own scientific advisors and ignoring the pleas of public health groups. The Guardian reports that the

pharmaceutical industry “enthusiastically supports Dr. Woodcock’s candidacy for FDA Commissioner.”

This is the person who now tells us to avoid Ivermectin?! With an opioid death count of 500,000 mostly white people, what is Woodcock’s and Biden’s “vaccine” plan for Blacks?! Seriously, y’all.

## Science Backs Ivermectin

The fact is that the demand for Ivermectin and rejection of KMS “vaccines” is based on the growing medical intelligence of the American people, most of whom gained knowledge of the drug’s potential in a viral video of the Dec. 8, 2020, Senate testimony of Dr. Pierre Kory, which we excerpt below. Senate Democrats, including the now vice president Kamala Harris, boycotted the hearing in which the world actually heard evidence of a potential cure for COVID-19. To date there are now over 40 medical trials using Ivermectin in fighting COVID-19.

## Transcript

“I want to start out by saying that I’m not speaking as an individual, I’m speaking on behalf of the organization that I am a part of. We are a group of some of the most highly published physicians in the world. We have near 2,000 peer-reviewed publications among us, led by Prof. Paul Merrick,

U.S. FDA @US\_FDA · Aug 21

You are not a horse. You are not a cow. Seriously, y’all. Stop it.

**Why You Should Not Use Ivermectin to Treat or Prevent COVID-19**  
Using the Drug ivermectin to treat COVID-19 can be dangerous and even lethal. The FDA has not approved the drug for that purpose.  
fda.gov

FDA ad discouraging the use of Ivermectin.

our intellectual leader, we came together early on in the pandemic and all we have sought is to review the world’s literature on every facet of this disease, trying to develop effective protocols....We have done nothing but try to figure out how to identify a repurposed and available drug to treat this illness.

We have now come to the conclusion, after nine months, and I have to point out, I am severely troubled by the fact that the NIH, the FDA and the CDC, I do not know of any task force that was assigned or compiled to review repurposed drugs in an attempt to treat this disease. Everything has been about novel and/or expensive pharmaceutically engineered drugs, things like Remdesivir and antibodies in vaccines. ...

And I’m here to tell you...that we have a solution to this crisis. There is a drug that is proving to be of miraculous impact. When I say miracle, I do not use that term lightly and I don’t want to be sensationalized. That’s a scientific recommendation based on mountains of data that’s emerged in the last three months. ...

Mountains of data have emerged from... many centers and countries around the world, showing the miraculous effectiveness of Ivermectin. It basically obliterates transmission of this virus. If you take it, you will not get sick.

I want to briefly summarize the data:

- We have evidence that it is effective, not only in prophylaxis, in the prevention, if you take it you will not get sick. We just came across a trial last night from Argentina, by the lead investigator of Ivermectin, and they prophylaxed 800 health care workers, not one got sick. In the 400 they didn’t prophylax, 58% got sick, 237 of those 400 got sick. If you take it, you will not get sick. It has immense and potent anti-viral activity.

- We have four large randomized control trials totaling over 1,500 patients, each trial showing that as a prophylaxis agent, it is immensely effective; you will be protected from getting ill if you take it.

- In early outpatient treatment, we have three randomized control trials and multiple observation as well as case series showing if you take it, the need for hospitalization, and death, will decrease.

- The most profound evidence we have is in the hospitalized patients. We have four randomized control trials there, multiple observation trials all showing the same thing: you will not die, or you will die at much, much, much lower rates, statistically significant, large magnitude results if you take Ivermectin.

It’s proving to be a wonder drug. It has already won the Nobel Prize in medicine in 2015 for impacts on global health in the eradication of parasitic diseases. It is proving to be an immensely powerful anti-viral and anti-inflammatory agent.

**“[A]nd that drug that will treat them and prevent the hospitalization is Ivermectin”**

Please recognize, peer review takes time. It takes months, we do not have months. We have 100,000 patients in the hospital right now dying. I’m a lung specialist. I’m an ICU (intensive care unit) specialist. I’ve cared for more dying COVID patients than anyone can imagine. They’re dying because they can’t breathe. They’re on high-oxygen delivery devices, non-invasive ventilators or sedated and paralyzed and attached to mechanical ventilators that breathe for them. And I watch them every day. They die. By the time they get to me in the ICU, they’re already dying, almost impossible to recover.

Early treatment is key. We need to offload the hospitals. We are tired. I can’t keep doing this. ...Any further deaths are going to be needless deaths, and I cannot be traumatized by that. I cannot keep caring for patients when I know that

they could have been saved with earlier treatment and that drug that will treat them and prevent the hospitalization is Ivermectin. This is—I am here today, I am calling to action, the NIH...

I want to be clear. I am not here as a politician, or the dramatist, or sensationalizing what I am recommending.... We have almost 30 studies, every one is reliably and reproducibly positive, showing the dramatic impacts of Ivermectin. Please, I am just asking that they review our

manuscript. It’s serious, and by serious highly experienced physicians and researchers. We have—I cannot call on more credibility than we have, we’re not just a random doctor who’s saying we have a cure. I don’t want to say I have a cure. I’m just asking, review our data. We have immense amounts of data to show that it must be implemented and implemented now.

Senator, the last thing I want to say is, you know who’s dying here? It’s our African-American and Latino and elderly. It’s some of the most disadvantaged and impoverished members of our society. They are dying at higher rates than anyone else. It’s the most—severe discrepancy I have seen in my medical career and we are responsible to protect those disadvantaged members. We have a special duty to provide countermeasures. The amount of evidence to show that Ivermectin is life-saving and protective is so immense and the drug is so safe, my colleagues have talked about it, it must be instituted and implemented. I am asking the NIH to review our data and come up with the recommendations for society. Thank you.

## IMPORTANT INFORMATION ON IVERMECTIN

—There was an overwhelming response to the July 20th article on Ivermectin, a safe, inexpensive medicine which has proven extremely effective in treating Covid-19. It can only be given by prescription. In response to numerous requests for information on how to obtain Ivermectin, we are providing the website which gives a nationwide list of physicians who will prescribe it. # EXPOSED! FDA and CDC Hiding Data On Severe Covid "Vaccine" Side Effects in Children Under 12

by **Sister Charlene Muhammad**  
National Correspondent  
[@sischarlene](https://twitter.com/sischarlene)

Over 40 children under 12 have died and over 4,200 more experienced a dangerous side effect known as Multi System Inflammatory Syndrome that has never existed before in children under 12 but surfaced in those injected with mRNA Covid "vaccines." The U.S. Food and Drug Administration (FDA) and the Centers for Disease Control (CDC) have been hiding this from the American public, according to Dr. Bryan Ardis. He is the CEO of ArdisLabs.com, known for treating acne and various health conditions with natural-ingredient-based products.

Multi System Inflammatory Syndrome in Children, abbreviated as MIS-C, is a brand-new disease. It was unknown before 2020 and is the only disease created and given a diagnostic code since 2020, stated Dr. Ardis. Healthcare systems use diagnostic codes to describe and classify diseases, illnesses and injuries.

Dr. Ardis discussed this bombshell during an August 1 presentation with a panel of doctors in Germany. He explained that MIS-C is now classified as a known side effect because the mRNA "vaccine," the spike proteins it tells the body to produce and anything else that might be in those shots have led to a debilitating, horrible inflammatory reaction in multiple organs all at once, when injected in children.

Stanford University in California has already prepped for a study to allow vaccinations of children as young as babies and toddlers, six months and two-years-old, he noted.

The syndrome isn't contracted solely through the Covid "vaccines," it can also be contracted from vaccinated persons through "shedding"—when components of the vaccine are released from the vaccinated person into the body of others or the environment.

This further confirms the science that those who are vaccinated can pose a serious health threat to those who are not.

"There are toddlers, two-year-olds, who are already menstruating blood clots, a few hours within their parents being vaccinated," stated Dr. Ardis. "This is already being reported in two-year-olds, four-year-olds, six-year-old daughters and girls. This is the attempt of those female bodies to remove the toxic effects they're being exposed to by their vaccinated parents, or whoever they're around," stated Dr. Ardis.

It was already known that SARS CoV-2 has very little threat to children or pregnant women, and that in rare cases the spike proteins of the coronavirus could create Multi Inflammatory Syndrome in Children. And now, it's actually listed as a known side effect of the "vaccine," he emphasized. "The FDA knew it."

Multi Inflammatory Syndrome in Children, as defined by the Mayo Clinic of Academic Medical Researchers, is a severe inflammation of multiple organs in the body, including the brain, the kidneys, the spleen, the gastrointestinal tract, the eyes, the skin. But as deadly as it is, Dr. Ardis pointed out that he hasn't seen a single incident reported on the Vaccine Adverse Event Reporting System

Photo: Bigstock

(VAERS), which tracks vaccine safety and efficacy. However, the CDC has already reported over 4,200 occurrences and 40 deaths of children reported to the agency.

"And this is what you want to push on all the masses of children, and Americans across the world, to allow them to go to school? I find this just atrocious, and disgusting, and everyone needs to know," stated Dr. Ardis. "...I couldn't stand the fact that the FDA had an internal discussion and a meeting in October 2020," said Dr. Ardis. During that meeting by the Center for Biologics Experiments and Research, top FDA officials were informed, in a 25-slide presentation, of the side effects and serious adverse events they *knew* would happen once the shots began to roll out. That was two months before distribution began in December. Slide 16, he observed, was passed over quickly, however the actual entire presentation remained on the FDA's website.

He immediately took a copy of the presentation to media to sound the alarm that the FDA was already aware that the Covid "vaccines" would cause over 110 diseases.

This is not the only things that were on the document, there were also five different blood clotting disorders the FDA knew in October would happen when the Covid shots started to be administered to all Americans.

"These have now come, May and June of this year, we're talking five to six months later that the shots came out, now you're seeing they're putting a blackbox warning on the label for Johnson and Johnson for blood clots - Myocarditis? The FDA already knew this in October, two months before the shots ever came out," Dr. Ardis stated.

"I've got five kids and I would never want any possible serious side effects that are permanent and lifelong to ever occur to my child, and no one should ever push something so experimental, ever, on any human being ever. It's by far crimes against all humanity, but my goal is to try to preserve as much as possible the health of child[ren], period."

"Now what are you hearing reported in all the teenagers that are now being given the shots?! You're hearing hundreds and thousands of reports of myocarditis, and some of these athletes and teenagers are dying in high schools, high school ages, but the FDA already knew this!"

He found it incredible that the FDA recently announced it literally wants Pfizer to expand how many children they will put in their clinical trial.

"Why would you want to give them— any more children— a shot that's already causing myocarditis, whether it's in a trial of any kind, or to the masses? Why would you encourage any more children, or risk their life or health over an experimental shot? It makes no sense to me. I find it deplorable," stated Dr. Ardis.

Since then, he's been on a non-stop mission to sound the alarm about the coming dangers through these so-called vaccines. In October, before the shots ever came out, he stated, he immediately went into the media to let everybody know, these are the things the FDA know is coming.

Not only are those who control the FDA and CDC responsible for concealing this from the masses in America, so are the media entities that Dr. Ardis said he informed, but have refused to report this crucial, life-threatening data.

Multiple lawsuits have been filed in federal court in Northern Alabama to stop the Emergency Use Authorization primarily around the vaccines, exaggerated cases and deaths, according to Dr. Ardis. Medical doctors, legal professionals and child advocates, who filed the lawsuits targeted Alabama's District Court did because if their cases are heard there, that will have an impact and spread throughout all 50 states nationwide.

"All of this is very disturbing and we've got a group of lawyers at the America's Frontline Doctors. We also have lawyers that are with myfreedoctor.com, who are all together working to defend as many people as possible against the onslaught of really senseless murder, to me, in my mind," he concluded.
