

Top Doctor Alleges: ‘A psychopathic entity is influencing health policy’

Graphic: MGN Online

“As I live, my desire is to destroy the so-called medical profession, because it is not a profession of healing; it is a profession of drugs.” —The Most Honorable Elijah Muhammad

by Tingba Muhammad

The world depopulation agenda has been dealt a serious blow with the recent revelations of the noted British cardiologist Dr. Aseem Malhotra, a twice “vaccinated” jab proponent who is now demanding a worldwide halt to the COVID-19 vaccine program. “There is a strong scientific, ethical and moral case to be made that the current COVID vaccine administration must stop until all the raw data has been subjected to fully independent scrutiny. Looking to the future the medical and public health professions must recognize these failings and eschew the tainted dollar of the medical-industrial complex. It will take a lot of time and effort to rebuild trust in these institutions, but the health—of both humanity and the medical profession—depends on it,” he said.

Dr. Aseem Malhotra Photo: Twitter

Dr. Malhotra is no minor figure in the European medical establishment. He is the author of several books and is often seen on television as an expert on medical issues. He is as known to Brits as Dr. Mehmet Oz or Dr. Sanjay Gupta is to Americans. In an explosive 2-part scientific paper published in the *Journal of Insulin Resistance*, the formerly pro-vax Dr. Malhotra outlines the

dangers of the COVID “vaccine” and exposes the rot in the medical profession that has brought about such harms.

He also recognizes an unprecedented conspiracy of medical and media institutions to censor accurate information that may cut into vaccine profits: “This sort of discussion is not getting to the mainstream news, partly because of the invisible, unchecked power of the big corporations, in my view. The truth is so powerful, that if that gets out of course it’s going to cause conflict and it’s going to threaten industry interests,” said Dr. Malhotra.

Dr. Malhotra’s Change of Heart

Though he was a public cheerleader for the “vaccines,” Dr. Malhotra began to suspect that they were the source of an alarming rise in illnesses and deaths that coincided with their

President Joe Biden Photo: MGN Online

worldwide roll-out. But Pfizer and the federal government agencies that are supposed to monitor the pharmaceutical industry conspired to keep their COVID vaccine trial data hidden from the public—for 75 years! So Dr. Malhotra sent an open letter to the then-Prime Minister Boris Johnson and President Joe Biden, calling for the immediate release of that data. Of course, those queries went unanswered, as both leaders continued to browbeat their own citizens into taking the useless and dangerous injections.

Top Doctor

Continued from page 8

Dr. Joseph Mercola explains what they were hiding: “Pfizer hid serious injuries, falsely categorizing almost all of them as unrelated to the shot without investigation, and misrepresented data showing massive risks as being of no concern. Participants who suffered serious injuries were often simply withdrawn from the trial, and their data excluded from the results.”

Dr. Joseph Mercola

Dr. Malhotra was also suffering a personal tragedy that caused him to go from “vaccine” promoter to “vaccine” repudiator. His father was the renowned cardiologist Dr. Kailand Chand, a former deputy chair of the British Medical Association who received high honors from Queen Elizabeth for his service in the medical field. Dr. Chand took the jab, which appeared to have triggered a decline in his health and ultimately led to his death of a heart attack in July 2021 at the age of 73. The results of Dr. Chand’s autopsy convinced his son that only the “vaccine” could have caused the amount of blockage in the arteries he was seeing. As a cardiologist Malhotra knew his father’s medical history and healthy lifestyle habits. “My father, who had been a keen sportsman all his life, was fitter than the overwhelming majority of men his age,” Malhotra wrote.

This untimely and unexplained tragedy caused Dr. Malhotra to reevaluate his previous stance on the efficacy of the COVID vaccines. He started crunching the available data that had been forced into public by court order, and he found that the chances that one might suffer a heart-related emergency rose dramatically *after* vaccination. The CDC’s own Vaccine Adverse Event Reporting System (VAERS) that is designed to monitor problems caused by vaccines now registers nearly 1.5 million reports of adverse reactions, including more than 31,000 deaths and thousands of heart-related ailments (openvaers.com/covid-data).

Dr. Malhotra also points out that such a deadly outcome would have immediately ended any other vaccine program, but health authorities were apparently more interested in concealing than solving this growing medical crisis. Health

authorities like Dr. Anthony Fauci, the CDC’s Rochelle Walensky, and surgeon general Vivek Murthy continued to assert that any medical malady that may occur after vaccination was the result of the “COVID-19 virus,” and they seemed oblivious to the emerging studies showing not just “vaccine” failure but actual “vaccine” DANGER:

- An August 2021 study from 40 U.S. hospitals, published in the *Journal of the American Medical Association*, showed that the incidence of myocarditis (swelling of the heart) skyrocketed from the spring of 2021 when vaccines were rolled out. Myocarditis is particularly worrisome because doctors say the damage to the heart muscle can be severe and permanent.

- A study from Scandinavia evaluating 23.1 million people found elevated rates of myocarditis in young males who had two doses of the mRNA “vaccine.”

- A March 2022 study from Israel that evaluated more than 787,000 people found elevated levels of heart inflammation in the jabbed. It was a finding so disconcerting that investigators warned that the “vaccine”-pushing Israeli officials could expect legal action against them.

- Data from Hong Kong show that the rate of myocarditis in male children was 1 in 2,700.

- The British Yellow Card system shows 1 in 120 people who have received at least one mRNA injection suffer an adverse event “that is beyond mild.”

- In Norway, the rate of serious adverse events post-jab is 1 in 1,000 after two doses of Pfizer.

- It is now reported that the leading cause of death in the United States during the “pandemic” was NOT COVID-19—it was heart disease.

The fact is, Dr. Malhotra says, Pfizer’s vaccine math just doesn’t add up. He calculates that for people over 80 years old, 230 need to be vaccinated to prevent a single death; in the 70s age group, 520 need to be vaccinated to prevent a single death; 2,600 for people in their 50s, 10,000 for those in their 40s, and 93,000 for those between 18 and 29 years. And those figures apply to the more virulent Delta strain. “For omicron, which has been shown to be 30% – 50% less lethal, ... significantly more people would need

to be vaccinated to prevent one death.” He calculated that the chances that the Pfizer “vaccine” would protect a 44-year-old from death is just 1 per 357,000.

The ‘95 percent’ Effective” Lie

Originally, the pharmaceutical companies made very bold claims that the “vaccines” had achieved 95 percent effectiveness. Most doctors and the general public interpreted the statement to mean if 100 people are vaccinated, then 95 percent of those people would be protected from getting the infection. But Dr. Malhotra points out that this interpretation is grossly inaccurate and deliberately misleading. “In absolute terms, they [the vaccinations] provided 0.84 percent protection, which means only one in 119 people would be protected from infection,” he said. Obviously, those abysmal rates rendered the “vaccines” a complete failure, but the damning data were concealed in the concerted effort to manipulate the public into taking a “vaccine” that has no medical value, but which is now the suspected cause of at least 31,214 deaths and over a million injuries.

Based on these astounding realities, Dr. Malhotra writes, the COVID policies of world governments can no longer claim to be beneficial to the public health. They are the product of diabolically criminal minds and have nothing to do with health:

“It is this very industry that has been found guilty of the most egregious corporate crimes: between 2003 and 2016 the top 11 pharmaceutical companies paid \$28.8 billion in fines just within the United States (US), much of it for criminal activity such as the illegal marketing of drugs, manipulation of results and hiding data on harms.”

One particularly egregious example is Purdue Pharma, owned by the Sackler family, whose product OxyContin is largely responsible for the scourge of opioids now accounting for two-thirds of the world’s drug overdose deaths. Dr. Malhotra accounts for the extraordinary deception of health officials and media collusion around the “COVID vaccines,” asserting that “We have a psychopathic entity influencing health policy and that needs to stop. It needs to stop now. ... A pause and reappraisal of vaccination policies for COVID-19 is long overdue.”

DePopulation Briefs

"Before the vaccine was made, I warned us in the Name of Allah that this was a death plot....The way to get rid of two to three billion people [is] to offer you a vaccine."

—The Honorable Minister Louis Farrakhan, *Swan Song*

Canada Uses Suicide to DePopulate

How do the DEPOPULATORS take advantage of the fear, anxiety, loneliness, and depression their COVID media onslaught foisted on the public? SUICIDE! The rising number of deaths in Justin Trudeau's Canada by doctor-assisted suicide has "quickly become normalised," *The Lancet* has reported.

Canada legalized doctor-assisted suicide in 2016, but it was required that the person seeking the "service" be terminally ill with an incurable illness with their death in the foreseeable future. That changed in 2021 under Canada's depopulation overdrive now in effect: the "imminent death" requirement was removed!

Canadian leaders now see dollar signs in death. According to a report by Jeffrey Jaxen of *TheHighWire.com* (Episode 287), they calculated that doctor-assisted suicide could actually be profitable. They estimate that \$62 million could be saved if suicide—for any reason—became a government-approved option.

In 2021, the number of Canadians who were killed by euthanasia and assisted suicide rose by 34 percent to 10,064, which is 3.3% of all deaths in Canada. This scheduled self-murder has led to some disturbing personal stories. A poor Canadian woman despairing that she could not find affordable housing opted for suicide. Another was losing financial aid for pain medication and therapy, and chose a prescription the government would pay for—Trudeau's Killer Kanadian Kool Aid.

Canada is now poised to make suicide more deadly than the COVID "vaccine" and will extend it to those deemed to have mental illnesses that could include such conditions as loneliness, isolation, "loss of quality of life"; even poverty would be an approved reason to choose death. One expert commented that in Canada "It's becoming easier to get death than treatment." And now they are considering making self-murder available to children they refer to as "mature minors."

Of course, this all signals the covert return of EUGENICS as government policy—the culling of the unwanted and "genetically inferior" sort. In America, under the guise of the COVID "medical emergency," many people entering E.R.s were "diagnosed" as "COVID-19 positive" and then isolated from family, friends, and even from their own doctors. Their "medical care" was dictated by non-medical hospital administrators, which often—especially with Black patients—led to death, even though there were several readily available treatments proven safe and effective that could have saved them. And though euthanasia is not legal in most of the U.S., the "emergency" COVID policies may have brought suicide back under a different name.

"This vaccine campaign—it will go down as the biggest scandal in medical history. And moreover, it will be known as the biggest crime ever committed on humanity."

—Member of European Parliament
Christine Anderson

FDA Refuses to Release Autopsy Results on People Who Died After COVID Vaccinations

The Children's Health Defense (CHD) reports that the U.S. Food and Drug Administration (FDA) is refusing to release the results of autopsies conducted on people who died after getting COVID-19 vaccines, claiming that such a release would amount to "unwarranted invasion of personal privacy." But drug safety advocate Kim Witczak said that the reports could be released with personal information blacked out, the CHD reported. "Autopsies can be an important part of postmortem analysis and should be done especially with increased deaths following COVID-19 vaccination," Witczak said.

The CDC was forced to collect data on vaccine dangers in a system they call the Vaccine Adverse Effects Reporting System (VAERS), and in which there are 31,214 reports of death following COVID-19 vaccinations.

Accurate Death Counts & Causes Are Elusive

Autopsies can provide necessary confirmation of how a person died. And this data could correct the many flaws in the way COVID fatalities were calculated since the beginning of the plandemic. Whether or not a victim died FROM COVID or WITH COVID has confused the body count from the very beginning. It is now clear that there are substantial financial incentives for hospitals to claim a death—any death—as "COVID-related," amounting to a per-patient reimbursement of hundreds of thousands of dollars.

Dr. Carl Heneghan, an epidemiologist and director at the University of Oxford's Centre for Evidence-Based Medicine, has revealed that the death counts regarding COVID are not accurate and that "We should take a sample of deaths that had 'COVID' written on the certificate and try to validate the accuracy." He concludes that the medical world should return to science-based policies: "We are unable to separate the effects on deaths of SARS-CoV-2 from those of human interventions. A coherent process based on consistent definitions across the devolved nations is required. Furthermore, to enhance the accuracy of causation in pandemics a subset of deaths should be verified using autopsies with full medical documentation."

Dr. Carl Heneghan

Anthony Fauci's Net Worth Soared to \$12.6 Million During Plandemic

"I recommended to the president that we shut the country down. That was a very difficult decision, because I knew it would have serious economic consequences, which it did."

—Dr. Anthony Fauci

Auditors from the government watchdog group OpenTheBooks.com revealed that Dr. Anthony Fauci's "shut the country down" policies had "serious economic consequences" for him: his net worth jumped to \$12.6 million between 2019 through 2021—an increase of \$5 million.

Fauci was appointed by Pres. Donald Trump in 2020 to lead the destruction of America through a botched set of policies that have now killed millions of people and economies worldwide. Even before the plandemic shut downs Fauci was the highest paid federal employee, making an annual salary of \$480,000 (higher than that of the president) but he had refused to divulge where his additional income was derived.

But after four federal lawsuits by OpenTheBooks.com some of Fauci's finances were forced into public view. Strangely, the Dan David Foundation, based in Israel, doubled Fauci's salary in 2021 with an "award" of \$901,400 for "speaking truth to power" and "defending science" during the Trump administration.

Black public finances are easier to see. Whilst Fauci got rich, Blacks suffered financial loss on an unprecedented scale. The NATIONAL BUREAU OF ECONOMIC RESEARCH wrote that under the Fauci regime the number of active business owners in the United States "dropped by 15 percent." Further, and more alarming: "The number of African-American business owners plummeted from 1.1 million in February 2020 to 640,000 in April. The drop of 440,000 black business owners actively working in their businesses, representing 41 percent of the previous level, is disconcerting."

Israel's History of Medical Racism & Savagery

Ethiopian Jewish women who immigrated to Israel were injected with the contraceptive drug Depo-Provera, but they were told they were receiving a vaccine to prevent disease. The drug sterilized thousands of Black women and cut the Ethiopian birthrate in half.

Prime Minister Benjamin Netanyahu warned white Jews about Africans in 2012: "If we don't stop their entry, the problem that currently stands at 60,000 could grow to 600,000..."

The COVID-19 VACCINES: "We Have No RIGHT to Trust Them."

2

“Dr. Anthony Fauci, Bill and Melinda Gates, you want to depopulate the Earth? What the hell gives you that right? Who are you to sit down with your billions and talk about who can live and who should die?”

—**The Honorable Minister Louis Farrakhan, *The Criterion***

Learning Deficit Due to Shutdowns Has Been a Global Disaster

Mercola.com provides a shocking report about the damage caused by the **disastrous lock-down policies** of government officials:

Children around the world are struggling to read and facing significant educational setbacks due to COVID-19-related school closures—which did little to influence COVID-19 mortality.

Prior to the “pandemic,” 57% of 10-year-olds in low- and middle-income countries could not read properly, but this has increased to an estimated 70%. In Latin America, 10-year-olds unable to read rose from 50% to 80% following school lockdowns. The effects could be lifelong, leading to \$21 trillion lost due to lower lifetime earnings.

Existing education inequalities have only worsened because of the closures; learning losses in lower income countries are significantly worse than those in rich countries.

Even under a “best-case” scenario, students made “little or no progress” during remote learning; students had a learning loss equivalent to one-fifth of a school year, and learning losses were up to 60% greater among students from less-educated homes.

With children still reeling from the educational, physical and social-emotional effects of school closures, data now show that their suffering is in vain, because the closures did little to influence COVID-19.

The fallout from school closures that occurred during the COVID-19 “pandemic” is only beginning to be understood, but the early data coming in are alarming. The percentage of children who cannot read a simple story has jumped dramatically, with those in low- and middle-income countries most affected.

Education Inequality Increased Due to Closures

Around the world, schools closed for an average of 95 school days from March 2020 to February 2021, but while many schools in western countries continued to teach remotely, those in lower income countries often did not.

There are also significant differences in how long full and partial shutdowns persisted. Schools in sub-Saharan Africa were closed for 32 weeks, compared to 73 weeks in South Asia. In the Philippines and North Korea, many schools are still shut down. *The Economist* reported:

“Closures were often long in places where teachers’ unions were especially powerful, such as Mexico and parts of the United States. Unions have fought hard to keep schools closed long after it was clear that this would harm children.”

[Read the full article at [Mercola.com](https://www.mercola.com)]

“Single acts of tyranny may be ascribed to the accidental opinion of the day; but a series of oppressions, begun at a distinguished period, and pursued unalterably through every change of ministers (administrators) too plainly proves a deliberate, systematic plan of reducing us to slavery.”

—Thomas Jefferson

Medical examiners were told to lie on death certificates

Vaccine researcher **Steve Kirsch** is reporting that “In Massachusetts, the state Department of Public Health told medical examiners that if the person died *with* COVID, to list COVID as a cause of death, even if COVID had nothing to do with the reason the person died....This is a violation of federal law.”

He asks, “*Why would a state department of public health instruct medical examiners to lie? Two reasons: To get federal funds for the state; To encourage people to get the shots.*” This illegal behavior was encouraged by government health officials because it allowed them to falsely add tens of thousands of deaths to the COVID death count and create the fear and panic necessary to drive people to the needle.

Kirsch, whose writings can be found at [stevекirsch.substack.com](https://www.stevекirsch.substack.com) says: “Someone should go to jail for this, but I think it is unlikely that the state Attorney General and the U.S. Dept of Justice will press any charges.”

Are Medical Mistakes a Leading Cause of Death in the US?

The incidence rate of medical harm occurring in the U.S. is estimated to be over 40,000 harmful and/or lethal errors daily. In 2014, 10.5% of American doctors admitted they’d made a major medical mistake in the last 3 months. In 2016, **Dr. Marty Makary** published a **Johns Hopkins** report showing an estimated **250,000 Americans die from medical mistakes each year—about 1 in 10 patients.**

Deaths Per Year (From 2000)

- 12,000** — unnecessary surgery
- 7,000** — medication errors in hospitals
- 20,000** — other errors in hospitals
- 80,000** — infections in hospitals
- 106,000** — negative effects of drugs

These total to 225,000 deaths per year from physician or medical-care mistakes and are only surpassed by heart disease and cancer and do not yet account for the deaths that can and will be attributed to the mRNA “vaccine.”

Israel: Increased emergency calls for Heart Problems Among Youth Since Vaccine Push

Using data from Israel National Emergency Medical Services (EMS) from 2019 to 2021, researchers found an increase in the volume of cardiac arrest and acute coronary syndrome in the 16–39-year-old population of over 25% compared with previous years. Further, the weekly emergency call counts were significantly associated with the rates of 1st and 2nd vaccine doses administered to this age group but not with COVID-19 infection rates.

The study, published in *Scientific Reports*, found that “*the findings raise concerns regarding vaccine-induced undetected severe cardiovascular*

side-effects and underscore the already established causal relationship between vaccines and myocarditis, a frequent cause of unexpected cardiac arrest in young individuals.” The study’s authors write that

“it could be challenging to identify whether increased incidence of myocarditis and related cardiovascular conditions...is driven by COVID-19 infections or induced by COVID-19 vaccines [or influenced by] patients delaying seeking emergency care because of fear of the pandemic and lockdowns.”

Drugged-up Nation

Opioid-related deaths soared during the COVID-19 pandemic and accounted for 75 percent of the 107,000 drug overdose fatalities in 2021. It is equivalent to one 737 jet full of passengers crashing every day with no survivors. It is estimated that the opioid crisis cost the US economy \$1.47 trillion in 2020, an increase of \$487 billion from 2019.

Approximately 80 percent of the global opioid supply is consumed in the United States. If Canada and Western Europe are included, that number increases to 95 percent, so the remaining countries use only about 5 percent of the opioid supply.

A congressional report found that while opioid use is more common among whites, “Black adults and teens experienced a steeper increase in the rate of fatal opioid overdoses compared to their white counterparts over the last decade.” Blacks made up 17% of fatal opioid overdoses in the US in 2020, despite only accounting for 12.4% of the people living in the country.

Vaccine Corner

The following excerpts are from *Vaccines, Autoimmunity, and the Changing Nature of Childhood Illness* (2018), by **Thomas Cowan, MD:**

“To vaccinate a child and then witness them die is not something I could ever live with. Children do die from vaccines; the only debate is over how often it happens. Nor could I live with watching a child embark on a potentially lifelong struggle with an autoimmune disease or autism following the administration of a vaccine. The medical establishment and mainstream media continue to deny this outcome, but research continues, evidence is mounting, and many parents have many stories that call into question a stance from the CDC [Centers for Disease Control] and AAP [American Academy of Pediatrics] that relies solely on the brandishing of medical credentials and authority.

“If you or your doctor want to truly understand the scientific literature on vaccines, a thorough reading of the contents of this website [*Vaccine Papers* ([vaccinepapers.org](https://www.vaccinepapers.org))] is imperative.”
