DePopulation Briefs

"Before the vaccine was made, I warned us in the Name of Allah that this was a death plot....The way to get rid of two to three billion people [is] to offer you a vaccine."

—The Honorable Minister Louis Farrakhan, *Swan Song*

"America's scientists of war conduct dreadful experiments on how best to kill human beings by the millions and wipe out the life of whole continents. These are **the days of fulfillment** of prophecy of not one, but of many calamities. But in all of these preparations of the destruction of human life by the devil...Allah (God) too has plans to save His people."

—The Most Honorable Elijah Muhammad

"Vaccine" Miscarriages Show Satan's
True Depopulation Objective

"If you've taken the shot, I pray that Allah will lessen the effect of that shot, because it was designed to harm you, your ability to reproduce yourself."

—The Hon. Minister Louis Farrakhan, Feb. 27, 2022

The U.S. government database tracking adverse reactions and deaths from the "COVID-19 vaccine" is now reporting that 5,180 miscarriages may have been caused by the "vaccine." If so, this should be viewed as a "reaction" that is absolutely expected from a depopulation drug. Below are some recent reports filed with the CDC's Vaccine Adverse Events Reporting System (VAERS):

Miscarriage; received Pfizer during pregnancy

Europe sees more deaths in 2022
than in previous 2 years—NOT From COVID!

According to *Expose News*, Europe has now recorded nearly 10,000 MORE excess deaths in 2022 than it recorded in 2020 at the height of the pandemic. Anyone with even a basic level of critical thinking can certainly suggest at least one essential correlation that requires further investigation: the rollout of the mRNA COVID shots. The first of these gene-based drugs was authorized for use in 5 to 11-year-old children in Europe by the European Medicines Agency (EMA) in late November 2021.

Data on death rates in Europe are similarly concerning, according to recent data by other researchers, including the company Eurostat.

In a mid-September article on their website, Eurostat notes that excess mortality in the European Union hit +16% in July 2022, up from +7% in June and May. Reporting this as "an unusually high value," Eurostat notes that the excess mortality rate in July 2020 was +3% in July 2020 and +6% in July 2021. Eurostat suggests unprecedented heat waves this past summer as a possible contributing factor.

But according to UK in a Changing Europe ("the authoritative source for independent research on UK-EU relations"), the UK's Office for National Statistics reported 11,600 more deaths than average in July and August 2022, and "only a small fraction" of those deaths occurred during the infamous heatwave.

So, what else could be at play, if not primarily the heatwave? ...In an extremely roundabout way of acknowledging the possible link between excess deaths and COVID shots, UK in a Changing Europe also says that there needs to be more investigation into international data before being able to discount "implausible suggestions such as harm arising from vaccination."

Fired Referees Sue NBA Over Vaccine Mandate

Superstar Kyrie Irving is not the only vaccine-intelligent NBA employee. The Children's Health Defense reports that three former National Basketball Association referees are suing the league, alleging they were fired for refusing to receive COVID-19 "vaccines" on religious grounds.

In their complaint, Mark Ayotte, Ken Mauer and Jason Phillips—who have a combined 71 years' worth of NBA officiating experience—accused the NBA of violating federal civil rights law and New York State and New York City human rights laws. The lawsuit alleges the "job or job ultimatum" instituted by the league for the 2021-2022 season—and which was not applicable to players—led to their suspensions for that season.

Then, despite the NBA's decision to rescind the mandate for the 2022-2023 season, the league fired them.

The plaintiffs are requesting a jury trial, compensatory damages and punitive damages for front and back pay, emotional pain and suffering, reputational damage and attorneys' fees.

The NBA granted a religious exemption to "at least one minor league referee" but not the three plaintiffs because, according to the lawsuit, "The NBA's lawyers, after a pointed interrogation" of the three referees, "adjudged plaintiffs' beliefs to be illogical, unorthodox, and/or not entirely religious and therefore insufficient to satisfy the 'high standard' of a sincerely held religious belief."

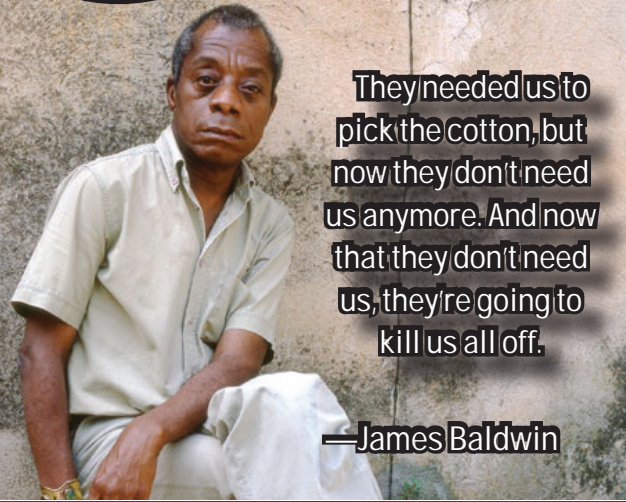

The lawsuit alleges, however, that according to "fundamental hornbook law ... an employee's 'sincerely held religious belief' is not held to a 'high standard' at all — it is held to an exceedingly low standard requiring only sincerity" and "a belief need not even be religious to merit Title VII protections, so long as it occupies the same métier as a religious conviction."

“Dr. Anthony Fauci, Bill and Melinda Gates, you want to depopulate the Earth? What the hell gives you that right? Who are you to sit down with your billions and talk about who can live and who should die?”

—The Honorable Minister Louis Farrakhan, *The Criterion*

They needed us to pick the cotton, but now they don't need us anymore. And now that they don't need us, they're going to kill us all off.

Florida OB/Gyn Warns of Alarming Rise in Infertility and Miscarriages

Abnormal pap smears, infertility, miscarriages, Spontaneous abortion—all troubling signs on the rise since the “vaccine” roll-out, and doctors are speaking up.

Dr. Kimberly Biss, an OB/Gyn from St. Petersburg, Florida, had the courage to go public with the serious rise in reproductive health issues that are taking place at the hospital where she works. In a now viral video Dr. Biss explained that “I can definitely say since the vaccine rollout started, we have seen in our practice a decrease in new OB numbers—which would [indicate] infertility—by about 50%. We have also seen an increase in miscarriage rate by 50%. And I would say there is probably about a 25% increase in abnormal pap smears as well as cervical malignancies in our area.”

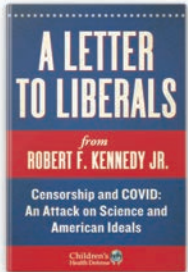

Dr. Kimberly Biss, OB/Gyn

Pfizer, FDA tried to conceal data on COVID-19 vaccines and miscarriage in trials. Dr. Naomi Wolf, in an interview with Steve Bannon on “War Room,” said that “Pfizer took those deaths of babies—those spontaneous abortions and miscarriages—and re-categorized them as recovered-resolved adverse effects. In other words, if you lost your baby, it was categorized by Pfizer as a resolved adverse event, like a headache that got better.”

Indeed, the data showed 50 pregnant women took part in the initial vaccine studies and a shocking, 22 women (44%) lost their babies. This serious safety signal was covered up by the FDA and the CDC, as both pushed for pregnant women to take the depopulation jabs during pregnancy.

RF Kennedy Book: Fauci's COVID Policies Were a “War on the Poor, Children, Working Classes”

Excerpt from Robert F. Kennedy, Jr., *A Letter To Liberals* (ebook ed.):

Anthony Fauci's quarantine was a prolonged pajama party for upper-crust Americans who could afford DoorDash food deliveries and Amazon shopping. Lockdowns provided a novel adventure in telecommuting for the laptop elites, and a cushy year of remote education for their children. But even mainstream critics are increasingly recognizing that COVID policies have devastated workers, the poor, minorities, and children.

The lockdowns created nearly five hundred new billionaires—who are now gorging on the bleached cadavers of America's massacred middle-class—and engineered a \$3.98 trillion shift in wealth from the poor and working Americans to a new oligarchy of Pharma billionaires, social and main-stream media titans, surveillance state robber barons, and military contractors.

Shouldn't liberals be particularly skeptical that media and social media billionaires raked in fortunes from the lockdowns while actively collaborating with government officials to censor and deplatform critics of these controversial and failed policies?

Government countermeasures were, in contrast, a nightmare for the middle class and the poor. Shouldn't liberals worry that the lockdowns greatly increased inequality between a rich controlling few and a rapidly expanding disempowered poor, reversing years of poverty reduction that liberal administrations have fought for since FDR's New Deal?

The number of active business owners in the United States plummeted by 3.3 million from February to April 2020, crushing the backbone of democratic capitalism. The lockdown's leading corporate promoters, Amazon, Facebook, Microsoft, Google, and Walmart, flourished while their Main Street competitors withered and died.

A DEPOPULATOR SPEAKS

“Frankly I had thought that at the time Roe was decided, there was concern about population growth and particularly growth in populations that we don't want to have too many of.”

—The late U.S. Supreme Court Justice Ruth Bader Ginsburg

Vaccine Corner

The following excerpt is from the book *Make an Informed Vaccine Decision For the Health of Your Child: A Parent's Guide to Childhood Shots*, by Dr. Mayer Eisenstein:

“Should parents be obligated to play Russian Roulette?”

“Vaccines pose serious risks. These hazards are acknowledged by vaccine manufacturers in their product inserts, documented in numerous studies, substantiated by the federal government's Vaccine Adverse Event Reporting System (VAERS), and confirmed anecdotally by parents. For example, the MMR vaccine manufacturer concedes that diabetes, thrombocytopenia (a serious blood disorder), arthritis, encephalitis (brain inflammation), Guillain-Barré syndrome (paralysis), and death, have all been reported during clinical trials of its vaccine...

“In addition, every year approximately 15,000 people file vaccine adverse reaction reports with the CDC. Many of these cases are serious, requiring hospitalization, resulting in life-threatening disabilities, or death. VAERS is a passive reporting system, so the number of people believed to be hurt by vaccines is vastly underreported. According to Dr. David Kessler, former head of the FDA, ‘only about 1 percent of serious events—adverse drug reactions—are reported.’

“...A vaccine industry that errs on the side of denial rather than concern is backward and negligent....Pretending that serious reactions to vaccines are rare does not make it true, incapacitates our children, and degrades our society. Since reputed vaccine risk-to-benefit ratios are spurious, and ‘preventive’ shots are markedly more unsafe than officially acknowledged, it is morally unconscionable to mandate vaccines for children.”
