

Biden's 'Vaccine' Propaganda Plan Pimps Black Children

by Tingba Muhammad

“White Christianity has deceived the black nations of the earth, trapped and murdered them by the hundreds of thousands, divided, and put black against black, corrupted and committed fornication before your very eyes with your women, and even bold enough, after blinding you, to make you confess that you love them and do not hate them for all the evils, filth, and murder done to you and your flesh and blood. What foolish people I have.”

—The Most Honorable Elijah Muhammad

Depopulation—like slavery—at its best requires that its victims participate willingly in their own demise. The genocidal rulers that govern America have now pulled the trigger on **Henry Kissinger**'s notorious National Security Study Memorandum 200, which revealed their intention to cull the planet earth of billions of its human beings. They have taken their plot a wicked step further when it comes to the Black population of America. It seems that nearly every notable Black “influencer”—from politicians Barack and Michelle Obama, Jesse Jackson, Al Sharpton, and Kamala Harris to “scientists” Kizzmekia “Kizzy” Corbett and Neil deGrasse Tyson, to entertainers D.L. Hughley, Spike Lee, Chris Rock, Kareem Abdul-Jabbar, Whoopi Goldberg and Tyler Perry, to “news-entertainers” Gayle King and Lester Holt, and on and on—have all committed to peddling the government’s “vaccine” Kool-Aid like a latter-day Nurse Rivers—the Black nurse that recruited Black men for the notorious Tuskegee syphilis experiment. They all dutifully and publicly tried to shame Blacks in America into taking a toxic injection that

(1) they had no idea of its chemical composition (the *full* list of *all* ingredients was and still is a “proprietary” secret).

(2) was being manufactured by the same pharmaceutical felons whose vaccine programs all over the developing world have resulted in mass murder and millions of permanent injuries; and

(3) is from drug companies who are totally free of liability for any damage their “vaccine” causes (the medically useless “vaccines” have now caused far more than the CDC-admitted 1.5 million injuries, including 31,961 deaths).

(4) was being pushed in a government/military/media operation rife with open and obvious high crimes, misdemeanors, fraud, corruption, collusion, and scientific censorship—and where clear ulterior motives were pervasive.

It gets worse. Through a Freedom of Information Act lawsuit, Judicial Watch uncovered 249 pages of records from the Department of Health

and Human Services (HHS) detailing the extensive plans for a propaganda campaign to push the “COVID-19 vaccine.” The still ongoing government plot entails the recruitment of “all entertainment talent and management agencies ... and show producers” to use their platforms and talent to launch a vaccination media extravaganza of unprecedented proportions.

The documents show that the government plot, led by **HHS Secretary Xavier Becerra**, specifically intends to manipulate Black youth in the slickest way. HHS wanted “young people” on YouTube and Instagram, TikTok, and Snapchat “to create videos of themselves being vaccinated and start a special campaign of funny and/or musical videos” Becerra’s plan includes producing “question-and-answer videos featuring local Black doctors discussing the vaccines, how they work, and why the public should get vaccinated.” Why Becerra targets “Black doctors” and not Asian, Jewish, Italian, white, or obese doctors is not explained. Judicial Watch president Tom Fitton commented, “It seems as if the entire entertainment industry was an agent for the government!”

Government PIMPING of Black Children

Xavier Becerra's “COVID response” plotters, aiming to push Black youth into willingly taking the dangerous “jab,” produced a pro-vaccine “rap video” that depicts the racial sewage of the propagandists’ own minds. The seedy video has our young sisters posing as vaccine prosti-

tutes wearing “NO VAXING NO VUCKING” T-shirts while “alluringly” offering our young men access to a sexual experience, *but only if they're “vaccinated”*—a *sexual vaccine passport*. The “rappers” and the “dancers” writhe and undulate to a song titled “Vax That Thang Up,” a remake of the 90s hip-hop song “Back That Thang Up.” The “lyrics” they exchange **should** make all Blacks cringe: **“Girl, you looks good. Won't you vax that thang up?”**

You's a handsome young brother, won't you vax that thang up?

Feeling freaky all night? You need to vax that thang up.

I know you can't stand it, no holding hands chick.

But when we get the shot, we gon' be romancing.

Girl you can be the queen, after quarantine We could meet up at the spot and we could do the thing.”

And the refrain from our girls to our boys:

“Now, now, now if you wanna get sticky and hot—go, go go, go and get the shot.”

That “performance” is courtesy of the United States government, as part of the Department of Health and Human Services' \$250 million “Covid-19 public education campaign.” HHS Sec. Xavier Becerra chose to pimp our young women and men rather than educate them. Compare Biden and Becerra's “sticky and hot” filth to the July 4, 2020, “The Criterion” speech by **the Honorable Minister Louis Farrakhan**, who counseled that Blacks approach the coming “vaccine” this way: “I say to those of us in America, we need to call a meeting of our skilled virologists, epidemiologists, students of biology and chemistry and we need to look at not only what they give us, we need to give ourselves something better.” The very fact our “health officials” have been censoring and destroying the careers of some of the top “virologists, epidemiologists, students of biology and chemistry,” **should** have convinced Blacks that something far more devious than public health is in the works.

It did not even bother the “Black influencers” that when white “health authorities” spoke to Black people at all they treated them like children. For 40 years in Tuskegee, Alabama, the “doctors” wouldn't even use medical terminology with their Black victims. They simply “diagnosed” any ailment as

“Vax that thang up” rap video frame.

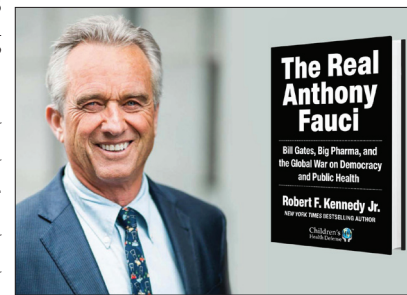

“bad blood” before making them guinea pigs in an experiment that President Bill Clinton referred to as “clearly racist.” Today, Pfizer chairman and CEO **Dr. Albert Bourla**, who holds a Ph.D. in *Biotechnology of Reproduction* (a perfect knowledge base for developing an anti-fertility depopulation drug), told Armstrong Williams that “he's on a mission to educate Black Americans about the COVID-19 vaccine.” Then, this so-called scientist drops this un-scientific appeal on his so-called negro targets: “Fear is a strong emotion,” Bourla sermonized. “There is only one thing in the human soul that is stronger than fear: love. I would say, think about the people you love and that will give you the strength to overcome your fear.” It should not be lost on ANYBODY that the Pfizer product has now proved to be little more than snake oil, having NO capacity to stop infection or transmission of the COVID-19-causing “virus.”

This insulting of Black intelligence is a practiced pattern. **Dr. Ashish Jha**, Biden's “Covid-19 adviser,” was hawking the depopulation boosters like this: “I really believe this is why God gave us two arms—one for the flu shot and the other one for the COVID shot.” Dr. Anthony Fauci joined in the clowning: “The vaccine you are going to be taking was developed by an African American woman. And that is just a fact.”

Minister Farrakhan gave us actual facts and specifically warned us that this “Kool-Aid”—a reference to the poisonous concoction used by Jim Jones in the 1973 mass murder-suicides that killed 909 mostly Black people—was designed to target and neutralize the reproductive system. He called on medical scientists who were not in Big Pharma's profit loop to examine this virus and the government's proposed “cure”—their “vaccine.” **Dr. Christina Parks**' Ph.D. is in Cellular and Molecular Biology. She is one of many who says NO ONE should “vax that thang up”: “I believe this was criminal in the sense that they knew that this would have high reproductive costs when they released it and re-

leased it anyway and didn't do the studies. Because they knew that it caused microvascular injury. So we know that *they knew* it could be accumulated in the ovaries. That, alone, should have been enough to stop it . . . This is not something that's happened before. How that would actually play out, no one knows. And, and maybe they do; maybe they've done those studies, and they're hidden. But it's horrifying.” **Dr. Paul Alexander** was as explicit as any scientist could be. He is an epidemiologist who was highly placed in the Department of Health and Human Services before retiring in disgust. He issues “a clarion call to women and pregnant women . . . as to the potential harms of this COVID gene injection. DO NOT take this! DO NOT. FDA, CDC, Fauci, Francis Collins, Ashish Jha, Walensky, Bourla of Pfizer, Bancel of Moderna have all lied to you! This is dangerous to you and the developing child in utero.”

With this unambiguous, definitive repudiation of the anti-science behind the “mRNA vaccine,” one must conclude that the government's paid and volunteer vaccine pushers all succumbed to a massive COVID Psy-Op, designed through shaming, fear-mongering and intimidation to entrap Blacks into making a suicide pact with themselves. The grandfatherly deceiver Dr. Fauci has been especially effective at hoodwinking the so-called negro cheerleaders, who are apparently unaware of the crushing indictment of Fauci and his egregious history of malpractice, as chronicled in the book “The Real Anthony Fauci,” by Robert Kennedy Jr.

“The Real Anthony Fauci” by Robert Kennedy, Jr.

The Holy Qur'an is clear (49:6): “*O you who believe, if an unrighteous man brings you news, look carefully into it, lest you harm a people in ignorance, then be sorry for what you did.*” Thank Allah that Minister Farrakhan's wise and cautious and scientific approach has saved millions of lives among American Blacks, who have the lowest vaccination rate, and in Africa, where only 2 percent have “vaxxed that thang up.” And now—as he clearly foresaw—a growing and vocal chorus of high scientists are now demanding an END to the shots, which have proven to be totally ineffective and more dangerous and deadly than any drug ever made.

Farrakhan stopped Kissinger's carnage even though his voice has been censored on every popular platform. In the meantime, your government is pimping your Black daughters and sons—and selling “NO VAXXING NO VUCKING” T-shirts on Amazon at \$22.95 a pop.

G20 Leaders & White House Push Mandatory Vaccine Passports; Predict "future pandemics"

Natural News reports: "By now, sane, reasonable people know that...the COVID-19 pandemic...was certainly coopted and used by Western global elites as a means of controlling their respective populations for nearly two years."

Since then, the pandemic has become a plandemic — that is, it is now serving as justification for permanently altering behaviors around the globe while usurping the freedoms of billions of people.

Case in point: At the recent G20 gathering in Bali, Indonesia, the assembled elite proposed a universal vaccine passport plan to 'allow' freedom of travel. In short, anyone wanting to step on a plane or board a ship to travel internationally would have to agree to have their medical privacy invaded by government bureaucrats, even though the COVID virus has all but vanished and is no longer close to the threat that it was (and even then it wasn't nearly as deadly and serious as we were being told).

Indonesian Health Minister Budi Gunadi Sadikin, who spoke about the plan on behalf of the G20 host country earlier in the summit had called for a "digital health certificate" using WHO standards:

"Let's have a digital health certificate acknowledged by WHO... if you have been vaccinated or tested properly, then you can move around."

The Biden White House revealed its own plot to enforce vaccine mandates and vaccine passports in "future pandemics," in a statement it released on November 16, 2022:

"We acknowledge the importance of shared technical standards and verification methods, under the framework of the IHR [International Health Regulations] (2005), to facilitate seamless international travel, interoperability, and recognizing digital solutions and non-digital solutions, including proof of vaccinations. We support continued international dialogue and collaboration on the establishment of trusted global digital health networks as part of the efforts to strengthen prevention and response to future pandemics, that should capitalize and build on the success of the existing standards and digital COVID-19 certificates."

Sen. Rand Paul Says Biden's Extension of "Emergency" Powers is a "Trick"

SEN. RAND PAUL has openly questioned how President Biden can claim the "pandemic" is over yet continue to declare that the nation is still in an "emergency." In a speech and in a commentary to major newspapers the newly re-elected Sen. Paul writes:

The Constitution is the guarantor of our liberties. So it should come as no surprise that those who crave power to rule over their fellow man always seek to suspend the Constitution by declaring and perpetuating national emergencies.

This is the trick that always seems to work: declare an emergency and exempt yourself from the constitutional restraints on power that are necessary for the preservation of a free society. It is a strategy that has existed since antiquity.

Just like our Founders enshrined in the Constitution a system of checks and balances, so too did the founders of the Roman republic. But when crisis emerged, the Romans dissolved the restraints on power. That is how the Roman republic died and Caesar became dictator for life.

There is a touch of Caesarism in the ongoing COVID national emergency. President Joe Biden has admitted that "the pandemic is over," yet his administration continues to extend its national emergency declaration.

When the Senate voted to terminate the COVID national emergency in March, the White House issued a veto threat. At the time, the White House said, "Although we have made tremendous progress in combating the virus ... the virus continues to pose a risk to the American people and our health-care system." Caesar could not have said it better himself.

Biden's administration demands credit for how it has wielded extraordinary powers, but stops short of claiming total success because to do so would be to admit it no longer needs the powers it craves.

Have we forgotten what emergency powers in the hands of the government look like? They look like lockdowns, where livelihoods and lives are destroyed. They look like a travel mask mandate; like robbing children of a full education; like the closure of places of worship; and like a vaccine mandate for those working for large companies. They look

like an eviction moratorium in which the Centers for Disease Control and Prevention claims the power to destroy contracts and effectively seize private property.

When was the last time you heard the president tell the country it was time to relax emergency powers?

His actions validate the argument made in Robert Higgs's classic work, *Crisis and Leviathan*. Higgs demonstrated that governments justify the exercise of extraordinary powers during an emergency, but when the crisis ends, even if government gives back some of the powers, it will never voluntarily relinquish all its newfound authorities.

We are free from these monstrous policies only because the courts forced government officials to abide by the Constitution. In a decision striking down California's efforts to shut down churches, for example, the Supreme Court restored the Free Exercise clause of the First Amendment and held that "even in a pandemic, the Constitution cannot be put away and forgotten."

And when the Supreme Court ended Biden's eviction moratorium, it found that "The CDC has imposed a nationwide moratorium on eviction in reliance on a decades-old statute that authorizes it to implement measures like fumigation and pest extermination. It strains credulity to believe this statute grants the CDC the sweeping authority it asserts." The Supreme Court further concluded that our system does not permit agencies to act unlawfully—even during an emergency.

The court also struck down Biden's vaccine mandate for private companies, with the majority declaring, "This is no everyday exercise of federal power. It is a significant encroachment into the lives, and health, of vast numbers of employees."

When the courts restored the people's liberties, you could count on the Biden administration to express disappointment and claim that disaster was just around the corner. But the administration, time and time again, was proven wrong...

Anti-Defamation League and NAACP Had Strange Interest in Black "Vaccine Hesitancy"

It seems that the ADL has been concerned about vaccine hesitancy among Black people even before the COVID-19 so-called vaccines came out in late December of 2020. In June of 2020—just a few weeks after the "pandemic" was declared—the ADL partnered with the NAACP under the umbrella of the "Stop Hate for Profit" campaign. They gave Facebook head **Mark Zuckerberg** a list of "recommendations" he should use to "stop hate speech" on his platform that included a strange item: "4. *Find and remove public and private groups focused on white supremacy, militia, antisemitism, violent conspiracies, vaccine misinformation, and climate denialism.*" What does "vaccine misinformation" have to do with hating Jews? And how did this vaccine reference get into a "hate" agenda long before the COVID-19 "vaccine" became a national issue?

'Wave of Litigation' Over COVID Vaccine Mandates

The *Children's Health Defense* reports that "Nike and Washington State University (WSU) are two of the latest employers to face lawsuits from employees who lost their jobs over COVID-19 vaccine mandates."

- Three former senior employees last week sued Nike, demanding punitive damages for religious discrimination, medical discrimination and battery after they were fired or lost their jobs due to Nike's COVID-19 vaccination mandate.

- Nick Rolovich, former WSU football coach, sued the university and Washington Gov. Jay Inslee seeking damages after he was fired last year for refusing to get the COVID-19 vaccine.

The two lawsuits came on the heels of another suit filed last week by three former **National Basketball Association (NBA)** referees who sued the NBA after they were fired for refusing the COVID-19 vaccine on religious grounds.

It's all part of a "wave of vaccine mandate litigation" that has grown to **more than 1,000 lawsuits challenging vaccine mandates** and filed primarily against employers in the last several months, according to the *National Law Review*.

Ice Cube Ices The "Jab"

Ice Cube confirmed on the podcast "Million Dollaz Worth of Game" that he lost a \$9 million acting role because of

his refusal to get the COVID "vaccine shot." Cube was dropped from Sony's comedy "Oh Hell No," co-starring Jack Black when producers of the film required all cast members be "vaccinated" in order to participate in the production. Ice Cube said:

"I turned down a movie because I didn't want to get the [m.f.] jab. I turned down \$9 million. I didn't want to get the jab. [F.] that jab. [F.] ya'll for trying to make me get it. I don't know how Hollywood feels about me right now."

This is how enslaved Blacks were used in medical experiments in Charleston, SC in 1856—a practice that continues to this day.

875 Vaccine-Related Bills Filed in 44 States

During the 2022 legislative session, **National Vaccine Information Center (NVIC)** analyzed, tracked and issued positions on an unprecedented 875 vaccine-related bills in 44 states and the District of Columbia. According to the group:

- More vaccine-related legislation has been filed in state legislatures across the U.S. in 2022 than in any other year.
- This is nearly four times the number of vaccine-related bills proposed in a single year in state legislatures.
- There were 475 bills which serve to restrict the vaccine-pushing pharmaceutical industry and thus worthy of NVIC's support; another 214 bills were marked as a bill to "watch;" these may have been well-intentioned but contained problems that could be fixed with amendments.
- No state legislatures passed bills with COVID-19 mandates or mandating any type of vaccine; 25 states passed some form of protective language that prohibits COVID-19 vaccine passports or COVID-19 vaccine mandates in some capacity.

The NVIC writes that "Now more than ever, it is critical that people continue to be involved in the legislative process at all levels of city, county, state and federal government."

Vaccine Corner

The following excerpt is from *Dissolving Illusions: Disease, Vaccines, and the Forgotten History* (2015), by Suzanne Humphries, M.D. (in photo), and Roman Bystryanyk.

"Like most doctors, I received a cursory summary of the childhood and adult vaccine schedules and was told that vaccines are safe and effective and to give them on schedule. I never questioned the vaccine schedule and was largely agnostic about it.

"After nearly two decades of working in the conventional medical system, several things converged to launch me into a new way of thinking. I never would have predicted that the medical establishment would present itself to me as a blatant violator of life or conflict with my moral and spiritual principles... but it did.

"The most memorable event was during the winter of 2009 when the H1N1 flu vac-

Biden's White House targets poor Blacks by offering \$20 in food credits for those who take the depopulation jab

Health activist **Mike Adams** (in photo) reports that "the White House is targeting the poor for depopulation. After causing record food inflation through money printing, food facility sabotage and the dismantling of energy infrastructure needed by farming operations, the Biden regime is now arranging for \$20 in grocery retail credit for those who are willing to be injected with so-called covid 'vaccines' — actually depopulation bio-weapons designed to maim and kill."

Adams writes that after the wicked inducements of donuts, weed, french fries, lottery tickets, etc., "Now, the White House is upping the ante, offering \$20 in grocery money for those willing to exterminate themselves with vaccine-assisted suicide. No doubt as food inflation continues to skyrocket, this incentive will be raised to \$50, then \$100. After all, the US government prints money from nothing, FTX-style.

"At some point, the poorest Americans will only be able to afford to eat if they agree to be jabbed with depopulation weapons that cause infertility, stillbirths, spontaneous abortions and excess fatalities."

"Thus, the Biden White House is now targeting the poor for extermination, and this policy will disproportionately target low-income, inner city Black Americans, the same demographic group that has been targeted for extermination by Planned Parenthood abortions and eugenics programs for decades.

"As the *UK Daily Mail* reports: **'Biden's Covid bribe: Americans who get a booster vaccine this winter will get \$20 discounts on their groceries...'**

"People who get the Omicron-specific shot at CVS, Safeway, Winn-Dixie, or Rite Aid will get up to \$20 off their purchases this winter. It comes amid a soaring inflation crisis that has driven up the price of household staples.

"...Put another way, America's top pharmaceutical retailers are carrying out a program of ethnic cleansing that targets Blacks. On top of that, the cancer industry in America also preys on Blacks who suffer chronic vitamin D deficiencies (due to skin pigmentation that blocks UV light from the sun), making their cancers more aggressive and more profitable for the exploitative cancer industry."

cine was given as a separate injection from the seasonal flu vaccine. Many doctors were skeptical of the practice of influenza vaccination, and many of my hospital colleagues signed the exemption form and dodged the vaccine for themselves. However, there were trusting patients who did not have the discernment to refuse and I got to see the potential result of vaccination on their kidneys.

"That winter, three patients in close succession were wheeled into the emergency room of my hospital with total kidney shutdown. When I arrived to talk to them, each one volunteered to me, 'I was fine until I had that vaccine.' All three had normal kidney function at baseline, as per their outpatient records. All three required acute dialysis, two eventually recovered, and one died of complications several months later, supposedly from his other illnesses. After this series of events, I began to take vaccine histories on each of my patients and was startled at the connections that could be made just by asking, 'When was your last vaccine?' In my opinion, many cases of supposedly idiopathic (a medical term for unknown) kidney disease are not idiopathic at all."
