

'Warp Speed' production of COVID-19 'vaccines' exposes the government's depopulation agenda

by Dr. Ridgely Mu'min Muhammad

Now we know that various agencies of the U.S. government have aided and financed Big Pharma to recklessly produce inoculants posing as vaccines to fight COVID-19, while cutting corners and conducting faulty efficacy and safety tests. Such behavior by Big Pharma and government agencies has now made people suspicious of the whole vaccine industry. What did the pharmaceutical industry know about the inherent dangers of the vaccines, when they demanded that the govern-

The Honorable Minister Louis Farrakhan delivers "The Criterion" July 4, 2020.

ment protect them from lawsuits starting in 1986?

In a December 2, 2022, article titled "Banking on a Shot in the Dark," Dr. Joseph Mercola writes: "Pfizer compressed its vaccine development timeline from 10 years to a mere nine months by simultaneously developing and testing the product in human trials. Pfizer and other COVID jab makers hid side effects by eliminating the **control groups** long before the studies were over."

When drug testing is properly done a "control group" of people who did not receive the drug is necessary to compare their reactions to those who did get the drug. Without

Person receives injection. Photo: MGN Online

On July 4, 2020, the Honorable Minister Louis Farrakhan, in his monumental and earth-shattering speech "The Criterion," called forth a control group by which a proper analysis could be done of these wicked experiments.

A full six months before the COVID shots were released at the end of December 2020, Minister Farrakhan was divinely inspired to instruct the leaders of African countries not to allow these experimental shots to be given to their people.

EPISODE 295: MIND GAMES

that comparison group, it is impossible to tell if the side effects are unusual or even dangerous.

Now, these experimental mRNA so-called vaccines have been injected into the arms of billions of people around the globe without proper testing and without a proper data accumulation system for comparative analysis of the positive and negative effects of these shots on the human family. However, on July 4, 2020, the Honorable Minister Louis Farrakhan, in his monumental and earth-shattering speech "The Criterion," called forth a **control group** by which a proper analysis could be done of these wicked experiments. A full six months before the COVID shots were released at the end of December 2020, Minister Farrakhan was divinely inspired to instruct the leaders of African countries not to allow these experimental shots to be given to their people.

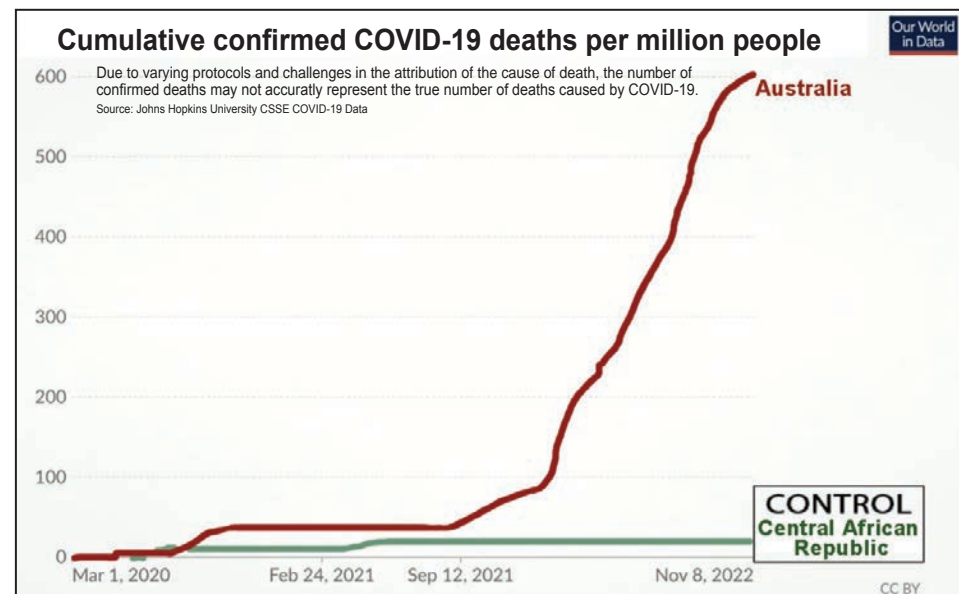

Fortunately, many African leaders heard Minister Farrakhan and most Africans did not take these shots; therefore, many countries in Africa can now be used as the "control group" as a true measure of how dangerous these injections really are. There are now two full years of data that we can use to make scientific comparisons. In the "Jaxen Report" of episode 295 of thehighwire.com, titled "Mind Games," the deaths from COVID-19 in Australia—where 84% of the people took the jabs—were compared to the COVID deaths in the Central African Republic, where only 19% of its people took the shots. The comparison is stunning.

'Warp Speed'

Continued from page 8

When we observe the graph below, we see that starting in March of 2020 both Australia and the Central African Republic (CAF) had very low death rates, both below 10 per million people. However, by September 12, 2021, nine months after the “vaccine” release, Australia’s accumulated deaths jumped up to about 50 per million whereas CAF’s death rate only went up to about 20 per million. However, the differences have grown much wider by November 8, 2022, with Australia experiencing a cumulative death rate of 600 deaths per million, while the CAF has remained extremely low at about 25 per million. When we do the math, we see that *Australia suffered 24 times the deaths per million than did the Central African Republic.*

The data is now available for comparing African countries to the countries that mandated these “vaccines” for large portions of their populations. So, what Big Pharma and governments around the world have tried to hide is being revealed before our eyes, thanks to the call that Minister Farrakhan made on July 4, 2020.

However, the revelations about the greed and recklessness of Big Pharma make one wonder about the safety of all the vaccines produced by Big Pharma over the years since certain changes were made in the production of vaccines going back 80 years. But before we look at modern vaccine production practices, let us go back to the beginnings of inoculation against disease by Western societies, a preventative measure they **learned** from Africans (the Tribe of Shabazz) back in the early 1700s.

In a February 15, 2021 article published on the Rush Medical College website, “How a Boston African Slave Helped Fight a Smallpox Epidemic,” it was pointed out: “In 1716, an **African slave** named Onesimus (pronounced oh-NESS-see-muss) told his owner, Cotton Mather, an influential Boston **minister**, that he knew how to prevent smallpox, and that he, in fact, had it and had been cured of it. The cure? A practice called variolation.” The process of variolation went like this: “Infectious material (like pus) was gathered from the blisters of those with smallpox. Under the care of a doctor, a healthy person would have the infectious material carefully introduced into a cut in the skin.”

In 1721, 11,000 Bostonians, half of the city’s population, had smallpox due to an epidemic spread from one British ship. In fact, one Boston doctor, Zabdiel Boylston, used variolation on his slaves and his son. The result? Of those Boylston

inoculated, one in 40 died of smallpox, while one in seven died of smallpox who were not inoculated.

Although the smallpox epidemic killed nearly 14% of Boston’s population, Onesimus’s sharing of the practice of variolation set the stage for vaccination. By 1796, the English physician Edward Jenner was (allegedly) able to create smallpox immunity with his cowpox vaccine. And by the

mid-1800s, variolation was completely replaced with the cowpox vaccine.

However, Big Pharma has increased the profitability of vaccines by adding materials to make vaccines more potent. These additional materials are called “**adjuvants**,” which more aggressively stimulate the human immune system to produce antibodies against the viral infection. According to a 2011 article published on the National Institutes of Health website, “Alum adjuvant: some of the tricks of the oldest adjuvant”: “Alum has been the most widely used adjuvant for over 80 years. Although there have been searches for alternative adjuvants, aluminum-containing adjuvants will continue to be used for many years due to their good track record of safety, **low cost** and adjuvanticity with a variety of antigens.”

Let’s go back to the definition of the word “adjuvant,” which they say, “better stimulates the human immune system.” The immune system produces antibodies or disease-fighting cells when the body is attacked by an outside microscopic enemy, i.e. **poison**. Therefore “adjuvants” by definition are poisons to get the immune system to send in **white blood cells** to clean up the poison (aluminum) and in the meantime develop a memory of those poisons and the viruses adsorbed onto the aluminum compounds, to be ready for a future attack of “the virus.” This allows Big Pharma to use less of the expensive “virus,” which is supposedly controlled by the addition of these metals, or poisons, to produce a more robust response at the injection site.

However, is aluminum that is added to these modern vaccines indeed “safe”? In this same episode 295 of thehighwire.com, Dr. Christopher Exley, the foremost researcher on aluminum toxicity, points out that as he was investigating the links between aluminum in the brain and Alzheimer’s disease in the elderly, he decided to look at brain tissue of young children who died while expressing extreme forms of autism. What he found shocked him. He compared brains of perfectly healthy children to brains of children who had autism. The children who had no signs of autism had no aluminum in their brains, whereas children with autism had significantly more aluminum in their brains. In fact, the amount of aluminum in their brains was comparable to the aluminum found in the brains of elderly people suffering from Alzheimer’s. Dr. Exley discovered that **white blood cells** picked up aluminum from the injection site of a vaccine, then delivered this aluminum to the brain.

Dr. Exley is convinced that since more data is coming out on the dangers of the new mRNA “vaccines” and their proven failure at stopping the spread of the SARS-CoV-2 family of coronaviruses, the vaccine manufacturers will have to go back to the standard methods of producing vaccines, which for financial reasons must use aluminum. Aluminum is now proven to be a toxic slow killer and the likely cause of autism—a devastating and deadly result that Big Pharma has been getting away with for over 80 years. Now the pharmaceutical companies’ greed and arrogance have tricked them into exposing themselves as reckless killers and liars as they force their mRNA vaccines on the world. But thanks to the African countries not taking these mRNA vaccines—thereby becoming the control group for the world—we can clearly see the hand of the depopulation scientists at work through the use of their vaccines.

“Before the vaccine was made, I warned us in the Name of Allah that this was a death plot....The way to get rid of two to three billion people [is] to offer you a vaccine.”

—The Honorable Minister Louis Farrakhan, *Swan Song*

Minister FARRAKHAN Exposes Satan the Psychopath

Satan is transforming himself into some type of Sangel of light saying he wants to help the world, while at the same time Satan is a pathological liar and a psychopath of the worst kind who can never admit his own fault and kills without any conscious or thought of mercy only what Satan deems is good for himself.

No wonder when we say our oft-repeated prayers, that we open saying: “I seek refuge in Allah against the accursed Satan.” Paul, the Apostle, in the Bible says, “We war not against flesh and blood, but against principalities, and powers, and the rulers of the darkness of this world, and spiritual wickedness in high places.” And in the Book of Corinthians in the 11th Chapter, the 13th and 14th verses, Paul says, “For such are false apostles, deceitful workers, transforming themselves into the apostles of Christ. And no marvel; for Satan himself is transformed into an angel of light.”

Well, who are these people—“spiritual wickedness” that is in high places? This is talking about spiritual leaders who are being used to fight against the truth of the Gospel of Jesus the Christ. Last week, we talked about a Mr. Holdren, the new czar of Science and Technology under President Obama; and this man agreed with Dr. Kissinger that depopulation is of the highest priority because the resources of the planet are limited, while at the same time the people of our planet are multiplying at a tremendous multiplication rate, faster than they can be killed.

And this is why Zbigniew Brzezinski said, “It is easier to kill a million people today than to control a million people”; and while at the same time the Third World peoples are multiplying, the White population is diminishing in Europe, it’s diminishing in America, by the power of Allah (God). Putting poison in the water to sterilize human beings so that the gift of reproduction, which God gives to every creature to maintain, and sustain, and reproduce itself, that very process is being killed by food that we need to eat, water that we need to drink, poison in the air that we need to breathe and poison in the earth that is under our foot to produce what we put in our mouths as food and as seeds for planting.

Will ‘Unvaccinated Blood’ Be Preferred?

More and more people worldwide are seeking to have medical procedures done with “unvaccinated” blood. Della Pietra is founder of the nonprofit **Safe Blood Donation** service in 2021, matching unvaccinated blood recipients with donors in 65 countries.

As a naturopath, he believes that an mRNA injection is more dangerous than pharmaceutical companies are willing to admit. He said the growing numbers of adverse reactions are reason enough to question the presumed safety and effectiveness of the covid “vaccines.”

Data from the Centers for Disease Control and Prevention (CDC) showed that vaccinated and boosted people made up 58.6 percent of the COVID-19 deaths in August—up from 41 percent in January 2022.

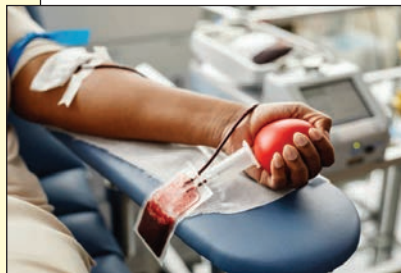

Each of the three primary mRNA COVID-19 vaccines contains “spike protein” fragments, which now appear to be implicated in the rise of blood clots and heart diseases. “I’ve never seen anything similar, Della Pietra told *The Epoch Times*.

Although donated blood and plasma must undergo a cleansing process before transfusion, Safe Blood Donation says this is not enough to remove all mRNA ingredients.

“I’m talking about graphene oxide and non-declared inorganic components in the vaccine, which we can see in the blood. When I see them, I have no idea how we can get rid of them again,” Della Pietra said.

In the United States alone, there are approximately 16 million units of donated blood annually and it is unclear if any distinction is being made between vaccinated and unvaccinated blood.

Della Pietra said that, to his knowledge, Safe Blood Donation, based in Switzerland, is the first unvaccinated blood donation service of its kind.

“And, although we have already asked hundreds of clinics, at the moment—at least in Europe—all of them still refuse to allow the human right of free blood choice with them—or at least do not want to

be mentioned because otherwise, they fear reprisals.”

“This is why I decided to do [SafeBlood Donation]. I wanted to make a network for unvaccinated people looking for a blood donor because they need it—whether they have scheduled surgery or an emergency,” he said.

Safe Blood Donation began working in the United States about a month ago, building an infrastructure of medical partners.

However, in the current medical environment, central blood banks such as the Red Cross do not segregate their blood donations based on their vaccinated or unvaccinated status.

Prominent Doctor Explains How Big Pharma Tried to Crush IVERMECTIN

“Remember, the entire objective of Big Pharma Disinformation campaigns is to counteract “science that emerges which is inconvenient to Industry interests.” The tactic to accomplish this was invented by a PR firm working for Big Tobacco in the 1950’s. That PR firm still exists today. No wonder that PR firm still thrives. They literally were able to suppress and distort the evidence of lethality and toxicity of tobacco for 50 years in the service of that Industry. That “science” supported an insane winning streak in lawsuits against them for 40 years, until they finally succumbed with the 1998 “Master Settlement Agreement” reached with the attorneys general of 46 states, putting an end to a lot of their malevolent chicanery (but not really).

Big Pharma learned from Big Tobacco that you can prevent ivermectin science from emerging by censoring the “inconveniently positive” studies while only publishing “conveniently negative” studies, you could destroy the idea that repurposed drugs are effective in the pandemic. I have said it many times, but never have two generic drugs (HCQ and IVM) presented a greater threat to their goals and profits within the largest new marketplace that has ever been created for their products.

“The CDC has been captured by the pharmaceutical industry, telling the nation’s physicians and pharmacists not to use generic medicines... This is corruption, plain and simple, it’s corruption!”

American History of Racism & Cruelty

“Mr. Brubecker, who had a number of slaves, among whom was one who would frequently avoid labor by hiding himself; for which he would get severe floggings without the desired effect, and that at last Mr. B. would tie large cats on his naked body and whip them to make them tear his back, in order to break him of his habit of hiding.”

Rev. HORACE MOULTON, a minister of the Methodist Episcopal Church in Marlborough, Massachusetts, says:

“Some, when other modes of punishment will not subdue them, *cat-haul* them; that is, take a cat by the nap of the neck and tail, or by its hind legs, and drag the claws across the back until satisfied; this kind of punishment, as I have understood, poisons the flesh much worse than the whip, and is more dreaded by the slave.”

The COVID-19 VACCINES: “We Have No RIGHT to Trust Them.”

"Dr. Anthony Fauci, Bill and Melinda Gates, you want to depopulate the Earth? What the hell gives you that right? Who are you to sit down with your billions and talk about who can live and who should die?"

—The Honorable Minister Louis Farrakhan, *The Criterion*

In Court Deposition Fauci Can't Remember—174 Times!

Dr. Anthony Fauci, the singular "voice of science" that guided America's COVID response to become the worst health disaster in modern history, was finally put under oath to answer questions in a 7-hour deposition. The lawsuit was brought by the attorneys general of Missouri and Arkansas, who charge that the U.S. government colluded with social media giants to suppress free speech guaranteed by the 1st Amendment to the Constitution.

For the first time Fauci was forced under penalty of perjury to answer for his destructive role in the plandemic, and the man who runs the most massive medical system on planet earth testified that he "could not remember" a reported 174 times.

Further, Fauci could not point to a single scientific study—not one—that supported mask mandates, or that supported masking at all! The government "health leaders" already admitted that the 6-foot "social distancing" rule had no scientific basis, that the "vaccine" cannot prevent infection or transmission of any disease, and that more "vaccinated"

people are dying from COVID than unvaccinated—but now the rationale for the mask policy is shown to be mythology.

Fauci revealed that the lockdowns he pushed onto Pres. Trump were not the result of any thoughtful risk-benefit analytical planning, but apparently the result of a minor official's visit to China where he was impressed by their brutal lockdown measures—the same ones that have now pushed hundreds of thousands of Chinese into the streets in widespread rebellions.

New Study: Colleges that Force the Jab are "Ethically Unjustified"

A new study published in the *Journal of Medical Ethics* estimates that in the fall of 2022 as many as 43,000 young adults aged 18–29 years "must be boosted with an mRNA vaccine to prevent one Omicron-related COVID-19 hospitalisation over 6 months." And, they say, "this should be considered a conservative and optimistic assessment of benefit." They conclude that "university COVID-19 vaccine mandates are likely to cause net expected harms to young healthy adults." They calculate that for each hospitalization allegedly averted by the "vaccine," approximately 18.5 Serious Adverse Events and as many as 4,626 disruptions of daily activities will occur. A COVID vaccination, they conclude, "is not outweighed by a proportionate public health benefit. Serious COVID-19 vaccine-associated harms are not adequately compensated for by current US vaccine injury systems. As such, these severe infringements of individual liberty and human rights are ethically unjustifiable."

America's most trusted health official, Florida surgeon general Dr. Joseph Ladapo, highlighted the findings in a tweet: "Great analysis by outstanding research team showing that mRNA COVID-19 booster mandates likely harm more college students than they help. Remarkably, universities are willfully turning a blind eye. Students, be aware!"

Joseph A. Ladapo, MD, PhD @FLSurgeonGen · 1h
Great analysis by outstanding research team showing that mRNA COVID-19 booster mandates likely harm more college students than they help. Remarkably, universities are willfully turning a blind eye. Students, be aware!

Joseph A. Ladapo, MD, PhD @FLSurgeonGen

Parents, don't hold your breath... CDC & FDA abandoned their posts. Keep sticking with your intuition and keep those COVID jabs away from your kids.

Top UK Doctor Says PSYCHOPATHS Running World Medical System

Dr. Aseem Maholtra is the most prominent physician in the United Kingdom. He took the COVID "vaccine" and publicly advocated that everyone should do the same. When his healthy physician father died with unexplainable clots, Dr. Maholtra discovered that the "vaccine" was the likely cause of his father's death and the cause of the current pandemic of death and suffering. He has called for an immediate halt to the worldwide mRNA "vaccine" program and proved that it is far more dangerous and deadly than the COVID disease itself.

Award-winning cardiologist Aseem Maholtra is interviewed on TheHighwire.com by host Del Bigtree.

On a recent Highwire program he was interviewed by Del Bigtree, where he discussed the PSYCHOPATHIC minds involved in the medical industry:

“Many years ago, Dr. Robert Hare—forensic psychologist considered preeminent expert in his field, who was behind influencing the original definition of ‘psychopath.’...—says when he talks about big corporations and he talks about Pharma, he says if you look at the way that they operate, they actually fulfill international diagnostic criteria for psychopathy. And when I try to understand what’s going on, and people say things like ‘This is criminal, this is unbelievable,’ I think one explanation is this: If you have an entity that has more and more power over our lives, big corporations who function more often than not or very often as psychopathic entities, you can then explain all the downstream effects in the culture—doctors turning a blind eye, not speaking out; information being suppressed. This all, I think, comes from the root cause of the problem, which is the corporate power.”

Vaccine Corner

The following excerpt is from *Dissolving Illusions: Disease, Vaccines, and the Forgotten History* (2015), by Suzanne Humphries, M.D., and Roman Bystryanyk.

Dr. Suzanne Humphries, nephrologist:

“When I pointed out the connection between vaccines and worsening or new-onset kidney failure to a couple of open-minded colleagues, they understood, started taking vaccine histories, and saw what was happening. Yet they remained silent. Most doctors continue to practice with comfortable indifference. Some see the errors, damage, and limits of their practices but still walk lockstep with the herd and protect the brotherhood. [...] I’ve had far more success reasoning with parents and intelligent people who are not attached to traditions that are damaging, unscientific, and not even supported by our own medical literature.”
