

# Unmasking Black America

by Charlene Muhammad, National Correspondent and NOI Research Group

Black and Latino people in America continue to mask up for fear of catching the sickness known as “COVID-19.” But the question remains, if “the pandemic is over”—as an unmasked President Biden said in September on *60 Minutes*, referencing the lack of mask-wearing all around him—why is it that Blacks are still attached to masking?

Why have so many Blacks chosen to willingly restrict their own breathing and to continually re-inhale so much of the waste that their bodies are trying to eliminate? Even those who say they believe that the governments of the world are in the midst of a massive depopulation program appear to accept that these same governments are earnestly trying to save them from a “pandemic” with “health policies” like lockdowns, mandatory masking, and social distancing. And this is still the case—*nearly three years later*—even though scientific evidence in at least 170 studies confirms the ineffectiveness of masks in stopping infection with and transmission of the very sickness they fear.

In a recent legal proceeding, the government’s top scientist Dr. Anthony Fauci could not cite a single study that supported the need for masking—not one. In fact, Fauci had repeatedly told the public not to wear masks. And in a February 5, 2020, email he wrote to a colleague that “the typical mask you buy in the drug store is not really effective in keeping out virus, which is small enough to pass through the material.” Yet face masks seem to have overtaken rabbits’ feet as the lucky charms of the day.

This unhealthy masking mindset is the result of the government’s relentless campaign of fear and intimidation designed to achieve its ultimate aim—to drive people to the depopulation “vaccine,” which is promoted as the only “cure,” the only road out of the darkness and “back to normal.”

“If “the pandemic is over”—as an unmasked President Biden said in September on *60 Minutes*, referencing the lack of mask-wearing all around him—why is it that Blacks are still attached to masking?”

The conspicuous presence of masks keeps fear alive in the population.

This is not some outlandish conspiracy theory. On the question of mask mandates, award-winning science journalist Laurie Garrett in 2018 cited a Japanese study that proved that *“the major efficacy of a mask is that it causes alarm in the other person and so you stay away from each other ... But did the mask really help them? Did the mask keep the [SARS] virus out? Almost certainly not. If the virus was around their face, the mask would not have made a difference.”*

Cellular and molecular biologist Dr. Christina Parks told *The Final Call*: “The point really is to make people think that this is ongoing. So, if everyone’s wearing a mask, there must still be a threat ... It’s a visual reminder [that there must be a pandemic]; otherwise, ... if your area isn’t having high COVID cases for many months, people might think the pandemic is over. And the authorities who are perpetuating [mask mandates] wouldn’t want that.”

# Unmasking

Continued from page 8

According to investigative journalist Jefferey Jaxen of TheHighwire.com, “there is now a push, an official attempt, to normalize masking for COVID, the flu, and other respiratory diseases like the common cold.” In a recent press briefing Rochelle Walensky, director of the U.S. Centers for Disease Control and Prevention (CDC), “encouraged” masking “to prevent the spread of respiratory illnesses.” But early in the “pandemic” the CDC’s own in-house journal presented a “systematic review” of the literature published between 1946 and 2018 and “**found no significant reduction in influenza transmission with the use of face masks.**” The CDC concludes: “There is limited evidence for their effectiveness in preventing influenza virus transmission either when worn by the infected person for source control or when worn by uninfected persons to reduce exposure.

Our systematic review found no significant effect of face masks on transmission of laboratory-confirmed influenza.”

The *New York Times* (Dec. 13, 2022), piggybacking on CDC propaganda—not the actual science—announced, “It’s Time to Wear a Mask Again,” claiming “Masks are back, and, this time, they’re not just for Covid-19” and warning its readers of a “triple-demic” of the coronavirus, influenza and respiratory syncytial virus (RSV), sweeping through the United States.” But, The Highwire points out, the very study the *New York Times* uses as “strong evidence” that masks “help to reduce the transmission of several respiratory viruses,” actually says the opposite! The study—“Facemasks and Hand Hygiene to Prevent Influenza Transmission in Households”—states conclusively: “Hand hygiene with or without facemasks seemed to reduce influenza transmission, but the differences compared with the control group were not significant.” Are government officials, media, and other institutions and organizations trying to establish a “new normal” of forever mask-wearing?

But what did we learn from the pandemic when it comes to masking children? Jefferey Jaxen highlighted a *New England Journal of Medicine* study of “Open Schools, Covid-19, and Child and Teacher Morbidity in Sweden,” a country that did not “lock down” its citizens or mask its children. The study noted, “Despite Sweden’s having kept schools and preschools open, we found a low incidence of severe COVID-19 among schoolchildren and children of preschool age during the SARS-CoV-2 pandemic.” A just-published study in the *Journal of Infection*, challenging the CDC’s own data set, found a “Lack of correlation between school mask mandates and pediatric COVID-19 cases ... .” In summary, that study stated, “we fail to find the same evidence that school mask mandates are associated with a reduction in [U.S.] county pediatric COVID-19 cases.”

Despite these conclusive scientific findings, Dr. Christina Parks explains, the belief in mask-wearing is more superstition than science-based logic: “People want to believe that face masks work, so they are kind of turning their brain off. It’s a form of magical thinking, such as when one goes to a movie, suspends one’s disbelief, and decides that people can fly. They’ve generated so much fear. I’ve seen very rational, reasonable people wearing a mask, and even though it’s just a regular medical mask, there’s holes everywhere—around your nose, the cracks around your mouth and your chin. How does anybody really think that that’s doing anything?” asked Dr. Parks.

Dr. Joseph Mercola points out that the CDC warns that “Cloth masks will not protect you from wildfire smoke,” but, he says, “the virus is 25X smaller than a smoke particle ... . So it’s like trying to stop a mosquito with a chain link fence.”

Stephen Petty, research scientist, engineer, and certified industrial hygienist, explained in his testimony before the New Hampshire Senate in January 2022 why facial coverings, including the better-engineered N95s, are ineffective for controlling viral respiratory illnesses: “Masks do not work on three levels—on a macro level, on an epidemiological level, and on a micro-scale.”

The most relevant study is out of Denmark, said Mr. Petty, where researchers looked at 6,000 or so participants—3,000 with surgical masks, and 3,000 without masks. The aim was to measure how many got COVID. **They found no difference in disease rate**, he stated.

Evidence from nine trials (3,507 participants) that studied physical interventions to interrupt or reduce the spread of respiratory viruses, found that wearing

a mask makes little or no difference. Epidemiologist Dr. Paul Alexander once served as a government health policy advisor. He writes that there are “More than 170 Comparative Studies and Articles on Mask Ineffectiveness and Harms”: “**The body of evidence indicates that face masks are largely ineffective,**” and “[c]urrent evidence implies that face masks can be actually harmful.”

## Masking Damages Health

In an August 2022 medical summit Dr. Parks informed participants that when one wears a mask, it may actually impair kidney function. “Your kidneys are actually trying to decrease the level of acidity in your blood, and so they’re really doing a lot to balance the pH. .... [Increased CO<sub>2</sub>] reduces blood flow to the kidneys, and it actually in many cases can lead to chronic kidney inflammation, which we refer to as nephritis.” Also, CO<sub>2</sub> breathed in dissolves into the bloodstream and becomes carbonic acid, which contributes to cancer in a chronically acidic bodily environment (acidosis), explained Dr. Parks.

“We have children wearing face masks every day, all day, and their airway isn’t really big enough to be forcing their air past this mask in and out ... . When does anyone get held accountable for this kind of brutality, which is what I’ll call it, because that’s what it [forced masking] is,”

said Dr. Parks.

Attorney Robert F. Kennedy, Jr., a strong critic of the government’s COVID policies, wrote in his new book, “A Letter to Liberals”: “Today, the last people in America still required to cover their faces are children, minimum wage earners, waiters, waitresses, servers, staff, and front-line ‘essential workers,’ who risk their lives to deliver meals and Amazon packages to the more privileged classes.” Mr. Kennedy says that “*the masks have become potent symbols of orchestrated fear, obedience, subservience, and the dehumanizing anonymity of being poor and powerless.*”

As shown, masking is very much like the “vaccine”: it provides no quantifiable health benefit and yet puts the user at serious risk of physical harm. The Honorable Minister Louis Farrakhan said that “we need to call a meeting of our skilled virologists, epidemiologists, students of biology and chemistry and we need to look at not only what they give us, we need to give ourselves something better.”

Those scientists have come forth and are very clear on masking. It is time to give ourselves something better.

"Before the vaccine was made, I warned us in the Name of Allah that this was a death plot....The way to get rid of two to three billion people [is] to offer you a vaccine."

—The Honorable Minister Louis Farrakhan, *Swan Song*

Appeals court says U.S. cannot mandate federal contractor COVID vaccines

Twitter Files Show Clear COVID Truth Suppression

Orthodox Jewish Women Are Reporting Post-Vaccine Menstrual & Fertility Issues

A U.S. appeals court said the White House could not require federal contractors to ensure that their workers are vaccinated against COVID-19 as a condition of government contracts.

The U.S. government has contracts with thousands of companies, and courts have said the issue could affect up to 20% of U.S. workers.

A panel of the 5th Circuit Court of Appeals voted 2-1 to uphold a lower court decision that blocked President Joe Biden's September 2021 contractor vaccine executive order in certain states after Louisiana, Indiana, and Mississippi brought suit to seek invalidation of the mandate.

The court said Biden wanted it "to ratify an exercise of proprietary authority that would permit him to unilaterally impose a healthcare decision on one-fifth of all employees in the United States. We decline to do so." The court's opinion said that such a broad interpretation of the law could give Biden "nearly unlimited authority to introduce requirements into federal contracts."

Illustrating that point, the court wrote, "hypothetically, the president could mandate that all employees of federal contractors reduce their BMI (body mass index) below a certain number on the theory that obesity is a primary contributor to unhealthiness and absenteeism."

From the start most legal analysts believed that Biden's executive order was illegal and would be overturned, so it seems to have been issued to make federal employees and contractors believe they had no choice other than to take the "vaccine."

A release of internal Twitter documents dubbed "Twitter Files" has revealed accounts were placed on various "blacklists" that sought to limit the reach of those accounts, including that of a doctor who expressed concern over COVID-19 lockdowns.

The uncovered Twitter censorship files show that Stanford University professor **Dr. Jay Bhattacharya** was "blacklisted" for raising questions about how school lockdowns might affect the nation's children. Several other doctors were banned from Twitter altogether.

In response to the revelation by Twitter's new owner **Elon Musk**, Dr. Bhattacharya said, "*I think the major problem has been that...people, regular people, scientists, whoever thinks that there's something really different than the narrative, you're going to get destroyed. That's happened over and over again, even for very prominent scientists,*" he said, adding, "*A lot of the censorship that's happened of scientific discussion comes from the top.*"

Bhattacharya is one of three lead authors of the **Great Barrington Declaration**, signed by over 60,000 doctors and researchers, plus 870,000 others, and made public in October 2020. Signers of the declaration decried the harm of the lockdown and recommended a course of action that undermined the "vaccine"-only agenda.

Dr. Bhattacharya tweeted this truism on December 20, 2022:

***"Censorship is the refuge of powerful people who have lost the argument."***

A new article series by investigative journalist **Etana Hecht** in the *Daily Clout* will examine the effect the Covid "vaccine" is having on fertility. She reports: "Some of the earliest reports of menstrual disruption post-vaccination came from the women of the Jewish Orthodox community, almost immediately after the vaccine rollout."

Orthodox Women Noted Post-Vaccine Menstrual Issues Early On

The Jewish Orthodox community is in a unique position when it comes to understanding the ongoing effect that Covid vaccinations are having on a wide variety of issues, with fertility and reproduction at the center. As more and more evidence arises confirming that mRNA vaccines harm women's menstrual cycles, leadership on the issue is arising from an unexpected source: Orthodox Jewish women and Rabbis in Israel and America.

Because of the sacred role of the mikveh (ritual bath) in marital life, this community was alerted early to menstrual suffering among its vaccinated women, and advocates in that community are now also raising alarms about a dramatic drop in birthrates—from five or six a week to one or two a month—as well as reports of a wave of births in which babies were missing a hand or a foot.

Hecht interviewed a rabbi and community leader of a Hasidic sect in New York. Among other alarming observations he made are the following:

***Birth Rate: The average number of births seen in Hasidic communities in NY has been cut in half. Pre-Covid vaccine, there was a consistent ~20 births per week across the various communities. The practice of announcing those births in community newsletters has been in place for decades, and there's a definitive sharp decline to ~10 births per week, beginning in 2021.***

**Infinitely Easier to Kill**

**"To put it bluntly: in earlier times, it was easier to control one million people than to physically kill one million people; today, it is infinitely easier to kill one million people than to control one million people."** — Zbigniew Brzezinski, United States National Security Advisor, 1992

2

“As I live, my desire is to destroy the so-called medical profession, because it is not a profession of healing; it is a profession of drugs.”

—The Most Honorable Elijah Muhammad

## Doctors Calling for a HALT to COVID “Vaccines”

Medical activist **Steve Kirsch** has compiled a list of prominent doctors and scientists who publicly called for a halt to the COVID vaccines *after* they were launched in December 2020. The list includes:

- Dr. Peter McCullough: March 10, 2021
- Dr. Geert Vanden Bossche: March 24, 2021 (possibly earlier)
- Mike Yeadon: May 15, 2021
- Steve Kirsch: May 25, 2021
- Byram Bridle: May 26, 2021
- Robert Malone: May 30, 2021
- Bret Weinstein: Jun 10, 2021

Others that should be mentioned where the exact dates are not known are Dr. Lee Merritt, Dr. Judy Mikovits, Dr. David Martin, Dr. Sucharit Bhakdi, Dr. Vladimir Zelenko, Dr. Luc Montagnier, Dr. Paul Alexander, Dr. Christina Parks, Dr. Pierre Kory, Dr. Ryan Cole, Dr. Aseem Malhotra, and many others.

But let us not forget that on July 4, 2020, **The Honorable Minister Louis Farrakhan**, in his monumental speech “The Criterion,” warned all who would listen to avoid the “vaccine” at all costs. *A full six months before the COVID shots were released* at the end of December of 2020, he said:

*“If you bring the Covid-19 vaccine and say you’re going to bring your army to force us to take it, once you try to force us, that’s a declaration of war on all of us. You only have this one life. Fight like hell to keep it and fight like hell to destroy those whose heart and mind is to destroy you and take your life from you...”*

And then he addressed the African people:

*“I say to my brothers and sisters in Africa: if they come up with a vaccine, be careful. Don’t let them vaccinate you with their history of treachery through vaccines, through medication. Are you listening? I say to the African presidents, do not take their medications...”*

Minister Farrakhan is following in the footsteps of His FATHER, The Most Honorable Elijah Muhammad:

*“Now the ‘thing’ is catching up with him with what his own hands have produced. And they are willing to confess that these things are not good for us. They are turning down much of their medication, which is absolutely poison and detrimental to us. It is prophesied in the Holy Qur’an that when the God of Truth, Freedom, Justice, and Equality Comes, He Will Force this evil world to confess their evil. And, this, they are doing. And, many of them are shocked over their own doings. And others are trying to teach you that their Brother is wrong.”*

## Top Pathologist Explains How Pharma Botched the Manufacturing of Covid Vaccine

**Dr. Ryan Cole, MD** (in photo), spoke at the Better Way Conference held in Vienna, Austria, Sept. 17, 2022:

“Where a lot of people dodged a bullet and a potential harm is when people lined up in stadiums or outside and had these vaccination clinics, these vials weren’t kept cold, and those fats turned into a glob of mush and the RNA broke down into nothing. So you got a shot of mush, which you’re lucky, very lucky—because it wasn’t kept cold.

“And so the other thing too is each vial from different lots is not the same concentration....When you stir lipid nanoparticles, polyethylene glycol, and mRNA sequences, you can’t agitate it quickly....When that happens the lipids kind of float to the top. Now you have thousands of vials going across an assembly line, spitting out the content, and the first couple thousand vials get a very dilute solution—you’re not getting a lot of dose of mRNA or lipid...

“But then at the end of that batch now you have some very concentrated lipid mRNA. So in each manufacturing run of this very poor manufacturing process, which has lots of debris in lots of vials and all these heebie-jeebies and creepy things, are mostly manufacturing debris. And that’s, again, what some of the mass spectrometry we looked at has shown: [the debris] is from stainless steel vats; it’s from aluminum seals; it’s from gaskets, etc.; it’s from crushed glass.

“A good manufacturing process in a drug development process takes years—like 5, 6, 7, 8, 9 years—until you have a product pure enough that you can repeat every single time that it comes off the line that it’s the same thing. You saw in that early European Medicines Agency [report] last year, [COVID-19 vaccine is] 50% pure. It’s supposed to be a 99+% pure product. That tells you everything you need to know right there....As a pathologist having looked at a lot of these, the more we look at, it’s bad manufacturing....But, a lot of people are lucky because of that.”

## California Bill AB2098 Would Force Doctors to Push Big Pharma Line

Medical censorship and the punishing of any doctor that did not practice vaccine-only policy made America have the very worst in pandemic outcomes. But now the state of California is about to make medical censorship a law, punishing any doctor that questions the medical dictators in Washington and their Big Pharma funders.

**Gov. Gavin Newsom** (in photo) signed AB 2098, a bill which will become law on January 1, 2023, and says that “physicians who engage in the dissemination of COVID-19 vaccine misinformation or disinformation risk losing their medical license, and that physicians have a duty to provide their patients with accurate, science-based information.” It appears to label doctors as enemies of the state, claiming “that some of the most dangerous propagators of inaccurate information regarding the COVID-19 vaccines are licensed health care professionals.”

The law’s definition of misinformation is “false information that is contradicted by contemporary scientific consensus contrary to the standard of care.” One commentator wrote, “Every California physician who, say, expresses an opinion challenging the safety of the vaccines for young people or the efficacy of masks or the legitimacy of the covid death count—that is, anyone who shares information about covid that’s not consistent with what the California Medical Board deems to be the official ‘scientific consensus’—will become a target of the Board for license suspension or termination.”

When one considers how “scientific consensus” during the last two years has been skewed by political corruption, corporate bribery, and media deception, it is easy to see how AB2098 means the loss of any remaining trust patients may have had in the medical system in California.

## Vaccine Corner

The following excerpt is from *Dissolving Illusions: Disease, Vaccines, and the Forgotten History* (2015), by **Suzanne Humphries, M.D.**, and Roman Bystrzyanskiy.

“Before improvements were made in hospital hygiene, hospitals were even more serious sources of infection than they are today. Hospitalism was a general term used to describe the negative influences upon infants in hospitals and asylums. During the 1800s, the public often believed that these dirty and overcrowded institutions were a danger to health and well-being....

“A 1977 analysis of the effect of medical intervention on the decline of mortality in the United States since 1900 stated how little medical measures had to do with disease decline....

“Unfortunately, the flawed belief that vaccines and other medical advances [chemotherapeutic, surgical, pharmaceutical] were responsible for this amazing decline has dictated how infectious diseases are treated today. Instead of an emphasis on hygiene, nutrition, and appropriate vitamin supplementation, immune system support, and natural remedies, the emphasis is always on costly antibiotics, vaccinations, and other medical procedures.”
