

The War Against Ivermectin: A Tale of Two Drugs

Ivermectin first exploded onto the scene as a potential therapeutic for COVID after researchers at Monash University in Australia published in April of 2020 that SARS-CoV-2 essentially disappeared from cell culture within 48 hours of being exposed to Ivermectin. Pulmonary specialist and critical care physician Dr. Pierre Kory, in his December 2022 series titled “The Timeline of Major Battles In the Global War on Ivermectin,” revealed that studies started being published in **2012**—a full **7 years** before COVID-19—showing Ivermectin’s ability to halt the replication of over 10 RNA viruses, including Dengue, West Nile, **Influenza**, Zika, and **SARS-CoV-1**. So, when the World Health Organization (WHO) declared this COVID-19 “pandemic” on March 11, 2020, there was published research that showed the possibility of Ivermectin destroying SARS-CoV-2, which causes COVID-19.

Professor Satoshi Omura, the Nobel Prize-winning co-discoverer of Ivermectin, in his Nobel Prize acceptance speech in 2015, called it “the wonder drug” not only due to its incredible **safety** as an anti-parasitic in humans but also due to its broad **anti-viral and anti-tumor** properties. Of course, if Ivermectin can be proven to effectively reduce cancerous tumors, a lot of drug companies would be put out of business.

Professor Omura partnered with Merck to develop Ivermectin into a patented drug to fight parasites and it was given full **FDA approval in 1987** to be used in humans. Since that time, Ivermectin has been safely given

by Dr. Ridgely Abdul Mu'min Muhammad

Professor Satoshi Omura Photo: satoshi-omura.info/

to hundreds of millions of people all over the globe to fight parasitic infections. According to Dr. Kory, in April of 2020 Professor Omura wrote to Merck for funds to study Ivermectin’s clinical efficacy in COVID. However, Merck refused to support this Nobel Prize-winner that it formerly partnered with. But Dr. Omura did not stop researching Ivermectin’s efficacy. He and his colleagues published a review paper on Ivermectin in March 2021, which said that, based on the then available 42 controlled trial results, Ivermectin was effective against SARS-CoV-2.

But while Dr. Omura and others were showing the efficacy of Ivermectin, Merck came out to smear its own product, which it had patented in 1987. However, when the patent ran out, which allowed other companies to produce Ivermectin, Merck held a press conference on February 4, 2021, just after the so-called COVID “vaccines” were rolled out, to announce that Ivermectin was

not safe or effective. But at the same time, Merck was making a synthetic product similar to its own Ivermectin that the company could get newly patented to fight COVID and get FDA-approved—and sell it for billions of dollars. Hospitals were not allowed to give Ivermectin to their patients, but they were told to give their patients the very expensive FDA-approved drug **Remdesivir**, then put them on oxygen and ventilators—a practice that has now been largely abandoned because of its negative results.

In terms of safety, according to worldwide data from the CDC and FDA, Ivermectin is 61 times safer than Remdesivir and even 68 times safer than Tylenol. Now compare that to the over 33,000 deaths attributed to these COVID “vaccines” since they were rolled out at the beginning of 2021.

Now Drs. Pierre Kory, Paul Marik, Peter McCullough and others are saying that of the over one million or more reported COVID deaths in the U.S., 700,000 could have been saved if their doctors had been allowed to give them the inexpensive, safe, effective, and readily available drugs Ivermectin and hydroxychloroquine (HCQ). Over the last 2

Tale of Two Drugs

Continued from page 8

years the Final Call Newspaper has published exposés, articles, and extensive news briefs in this special section, “COVID 19 and the U.S. Policy of Depopulation.” It suggests that the U.S. government has chosen not to cure the COVID-19 disease, but instead to use it to drive its population to accept untested experimental so-called vaccines produced at “warp speed.”

Information is coming out now that many of the deaths attributed to COVID may have been the result of the introduction of a drug called **Midazolam**. Midazolam has been used in executions by lethal injection. It can cause serious or life-threatening breathing problems such as shallow, slowed, or temporarily stopped breathing, which may lead to permanent brain injury or death. *The Daily Mail of Britain* asked a provocative question in a July 11, 2020 headline: “Did care homes use powerful sedatives to speed Covid deaths? Number of prescriptions for the drug midazolam doubled during height of the pandemic.” They report that prescriptions for the end-of-life drug “doubled at the height of the coronavirus crisis,” and that in the month of April 2020 prescriptions “increased by more than 100%.” And that this extraordinary rise was “raising fears it was used to control elderly residents in stretched care homes – or even to hasten their deaths.”

Data taken from the Office for National

Photo: Youtube

Statistics (ONS) shows us that during April 2020 there were 26,541 deaths in care homes, an increase of 17,850 on the five-year average.

This is **half** the amount of alleged COVID-19 deaths during the same period. On March 19, 2020, a directive was sent out to the NHS (National Health Service), with Matt Hancock’s authorization, instructing hospitals to discharge all patients who they deemed to not require a hospital bed.” These patients were sent to nursing home facilities.

The Exposé of November 11, 2022 reported that “According to official data in April 2019 up to 21,977 prescriptions for Midazolam were issued....However, in April 2020 **45,033** prescriptions for Midazolam were issued....That is a **104.91%** increase in the number of prescriptions issued for Midazolam...[and] these [prescriptions] weren’t issued in hospitals; they were issued by GP [General Practitioner]

practices which can only mean one thing, they were issued for end-of-life care....The spikes in production of Midazolam solution match the spikes of alleged COVID deaths within 28 days of a positive test.” This raises a

question as to whether the Midazolam could have contributed to deaths, that were designated as COVID Deaths, especially in nursing homes?

That Daily Mail report came just 3 days after the *New York Times* reported on July 8, 2020, that “The death toll inside New York’s nursing homes is perhaps one of the most tragic facets of the coronavirus pandemic: More than 6,400 residents have died in the state’s nursing homes and long-term care facilities, representing more than one-tenth of the reported deaths in such facilities across the country....At issue is a directive that [Gov. Andrew] Cuomo’s administration delivered in late March, effectively ordering nursing homes to accept coronavirus patients from

Execution gurney Photo: MGN Online

‘So, what we are looking at is while the United States and England were holding back **remedies to fight COVID, like Ivermectin, they were actively herding old people into rest homes, where they died in large numbers, increasing the overall death counts attributed to COVID.**’

hospitals.”

So, it seems that while the United States and England were holding back remedies to fight COVID, like Ivermectin, their actions with respect to the most vulnerable of our senior citizens may have greatly increased death counts, which were then falsely attributed to COVID.

So, as the American and British populations were being scared into receiving **gene-altering shots**, only 6% of Africa’s 1.4 billion population took those shots. Many leaders of the African countries heeded the warning from Minister Farrakhan on July 4, 2020, to keep those shots out of their countries, and they subsequently experienced many fewer COVID deaths. Many of these countries were steady users of Ivermectin to fight parasitic diseases, a health practice that has helped the Tribe of Shabazz (Black Africans) escape yet another genocidal death plot by the West.

DePopulation Briefs

"The fact that fasting is the cure to 90 per cent of our ills is known by the medical scientists. But, they do not teach you that." —The Most Honorable Elijah Muhammad

Top Cancer Expert: Aggressive Cancers Appearing After Vaccine Boosters

In a new video, a prominent cancer specialist and Professor of Oncology, **Dr. Angus Dalglish**, warns that cancer may be the result of the Covid "boosters":

"I have started to notice that several of my patients have melanoma who've been stable with stage 4 disease; they've had very good immunotherapy or other treatments and I've been reviewing them from 5 to 20 years. I've noticed that I have now over six, possibly seven, even an eighth yesterday, who've clearly relapsed following the booster vaccine...And these relapses are quite aggressive. They're not a gentle relapse..."

"But it's not just this. I'm now very much aware in my own circle of many people, they haven't got a melanoma—they've never had anything before—but they've got lumps and bumps and they're not feeling well. ...And I now know seven of them: two of them have leukemias, and the others have lymphomas, and one of them has a very bad melanoma, which he is absolutely sure was instigated by the booster, as he developed dreadful symptoms.

"So, really, I want to bring to everybody's attention that I think that this does not look like a coincidence to me and we need to join forces and see if this is a real effect, and if it is we must stop all the boosters immediately. Thank you."

Twitter Owner Elon Musk Suffered Serious "Vaccine" Side Effects

Elon Musk bought Twitter and reinstated many COVID policy critics that had been banned for their inconvenient truth telling.

The government and pro-vax media decried the purchase and tried to undermine Musk for his alleged free speech advocacy (note: several Nation of Islam accounts are still banned). As a result, (1) Twitter has become a major source of COVID policy analysis from a wider range of

medical authorities, and (2) Twitter has become NUMBER 1 on the App Store for all News. These Tweets from Elon Musk may help explain his COVID open door policy.

Critics of Covid jabs: A worrying increase in heart deaths

The *Telegraph* in Britain admitted recently that "heart deaths have increased alarmingly in the last few years. According to the British Heart Foundation, there have been around 30,000 more deaths than expected involving heart disease since the "pandemic" began—more than 230 additional deaths over expected rates each week."

In some weeks last year, there were more than 1,000 excess deaths with cardiovascular disease mentioned on the death certificate.

The *Telegraph* points the finger at other potential causes for this unprecedented rise in excess deaths, but their list includes several "pandemic" policies, such as lockdowns and work from home edicts, "which contributed to more sedentary lifestyles and a rise in alcohol intake...historic levels of obesity and heart disease."

But the lengthy list of nearly 1,300 side effects that Pfizer wanted kept secret for 75 years has among them many heart-related conditions:

Acute myocardial infarction; Cardiac amyloidosis; Cardiac arrest; Cardiac failure; Cardiac failure acute; Cardiac sarcoidosis; Cardiac ventricular thrombosis; Cardiogenic shock; Cardiopulmonary failure; Cardio-respiratory arrest; Cardio-respiratory distress; Cardiovascular insufficiency; Myocarditis; Pericarditis; Pericarditis lupus...

Further, Pfizer's own trial data showed there were four cardiac arrests in those who took the vaccine compared with just one in the placebo, "dummy treatment," group. As stated, Pfizer itself submitted this frightening damage report for the very product that the governments of the world called "safe & effective." So as the heart-related deaths continue to rise, Pfizer itself appears to have drawn a correlation between its "jab" and the mounting casualties.

Prof. Shmuel C. Shapira, a physician and head of Israel Institute for Biological Research for 8 years, the most senior medical-scientific position in Israel, said in a tweet: "They can try and deny it again and again. We see all over: Aggressive new-cancers Flaring of autoimmune diseases Valvular heart disease in healthy individuals Myocarditis, neurological, fertility [problems] etc. And the winner is sudden deaths."

Bill Gates Admits "Vaccine" Failure

"We also need to fix the three problems with vaccines. The current vaccines are not infection-blocking; they're not broad, so when new variants come up you lose protection; and they have very short duration, particularly in the people who matter, which are old people."

—Bill Gates

Vaccine Corner

An obstetrician-gynecologist by training, Dr. Christiane Northrup is a women's health expert and *New York Times* bestselling author; she was a frequent medical guest on the Oprah Winfrey Show. One of the first whistleblowers about what's in the COVID shots, she very early on in the "pandemic" bore witness to The Minister, publicly affirming in 2020 that the aim of the "vaccines" is to "cull the population"—"depopulation."

She is currently collecting data on how the "vaccines" are affecting women's reproductive health. Here are some of her observations:

"We are in a bio-war."

"We've had 1.8 million people dying suddenly since the roll-out of the Covid inoculations, which are not vaccines."

"9 million women were burned as witches [at the stake] in the Middle Ages. Who were they? Midwives; women who used herbs, the medicine of the earth. We're in another witch

hunt, but that's for people like me. [She quotes Dr. Naomi Wolf:] *'The American Government authorized the ruination of millions of women's bodies knowingly with this injection.'*...We were finding that women were having bleeding just being around recently inoculated people; little girls were hemorrhaging vaginally from being around recently inoculated grandparents.

"We [at MyCycleStory.com] now have a group of researchers working with what is going on with women's menstrual cycles. In the entire world literature, there were 40 cases of decidual cast shedding, where the whole inside of the uterus just kind of falls out [of the uterine cavity]. In our database of 6,000 women, we had 260 of these. In just 6,000 women.

"We also know that the placentas have been adversely affected by the shots. . . .They get calcified and the spike protein is found in the placenta.

"There's a 500% increase in stillborn babies, after the shots. There's an 80% miscarriage rate in women who had the shot in the first 20 weeks of pregnancy.

"This is the Dept. of Defense data, 2021: [an] 80% increase in congenital malformations of fetuses. . . . As James Thorp, MD, says: *'This [COVID shot] is a perfect storm that will eclipse the disasters of DES and thalidomide and make them look like a sunny day on the beach.'* I gotta tell you, folks: Stay away from conventional doctors who don't see this [the dangers of mRNA vaccines]."

"Safe and Effective" is not a lie—It's 2 lies.

2

"As I live, my desire is to destroy the so-called medical profession, because it is not a profession of healing; it is a profession of drugs."

—The Most Honorable Elijah Muhammad

Major TV Doctor Admits there's been 'overcounting' of COVID deaths

CNN medical analyst **Dr. Leana Wen** could always be counted on to provide TV backing for the destructive COVID-19 policies emanating from Washington. She famously added fuel to the "vaccine" narrative by claiming that "we know that we can't trust the unvaccinated" and that a citizen's participation in society should be tied to their vaccination status. "Because otherwise, if everything is reopened, then what's the carrot going to be? How are we going to incentivize people to actually get the vaccine?"

But she has now admitted something that would have quickly gotten her banned, blocked, and embargoed from ALL social media. The former Baltimore health commissioner wrote that hospitals have been overcounting COVID-19 deaths in the U.S.—by a lot.

"According to the Centers for Disease Control and Prevention, the United States is experiencing around 400 COVID deaths every day. At that rate, there would be nearly 150,000 deaths a year. But are these Americans dying from COVID or with COVID?"

The doctor claimed that "Understanding this distinction is crucial to putting the continuing toll of the coronavirus into perspective. Determining how likely it is an infection will result in hospitalization or death helps people weigh their own risk." Wen claimed that the actual COVID-19 death count could only be "30 percent of what's currently reported."

Dr. Wen wrote in a *Washington Post* column that most "patients diagnosed with COVID are actually in the hospital for some other illness."

She spoke to two infectious-disease experts, who told her they believed "the number of deaths attributed to COVID is far greater than the actual number of people dying from COVID."

Mentioning the first, she wrote, "Robin Dretler, an attending physician at Emory Decatur Hospital and the former president of Georgia's chapter of Infectious Diseases Society of America, estimates that at his hospital, 90 percent of patients diagnosed with COVID are actually in the hospital for some other illness."

Dretler told Wen, "Since every hospitalized patient gets tested for COVID many are incidentally positive."

Satan is Happy, But The Righteous Never Loved This World

Brothers, sisters, the Satan is happy. He makes the liquor, you drink it. He finds a purpose for the weed, you smoke it. This dude is so pleased to create disease, and then the drug manufacturers discover a pill for the disease, oftentimes that they create. So, now, when we get up in age...you're going to bed and waking up with a pill. You've got a box of pills by your bedside.

"I got to take this one. I got to take that one. I got to take this one and that one." In order to do what? In order to function in a world of sport and play to prolong a life that hardly has any meaning. When they come with natural remedies for some of these illnesses, the drug companies go to the government and they'll outlaw a natural remedy so that the drug company can make money from our illness. Just look at the world in which you live, we live."

—The Honorable Minister Louis Farrakhan, "The Four Jesuses," May 20, 2001

Wen noted how people with gunshot wounds or other serious illnesses often test positive for the virus, and wrote: "If these patients die, COVID might get added to their death certificate along with the other diagnoses. But the coronavirus was not the primary contributor to their death and often played no role at all." Wen recounted another doctor's experience at Tufts Medical Center, writing, "During some days, she said, the proportion of those hospitalized because of COVID were as low as 10 percent of the total number reported" who had COVID.

Of course, the many who blew the whistle on this COVID overcounting three years ago were quickly dismissed from society and labeled "conspiracy theorists." But it now appears that the cash incentives that the media and hospital administrators received to label every patient a "COVID case" led to massive misdiagnosing and rampant overcounting, which led *not* to health-driven protocols but to panic-driven lockdown, mask, and vaccine mandate policies.

Prof. Shmuel C. Shapira, MD, MPH, is the former Director of Israel Biological Institute, the most senior medical-scientific position in Israel. He has made a series of Tweets (@shmuelcshapira) highly critical of the mRNA "vaccine":

"Marketing of an efficient, healthy and safe product, does not require pressures, threats and such an aggressive-expensive propaganda."

"I am pro vaccines, but Covid mRNA injections are not vaccines. These pseudo-vaccines have severe side effects and can damage multiple organs."

I was wrong 3 times:

- * Taking the first mRNA shot
 - * Taking the second mRNA shot
 - * And again taking the third mRNA shot
- Unfortunately, irreversible mistakes.

"FDA Approved" Means Little, As Recalls Are Rampant

On average, about 4,500 drugs and devices are pulled from U.S. shelves each year. The recalled products have U.S. Food and Drug Administration (FDA) approval and, in many cases, are widely ingested, injected or implanted before being recalled. Although the FDA may identify concerns regarding the safety of a drug, it is the responsibility of the manufacturer to initiate and execute a recall. On the other hand, the FDA can mandate the recall of a device.

As a consumer, it is important to be aware of devices or drugs that may affect your health. In 2017 alone, manufacturers recalled 4,402 drug and device products, according to the Center for Devices and Radiological Health and the Center for Drug Evaluation and Research. Of those recalls, the FDA classified 139 as Class I. Class I recalled products have the potential to cause serious harm or death.

You may sign up to receive "Recalls, Market Withdrawals and Safety Alerts" at <https://www.fda.gov/safety/recalls-market-withdrawals-safety-alerts>.

U.S. Soldiers forced to pay back signing bonuses after refusing COVID "vax"

U.S. service members who were fired for refusing to accept the Pentagon's COVID-19 vaccine mandate are now being forced to pay back their original recruitment bonuses. According to Fox News, they were told that because they "did not complete the commitment" to their contract with the Army, they were not entitled to keep the bonuses.

The 8,400 soldiers who were fired for refusing the dangerous poison shot that has now killed at least 33,746—half the number of Americans who died in Viet Nam—say they feel that this is a punitive move by their own government, a "final kick in the face."

Secretary of Defense Lloyd Austin (in photo) acted to remove letters of reprimand from troops whose exemption requests to the vaccine were denied. And President Biden signed the 2023 National Defense Authorization Act, which included a provision that repeals the military vaccine mandate, yet the signing bonuses are still being rescinded. The issue of back pay for those who rightly stood against the policy is not an issue the Pentagon is "pursuing."

"The appalling treatment these individuals endured broke the trust that is owed to our citizens and our volunteers. America's sons and daughters," the Army member said in a statement. "Until true efforts are made to establish trust, the recruiting and retention shortfalls will only continue."
