

# Minister Farrakhan has warned the world not to take the COVID-19 'vaccines'

**O**n July 4, 2020, the Honorable Louis Farrakhan warned the world, in "The Criterion": "Don't take the vaccines. There are 14 therapies that are in the world today that we can use to fight against the Covid virus."

to execute convicted murderers.

When the so-called vaccines were rolled out at the end of December 2020, the nation's leading COVID-19 "vaccine" advocate Dr. Anthony Fauci promoted them as being **100%** effective at preventing infection and stopping the spread of the "COVID-causing virus." But just nine months after the rollout of these "Warp Speed" produced drugs, he started telling people they need to take "booster" shots.

By February of 2023, Fauci was saying, "I got **infected** even though I was **vaccinated and boosted**, but I had a very mild infection."

In a November 23, 2022, article in the *Washington Post*, it was reported that "58 percent of coronavirus deaths in August [2022] were people who were vaccinated or boosted ... ." Not only were these shots not effective at stopping the spread of COVID, but they were also the deadliest "vaccines" in the history of vaccines, with over 34,000 deaths and millions of adverse events. Before these drugs were adequately tested, pregnant women were advised by the U.S.

government to take these shots. However, Dr. James Thorp—an OB-GYN for nearly 44 years who has testified before the U.S. Congress and has published over 200 medical studies—said in a February 2023 interview published in The

Dr. Joseph Mercola

Final Call that "the number of miscarriages has jumped to over 80% since the COVID shots came out!"

Now, let's look at a recent article published on January 24, 2023, by the Children's Health Defense, titled "Africa Didn't Follow WHO's Pandemic Script. Guess What Happened?" The author, Dr. Joseph Mercola, states:

"There are clear contradictions between the World Health Organization's directives regarding the need for COVID-19 shots in Africa and the actual situation on the ground. The WHO is still calling on all countries to get the COVID-19 jab into at least 70% of their populations and warns that developing countries are at grave risk due to low jab rates. Meanwhile, Africa, where less than 6% of the population is jabbed, has fared far better than countries with high injection rates." In fact, COVID-19 in such

countries as Uganda is not even considered a serious health issue.

The article continues:

“The explanation for the disconnect between the WHO’s priorities and what’s happening in Africa can be explained when you look at the focus of the WHO’s Catastrophic Contagion exercise. It focused on getting African leadership trained in following the pandemic script. The WHO needs additional pandemics in order to justify its pandemic treaty, which will give it sole power to dictate countermeasures, and it needs to eliminate the African **control group**, which shows the COVID-19 ‘vaccines’ do more harm than good.”

So, the WHO is intent on getting countries in Africa and all over the world to sign its “pandemic treaty,” but Africa is resisting such medical tyranny. Forty-seven African countries on May 24, 2022, acted as a united front to block amendments submitted by President Joe Biden to the WHO which would allow it to override the power of individual countries to respond to a “pandemic” declared by the WHO. Having the capability to override a country’s own right to self-determination would mean that this one Bill Gates-controlled and privately funded organization based in Switzerland would be able to mandate vaccines and masks and lockdowns and business and school closings and any other unscientific and economy-destroying measures. Later, U.S. Senator Ron Johnson on May 27, 2022, and again on February 28, 2023, introduced the “No WHO Pandemic Preparedness Treaty Without Senate Approval Act.” He and other U.S. lawmakers have concerns about protecting U.S. sovereignty during future global health crises. One of the many issues at stake is the global vaccine passport.

According to Senator Johnson’s government website, his bill would “require any convention, agreement, or other international instrument on pandemic prevention, preparedness, and response reached by the World Health Assembly to be subject to Senate ratification.” The World Health Assembly is the forum through which the World Health Organization is governed by its 194 member states. It is the world’s highest health policy-setting body and is composed of health ministers from member states.

In a recent statement, Sen. Johnson said: “The WHO, along with our federal health agencies, failed miserably in their response to COVID-19. This failure should not be rewarded with a new international treaty that would increase the WHO’s power at the expense of American sovereignty. I’m proud to reintroduce legislation to hold the WHO accountable for their failures and increase transparency for the American people. The sovereignty of the United States is not negotiable.”

Not only is the Biden administration trying to turn over to the WHO the health and safety of the American people, go to [whitehouse.gov](https://www.whitehouse.gov) and read how the Biden administration, as of November 22, 2022, is still trying to stick a needle in every arm: “FACT SHEET: Biden Administration Announces Six-Week Campaign to Get More Americans their Updated COVID-19 Vaccine Before End of the Year.” What is Biden’s real agenda, since there are more people dying from COVID who took the shot than those who did not get jabbed?

Instead of continuing to try to persuade or mandate that Americans take a shot that does not stop infection or transmission or death from this coronavirus, why not provide the American people with what the Africans are using to stop this virus from killing their people? They use proven drugs like Ivermectin and Hydroxychloroquine. The American government gave Moderna and Pfizer \$11 billion for shots that did not stop COVID but, rather, killed at least 34,000 people just in America. Along with bringing criminal charges

against all of those involved with this plot to harm the American people, the government should provide these safe and effective remedies free of charge to all of America’s citizens. And if the government claims that it does not have the money, Americans should demand their money back so that they can be healed and not killed by slick profiteering producers and peddlers of poisons masquerading as vaccines.

America is a country that Black people built with their blood, sweat, and tears, but has now become Satan’s home base. And we must now **Separate** and *do for self* and take care of ourselves, like we had to do when we came up out of slavery 158 years ago. The Most Honorable Elijah Muhammad warned us not to fall for the trick of integration, so we are now wedded to a failing medical and economic system. Let us unite and “set up a clean glass”—a parallel system of healthcare and a parallel economy—so that we don’t “fall a victim to” the inevitable fall of Satan’s world.

## Mississippi Doctors, Scientists Demand End to ‘Vaccines’

### The Testimony of Dr. Christina Parks

Dr. Christina Parks Photo: Final Call file

*[Section Editor’s Note: Physicians, vaccine-injured people, and medical whistleblowers spoke recently at the Mississippi Capitol building demanding an end to the deadly government injections claimed to be “vaccines.” The medical freedom organization Mississippi Against Mandates (MAM) organized the Mississippi Medical Freedom Conference in Jackson, Mississippi. Among the expert witnesses sharing gripping testimony was Cellular and Molecular Biologist, Dr. Christina Parks, who arrived after attending Saviours’ Day in Chicago the day before. Here are Dr. Parks’ remarks on behalf of science and the people of Mississippi.]*

My name is Dr. Christina Parks. I received my Ph.D. in Cellular and Molecular Biology from the University of Michigan and did my graduate work in the area of cytokine signaling. The degree that I hold is very much involved with how to manipulate genetic material as was done in the production of these new gene-transfer vaccines for COVID. Recently Pfizer has been in the news due to a Project Veritas video that brought into question whether Pfizer was doing

“gain-of-function” research. People tend to understand that “gain-of-function” research might result in the creation of a more virulent form of the SARS CoV-2 virus. Thus, most people recognize this as a dangerous and unethical avenue of research.

However, it seems that we’ve missed seeing the hazards and immorality in using “gene-transfer” technology for vaccines. The issue we should be focusing on is why our scientists and government decided to force millions, if not billions, of people

# End to vaccines

Continued from page 9

to be injected with a product that forces the body to produce a toxic, foreign viral protein when they knew this would cause the body to attack the cells producing it, as the cells producing the spike protein would be seen by the body as “foreign” invaders. You don’t need a Ph.D. to recognize that this is an astonishingly bad idea.

Not surprisingly, an avalanche of data is coming out showing that tissues throughout the body are expressing the toxic, foreign spike protein for many, many months and that immune cells are infiltrating and causing inflammation and destruction in areas where the spike protein is being made. Pfizer’s own data show that their nano-lipid particles [a part of the mRNA vaccine] are absorbed by fatty tissues. So, we have areas like the bone marrow, the adrenal glands, the ovaries and the heart making spike protein and then being infiltrated and attacked by the body’s own immune cells.

We absolutely need to stop injecting people and especially children with this technology until all safety signals—such as myocarditis, menstrual issues, miscarriage, neurological disorders and cancers—have been thoroughly studied. All medical procedures should be accompanied by informed consent and individualized care. However, there hasn’t been any attempt to consider the specific needs of people of African de-

scent during this vaccine roll-out. The work of Dr. Gregory Poland from the Mayo Clinic established that persons of African descent respond more vigorously to vaccines containing RNA viruses and may need a lower dose. Persons of color also have high rates of gene mutations that are protective for malaria but may compromise the body’s ability to carry oxygen when the body is stressed, such as following receipt of a COVID vaccine. Were any of these susceptibilities screened for prior to vaccination? No. Does our government really care about Black people? I would say the answer is a resounding ‘No.’ Many Black Mississip-

pians may have heard stories of their family members being experimented on in prison in the past. And Anthony Fauci has continued the legacy of using Black people as guinea pigs by using healthy Black orphans to test toxic HIV medications. The WHO (World Health Organization) recently ran a “Tetanus vaccine campaign” in Kenya, but the vaccine being used was found by independent labs to contain the hormone necessary to sustain pregnancy. Women who got it would have made antibodies to their pregnancy hormone, rendering them sterile.

In the wake of marginalization and exploitation of Black peo-

ple in America and around the world, it is now Mississippi’s turn to decide how it will treat its Black citizens. Will Mississippi legislators pull back on all mandates until concerns about this experimental technology are thoroughly researched, or will they demand that their residents BE the experiment? Will they demand that YOUR children be the experiment even though they know the vaccines have not been tested for their effects on fertility and cancer? Will Mississippi legislators demand true informed consent and individualized medicine, or are they comfortable with medical authorities stream-

rolling the legitimate medical concerns of Black Mississippians yet again?

In 2014, CDC Senior Scientist Dr. William Thompson came forth as a whistleblower and admitted that the Centers for Disease Control had shredded data showing that Black boys were around 3-4 times more likely to be diagnosed with autism if they [following the CDC’s vaccine schedule] were vaccinated with MMR on time, rather than late. I commend him for standing on truth. However, our Black boys are STILL getting this vaccine in amounts and according to a schedule developed using their white counterparts. It will take more than one person standing on truth to change this system. It will take you. Will you stand for the truth? Will you stand for righteousness? Will you stand for the future of our children?
