by Dr. Ridgely Abdul Mu'min Muhammad

“Many of us who pursue a profession in life never give a second thought to the fact that ‘farming and agriculture’ is the first profession that Allah (God) introduced to man. If we study the Book of Genesis (2:2), it represents the beginning of this world and also represents the beginning of every nation. In Genesis, God—after He worked six days creating the heavens, the earth, the rivers, the lakes, the fish, the cattle, the herbs, the insects, the trees, the birds, the bushes—He lamented, saying, ‘*And there was no man to till the ground.*’ So in the second chapter of Genesis, verse 15, it reads: ‘*And the Lord God took the man*’—that He had made—‘*and put him into the Garden of Eden to dress it and to keep it.*’

According to the dictionary, ‘**to dress**’ means ‘to make or set straight; to prepare for use or service; to add decorative details or accessories to; to trim, to ornament or adorn; **to cultivate, to tend.**’

God gave Adam earth, but in the ‘breathing into Adam of His Spirit’ (Gen. 2:7), He had to give him the knowledge of ‘how to do’ what He asked him to do. If Adam was to ‘dress the Garden,’ he needed **the knowledge of how to cultivate** what he had been given. So ‘The Gift of God to Man’ is **earth**; and, also, the knowledge of **how to dress it**. And ‘the fowl and the cattle’ that are on that land (Gen. 2:20) teaches us that **the second profession** after ‘farming’ is **animal husbandry**. The point

‘These men, government agencies, and corporations are trying to usher in a “brave new world” of “food” manufacturing without farmers or land. In fact, although thousands of acres of land are being bought up by Bill Gates and others, there is a strong indication they don’t intend to farm this land at all. Witness a cncb.com article published on October 2, 2022, titled “How John Deere plans to build a world of fully autonomous farming by 2030.’

that we are making is that the first profession, as the basic support for all labor and all divisions of human labor, is the labor of **tilling the ground**—‘farming,’ ‘feeding oneself’—and taking care of ‘**the gift of animals**’ that The Creator has given for the benefit of man. So ‘**farming**’ and ‘**animal husbandry**’ are the first professions and are the engine of every nation.”

—The Honorable Minister Louis Farrakhan, “Farming Is The Engine Of Our National Life,” from *The Time And What Must Be Done*, Part 36, September 14, 2013

Photo: MGN Online

A recent ABC News article announced that the “USDA approves first ever ‘cell-cultivated meat’ for two American manufacturers,” synthetic meat companies that produce and sell “chicken grown from animal cells in bioreactors.” The June 22, 2023, article points out that cell-cultivated meat will officially become part of the U.S. food system. UPSIDE Foods and GOOD Meat are the first cell-cultivated chicken meat producers to be approved for commercial sales nationwide.

The article further states: “The food and agriculture manufacturing industry has hailed this

Continued on page 9

Satan pushes

Continued from page 8

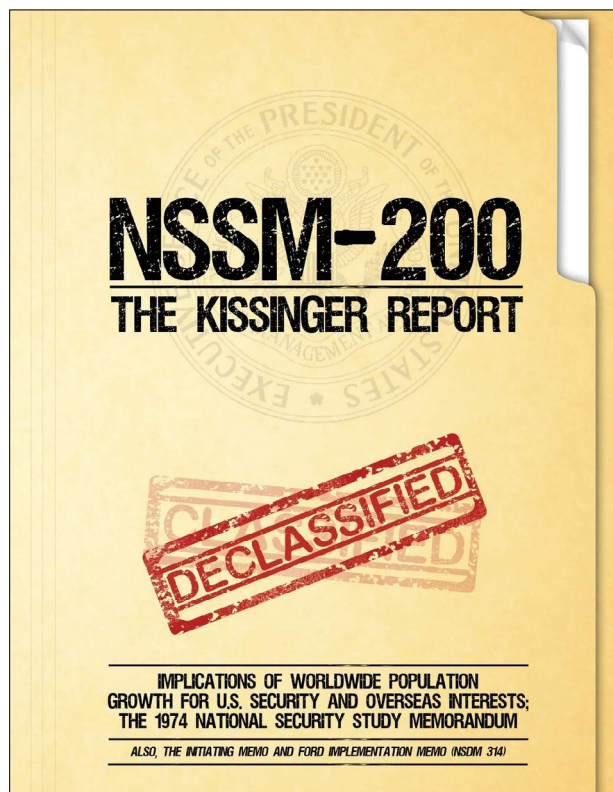

as a ‘historic’ moment—after years of investment in UPSIDE Foods from Bill Gates, (British billionaire entrepreneur) Richard Branson and Whole Foods founder John Mackey—as scientists tout the lab-cultivated meat as a possible solution for global warming, inhumane treatment of animals and growing global hunger.”

On the surface, the hype sounds good, but here we have the leading depopulator Bill Gates popping up again to use his billions to take us down a fake food path. But is the fake meat industry an environmentally friendly and sustainable way to feed the world? According to recent studies, lab-cultured meat is worse for the environment than cattle in animal-confinement industrial facilities. As reported by the *San Francisco Chronicle*, researchers at UC Davis warn “there’s a big environmental downside to lab-grown meat” that isn’t part of the “global warming” conversation. And is this lab-cultured artificial meat even safe to eat? Or is it toxic? And why is the U. S. Department of Agriculture (USDA) approving the production of fake food instead of promoting actual “agriculture”? Is the USDA working for the farmers or the biotech “food” manufacturing industry?

By definition, agriculture is “the science, art, or practice of cultivating the soil, producing crops, and raising livestock and in varying degrees the preparation and marketing of the resulting products.” But this lab-grown “meat” is not an “agricultural” product, because it is manufactured from “cells” in “bioreactors”—not on soil and not from livestock.

Daniel R. Glickman is described on Wikipedia—not as a farmer but as “an American politician, lawyer, lobbyist, and nonprofit leader (and) CEO of the Motion Picture Association of America.” Yet he was the head of the USDA, serving as the Secretary of Agriculture under President Clinton from 1995 until 2001. Glickman—like Gates—has no training as an agriculturist, yet he is pushing this “fake meat” as a member of the GOOD Meat Advisory Board. He said after the USDA’s fake-meat approval: “I commend the agency’s current leadership for working collaboratively with their FDA colleagues and the GOOD Meat team to reach this significant regulatory milestone Today’s approval demonstrates that the United States is a global leader in the promising alternative protein space while also continuing to support family farmers’ efforts to feed the world through conventional food and agriculture techniques.”

So how does the replacement of farm-grown livestock with “alternative protein” from “bioreactors” support family farmers? Why is Dan Glickman

on the board of a fake meat manufacturer? He is the same Glickman named as the defendant in the *Pigford v. Glickman* class action lawsuit against the USDA, the federal agency that had racially discriminated against Black farmers in its allocation of farm loans and assistance from 1981 to 1996. What’s more, GOOD Meat is a division of the food technology company Eat Just, Inc., which in 2015 was recognized by Klaus Schwab as a World Economic Forum “Technology Pioneer.” He is the same Schwab that formed a 40-year-plus friendship with Henry A. Kissinger, author of the National Security Study Memorandum 200 (NSSM-200), wherein the Secretary of State argued that for America to control the strategic resources of Third World nations it must actively reduce their populations by millions of lives. The

Texas farmland Photo: MGN Online

depopulation agenda outlines, among other actions, weaponizing the global food supply. The April 1974 memo, by the way, was addressed to the Secretary of Defense, the Director of Central Intelligence—and the Secretary of Agriculture, among others.

These men, government agencies, and corporations are trying to usher in a “brave new world” of “food” manufacturing without farmers or land. In fact, although thousands of acres of land are being bought up by Bill Gates and others, there is a strong indication they don’t intend to farm this land at all. Witness a *cnn.com* article published on October 2, 2022, titled “How John Deere plans to build a world of fully autonomous farming by 2030.” This article states: “The autonomous 8R (self-driving, driverless tractor) is the culmination of Deere’s nearly two decades of strategic planning and investment in automation, data analytics, GPS guidance, internet-of-things connectivity and software engineering.” So, what will crop farmers do after John Deere has trained their AI (artificial intelligence) replacements?

It seems that crop farmers, dairymen, and livestock farmers have fallen into the category of “useless eaters,” and their children will go the way of the children of Black farmers, who were put out of business by the racist, predatory policies of the USDA. Will the American government herd the white farmers into cities and feed them Bill Gates-financed fake meat and gene-spliced crops engineered with his beloved vaccines? Is this his move to override America’s growing “vaccine hesitancy” now that the poisonous “COVID-19 vaccines” have killed at least 35,443 Americans?

So, after White farmers rejoiced in getting the land of the displaced Black farmers, it seems that the USDA, FDA, Bill Gateses, Klaus Schwabs, Henry Kissingers, Richard Bransons and Dan Glickmans of the world have something in store for White American and European farmers. European farmers in the Netherlands and now Ireland are protesting their government’s attempt to force them to kill “God’s ‘gift of animals’”—their cattle—to

“reduce global warming.” We showed the fallacy in blaming global warming on cattle, in our previous *Final Call* article titled “Future of Food: Control the Food, Control the People.” Fox News just reported on a new strand of the “bird flu virus,” found in South Africa—just in time for a mass culling of farmed birds and the rollout of the fake chicken now ready for the global market. Coincidence?

This latest, fake-food attack on farmers is clearing the land for the planned “food” manufacturing facilities and these “fake food” companies will make billions of dollars feeding you something that never had any wings or feet and was never alive—a lab-cultured, artificial “abomination.”

Well, who will you say your prayers to when you “bless” your meals, God or Gates?

“The fact that fasting is the cure to 90 per cent of our ills is known by the medical scientists. But, they do not teach you that.” —The Most Honorable Elijah Muhammad

All over the world Cancer Rates Are Rising Among Young People

From breast cancers to blood and bone marrow cancers to gastrointestinal cancers and reproductive organ tumors, early-onset cancers have become nearly epidemic in younger age groups: 30% for myelomas alone, and 45% for colorectal cancers.

In the adolescent and young adult ages spanning 15 to 39, the rates have gone up 20%. And “experts” say they have no idea why. A June 15th article in TheHill.com by Annika Neklason says it may be the “prevalence of chronic conditions and lifestyle factors like obesity, diet, diabetes, and sedentary lifestyles...”

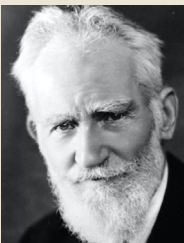

In the U.S., the rate of early-onset cases rose by almost 18 percent between 2000 and 2019, even as cancer declined slightly in older adults, according to data from the **National Cancer Institute**.

Neklason writes that these increases have spanned genders, races, and organs. “It has stormed through young people’s blood and bone marrow, launched assaults on their gastrointestinal tracts, quartered itself in their reproductive organs.” The incidence of breast cancer in Americans aged 15-39 rose more than 17 percent over the 19-year period. Myeloma rates spiked by over 30 percent. Colorectal cancer by nearly 45 percent.

DEPOPULATION in HISTORY

In one infamous interview published in 1934 in *The Listener* (BBC Magazine, London), writer George Bernard Shaw could not have made his views on eugenics clearer:

“I think it would be a good thing to make everybody come before a properly-appointed board, just as they might come before the income tax commissioner, and say every five years, or every seven years, just put them there, and say, ‘Sir, or madam, now will you be kind enough to justify your existence?’ If you’re not producing as much as you consume or perhaps a little more, then, clearly, we cannot use the big organizations of our society for the purpose of keeping you alive, because your life does not benefit us and it can’t be of very much use to yourself....I appeal to the chemists to discover a humane gas that will kill instantly and painlessly. In short, a gentlemanly gas—deadly by all means, but humane not cruel.”

Pro Basketball Player Dies, Angrily Blamed “Vaccine” for Heart Failure

Professional basketball player **Oscar Cabrera Adames** died of a heart attack while undergoing a stress test at a health center after being diagnosed with myocarditis (inflammation of the heart muscle). He was only 28 years old. On Instagram, Cabrera blamed the vaccine mandates required for international travel. Here is a translation of his post:

*“I got a damn Myocarditis from taking the f***ing vaccine. (I got 2 doses of Pfizer) And I knew it! Many people warned me. But guess what? It was compulsory or I couldn’t work. I am an international professional athlete and I am playing in Spain. I have no health problem, nothing, not hereditary, no asthma, NOTHING! I suddenly collapsed to the ground in the middle of a game and*

almost died. I’m still recovering and I’ve had 11 different cardiology tests done and guess what? They find nothing. I have no cholesterol, no fat, nothing! 7% body fat 93% muscle. When they give me the diagnosis, they tell me that I won’t be able to play for at least 5 months until my heart goes down again, and they can’t give me medicine. Do you know why? Because they can’t find the damn cause of myocarditis! 11 tests and nothing found in one of the best hospitals in Spain! A fully healthy first-class athlete now I got screwed over the damn vaccine... Don’t give me [that line that] there are people that nothing happens to them—but others do! It is Russian roulette that is being played.”

According to the American Heart Association, myocarditis can weaken the heart and reduce its ability to pump blood, making strenuous physical activity potentially fatal. The CDC says the COVID “vaccine” has caused more than 27,000 cases of myocarditis and pericarditis (inflammation of the lining around the heart), and over 20,000 heart attacks. One of the world’s top cardiologists, **Dr. Peter McCullough**, explained that what we are seeing is a rise in “vaccine-induced” heart disease, especially myocarditis, and once diagnosed patients are told not to exercise, as it “can trigger sudden cardiac death.” Many athletes never feel “COVID-19 vaccine” myocarditis, which he said “explains why so many athletes are dying.”

3 Years Since Historic July 4, 2020, Speech by Hon. Min. FARRAKHAN Saves Untold Millions from Killer Shot

It has been three years since **The Honorable Minister Louis Farrakhan** presented to the world the divine “Criterion” in which he offered guidance to America and the world on a range of spiritual, political, social, and economic issues at a critical juncture in history. His admonitions were clear and decisive, his analysis penetrating and incisive, so it is prudent that we examine The Minister’s words on the most pressing subject of the moment—COVID-19.

“I say to my brothers and sisters in Africa: if they come up with a vaccine, be careful. Don’t let them vaccinate you with their history of treachery through vaccines, through medication. Are you listening? I say to the African presidents, do not take their medications...”

“They’re...now plotting to give seven billion five hundred million people a vaccination. Dr. Anthony Fauci, Bill Gates and Melinda, you want to depopulate the earth? What the hell gives you that right? Who are you to sit down with your billions and talk about who can live and who should die? That’s why your world is coming to an end quickly because you have sentenced billions to death. But God is now sentencing you to the death that you are sentencing to others.”

Those powerful words were spoken in the midst of lockdown/mask-up mania and months before the roll-out of a bio-weapon disguised as a medical savior—the “COVID-19 Vaccine,” which has now killed more than 35,000 people and devastated the immune systems of billions.

Almost entirely alone among the leaders and influencers of Blacks, **Minister Farrakhan** implored Africa to reject this satanic plot, and Africans responded overwhelmingly. Africa had the **LOWEST** vaccination rate and the lowest death rate from the pestilence known as COVID-19. Per capita Africans did FAR better than the “medically advanced” white nations, including the Fauci-led USA. According to Statista data, Fauci policies in America resulted in a death count of 333 per 100,000 population, whereas most African countries saw only 1-5 deaths per 100,000.

And while many insufferable negro leaders allowed themselves and those who trusted them to be led Tuskegee-like to take a deadly guinea pig “vaccine,” employees of the Centers for Disease Control and Prevention were trying to warn us that their bosses were racist to the core. Just a few days after **The Minister** told the world of their depopulation plot, it was reported that over 1,400 CDC employees signed a letter demanding the organization “clean its own house” of what they describe as a “culture of toxic racial aggression, bullying and marginalization.” They wrote: “We are hurt. We are angry. We are exhausted. And ultimately, we fear that, despite the global protests, little will be done to address the systemic racism we face each and every day.” Yet, despite clear guidance from The Minister AND the CDC’s own employees, many of us still took the shot.

C.D.C. Employees Accuse Agency of ‘Toxic Culture of Racial Aggressions’

More than 1,000 employees signed a letter criticizing the agency for “scant progress in addressing the very real challenges Black employees experience.” **New York Times, July 13, 2020**

2

“As I live, my desire is to destroy the so-called medical profession, because it is not a profession of healing; it is a profession of drugs.”

—The Most Honorable Elijah Muhammad

Watch the Weather: U.S. Charged with Creating Droughts in Countries it Targeted for Takeover

on the floor of the UN, like the leader of Iran. They have sophisticated atmospheric monitoring equipment and they stated, with no ambiguous terms, that NATO was cutting off their precipitation, which destabilizes food productions and thus populations.

“Climate engineering operations are the crown jewel of the military-industrial complex. Remember that it’s a weapon by which they can bring populations to their knees without those populations ever even knowing or understanding that they are under assault. Crush crop production and blame it on nature. That is the MO [modus operandi]...”

**The Honorable Minister Louis FARRAKHAN
SAVIORS’ DAY 2013**

“Now, look, we have a little farm in Michigan. Even in the midst of the worst drought in years, we had our greatest years of navy beans since we’ve been planting beans since 1985. That is God saying to us, ‘I am with you. Even though others don’t get rain, watch, you will survive. I will heal your land.’ See, rain comes from the scientists that can make it rain, rain and good weather. He said, if righteous people come into their ownership of land even though our land is cracked up on the drought, let us have it. We’ll show you rain falling from the sky. Our crops growing from the earth. The righteous have to be the stewards of God’s land and we’ll feed ourselves—and we’ll feed White people, too.”

Weather researcher **Dane Wigington** produced the documentary **THE DIMMING**, an eye-opening exposé about the extensive weather modification programs being run by the U.S. government and many others. It can be viewed on the website **geoengineeringwatch.org**. Wigington says that “the Western US is under siege by covert weather warfare that is causing crop failures, food shortages, farmer bankruptcies.” And he says that **Bill Gates** is “ready and waiting to buy their land for pennies on the dollar, as the largest buyer and owner of farmland in the US.”

Wigington then makes a startling observation about Gen. **Wesley Clark**’s statement that after 9/11 he (Clark) was shown a list of 7 target countries in the Middle East that had been marked for invasion by the US military-industrial complex in the next 5 years. **Iraq** would be first, and then **Syria, Lebanon, Libya, Iran, Somalia** and **Sudan** (see map).

Of course, this follows the model laid out in **Henry Kissinger**’s now-infamous secret 1974 National Security Study Memorandum (NSSM) 200. The memo was titled “Implications of Worldwide Population Growth for U.S. Security and Overseas Interests,”

wherein Kissinger argued that for America to control the strategic resources of Third World nations it must actively reduce their populations by millions of lives.

Wigington points out that every one of those Middle Eastern target countries underwent a once-in-one-thousand-year drought.

The Associated Press reported in 2022: “As the region grows hotter and drier, the United Nations has warned that the Middle East’s crop production could drop 30% by 2025. The region is expected to lose 6%-14% of its GDP by 2050 because of water scarcity, according to the World Bank. In Egypt, precipitation has fallen 22% in the past 30 years, according to the World Bank. Droughts are expected to become more frequent and severe. The Eastern Mediterranean recently saw its worst drought in 900 years, according to NASA, a heavy blow to countries like Syria and Lebanon where agriculture relies on rainfall.”

Of course, the rare weather event is blamed by “experts” on “global warming,” but Wigington says: **“That’s not nature—that’s climate engineering. In fact, the leaders of some of these countries stated so**

Confidential company docs show “vaccine” targets pregnancy—Depopulation “sponsored by Pfizer”

NaturalNews.com reports that the world is starting to realize that the “COVID-19 vaccines” “are actually aimed at mass extermination within a targeted timeframe, thanks to the confidential Pfizer documents that the Food and Drug Administration (FDA) has been forced to publish by court order.”

In 2020, the article states, a controversial forecast by global intelligence and consulting firm **Deagel Corporation** gained attention over its startling prediction of a significant depopulation event in five years. Deagel is a minor branch of the U.S. military intelligence, one of the many secretive organizations which collect data for high-level decision-making purposes and prepares confidential briefing documents for agencies like the **National Security Agency**, the **United Nations (UN)** and the **World Bank**.

“Deagel predicted that the United Kingdom would see its population decline by 77.1 percent, and the United States by 68.5 percent by the year 2025. There are also dim forecasts for other Western countries like Germany, Australia, Spain and France. These bold claims made by Deagel are now supported by plenty of evidence, including the Pfizer documents.”

“Deagel’s forecast was taken down from the company’s website sometime in 2020 after it started to become evident that the COVID-19 injections were contributing to a drop

in population and excess deaths.” But independent journalists used the Wayback Machine/Internet Archive to retrieve the post about the consulting firm’s forecast.

Many pregnant women lost their babies after taking Pfizer’s COVID-19 jab

One of the newly revealed Pfizer documents is a report on the use of the Pfizer injection in pregnant and lactating women, “which indicated that many pregnant women who took the vaccine lost their babies.”

There were 270 known cases of exposure to the “COVID-19 vaccine” during pregnancy and 46 percent of the 124 mothers exposed to the Pfizer injection suffered an adverse reaction.

“And out of those that suffered an adverse reaction, 49 were considered non-serious adverse reactions and 75 were considered serious. This means 58 percent of the mothers who reported suffering adverse reactions suffered a serious adverse event, ranging from uterine contraction to fetal death.

“Pfizer also admitted that of the 270 pregnancies they monitored, they have absolutely no idea what happened in the vast majority of them.”

“Even if you add the unknown outcomes to lower the percentage, the fact remains that these deaths could have been avoided if the pregnant mothers did not take the COVID-19 vaccines.” Instead, Pfizer deliberately hid the fact that the COVID-19 vaccines were NEVER safe for pregnant women.

A landmark paper in the peer-reviewed journal Vaccine* shows the COVID “vaccine” causes severe adverse events in 1 out of every 800 injected.

Rotavirus vaccine was pulled from market for 1 in 10,000 adverse events.

Swine flu vaccine was pulled for 1 in 100,000.

Dr. Kevin Bass tweeted that “As far as vaccines go, the COVID vaccine adverse event rate is historically extremely, extremely high.”

*Dr. Joseph Fraiman et al., “Serious adverse events of special interest following mRNA COVID-19 vaccination in randomized trials in adults,” *Vaccine*, vol. 40, no. 40 (September 2022).
